Help students appreciate texts and write about them with conviction. Responding to a comprehension question is a surprisingly complex task. It draws on multiple skills: students must be able to read and analyze a text passage; consider what aspect of the text the question addresses; and then quickly and concisely write about their ideas, citing evidence to support them. Hence the prominence of constructed-response questions in standardized testing. In this refreshingly clear and upbeat guide, literacy consultant Nancy Boyles gives a step-by-step demonstration of how to help students achieve success with this task—and in the process of unpacking the steps involved, demonstrates how the instruction can inspire teachers' creativity as well as deepen students' literacy skills. Filled with ready-to-use scaffolds for every stage of instruction—sets of sample questions, anchor charts, cue cards, answer frames—this is a one-stop resource for teaching students how to organize their thoughts about what they've read, and then set them down in writing.

THE NO.1 SUNDAY TIMES BESTSELLER 'A beautiful little book by a brilliant mind' DAILY TELEGRAPH 'Effortlessly instructive, absorbing, up to the minute and - where it matters - witty' GUARDIAN The world-famous cosmologist and #1 bestselling author of A Brief History of Time leaves us with his final thoughts on the universe's biggest questions in this brilliant posthumous work. Is there a God? How did it all begin? Can we predict the future? What is inside a black hole? Is there other intelligent life in the universe? Will artificial intelligence outsmart us? How do we shape the future? Will we survive on Earth? Should we colonise space? Is time travel possible? Throughout his extraordinary career, Stephen Hawking expanded our understanding of the universe and unravelled some of its greatest mysteries. But even as his theoretical work on black holes, imaginary time and multiple histories took his mind to the furthest reaches of space, Hawking always believed that science could also be used to fix the problems on our planet. And now, as we face potentially catastrophic changes here on Earth - from climate change to dwindling natural resources to the threat of artificial super-intelligence - Stephen Hawking turns his attention to the most urgent issues for humankind. Wide-ranging, intellectually stimulating, passionately argued, and infused with his characteristic humour, Brief Answers to the Big Questions, the final book from one of the greatest minds in history, is a personal view on the challenges we face as a human race, and where we, as a planet, are heading next. Contrary to the popular belief, sales people don't rely on "the gift of the gab" to be successful. Actually,

the opposite is true. The best sales professionals spend far more time asking and listening than they do

talking and selling. They ask questions of their customers; they ask questions of their colleagues, and

they ask questions of their managers. If Oxford defines curiosity as the strong desire to know or learn

something, then by that definition, sales people are curious by nature. In fact, that's how sales

professionals learn to be professional in the first place. This is a collection of practical answers to

questions sales people ask most. Written by Susan A. Enns, a professional sales coach with a proven

track record of sales excellence over her 30 plus year career. Her accomplishments include consecutively

being the top sales rep in Canada, managing the top sales branch, and achieving outstanding sales growth in a national channel sales organization. She has written several books about sales and sales management and has created numerous automated sales tools. Her work has been published in several locations numerous times and has sold on five separate continents. As such, over the years, Susan has been asked many questions by many sales people. After a while, she saw that sales people, regardless of their experience, the products they sell, the industries in which they operate, or the countries where they sell, all share similar curiosities. In other words, although the wording may be different when asked in an email or when asked in person, sales people all ask the same questions, the most common of which are answered in this ebook. As the old saying goes, the only stupid questions are the ones unasked. As a sales professional, you should never be afraid to "Ask the Sales Coach" because you will learn so much from the answers! - "Susan really knows the selling world. She's honest, articulate, bright, giving, highly competent, personable and a top professional. Welcome her. It's the right thing to do." - "Our company hired Susan as our sales coach. She has helped me make more appointments, close more deals and make more money. The 3 most important concepts in sales. I would recommend any sales force hire her to help boost business sales". - "Susan ...understands the sales process intimately and is able to create a management process around it that drives sales people to accomplish their goals." - "Susan knows her stuff. She brings many years of great sales experience and success to anyone who wished to improve their skills in sales. She is very personable, and is not afraid to tell it like it is. I would recommend anyone (and I have) to Susan, her website, her books if you want to become a better sales person." - "Thanks for the training... I made my quota this year in May!"
