the volume highlights the intimate connections of environmental activism, energy infrastructure and illicit commodity trading with the political economies of Central Asia, the Horn of Africa and the Indian subcontinent. The book's nine chapters analyze how the exploitation and representation of the environment have shaped the history	of the region--and determined its place in global politics. It argues that how the ecological is understood, instrumentalized and intervened upon is the product of political struggle: deconstructing ideas and practices of environmental change means unravelling claims of authority and legitimacy. This is particularly important in a region	frequently seen through the prism of environmental determinism, where ruling elites have imposed authoritarian control as the corollary of 'environmental crisis'. This unique and urgent collection will question much of what we think we know about this pressing issue.

A little more than seventy-five years ago, Kate L. Turabian drafted a set of guidelines to help students understand how to write, cite, and formally submit research writing.

Seven editions and more than nine million copies later, the name Turabian has become synonymous with best practices in research writing and style. Her Manual for Writers continues to be the gold standard for generations of college and graduate students in virtually all academic disciplines. Now in its eighth

edition, A Manual for Writers of Research Papers, Theses, and Dissertations has been fully revised to meet the needs of today's writers and researchers.

The Manual retains its familiar three-part structure, beginning with an overview of the steps in the research and writing process, including formulating questions, reading critically, building arguments, and revising drafts. Part II provides an overview of citation practices with detailed information on the two main scholarly citation styles (notes-bibliography and author-date), an array of source types with contemporary examples, and detailed guidance on citing online resources. The final section treats all matters of editorial

style, with advice on punctuation, capitalization, spelling, abbreviations, table formatting, and the use of quotations. Style and citation

recommendations have been revised throughout to reflect the sixteenth edition of The Chicago Manual of Style. With an appendix on paper format and submission that has been vetted by dissertation officials from across the country and a bibliography with the most up-to-date listing of critical resources available, A Manual for Writers remains the essential resource for students and their teachers.
