HQ Trivia Is the Hottest Game: What You Need to Know Know that the questions are hard, and you need a study guide. You won't be able to google the answers, so you need to study. What else do you need to know, well

that is how to play. Are your friends taking breaks at 3 p.m. and 9 p.m. every day to gather around an iPhone? They're probably playing HQ, a recent sensation on smartphones in which they play trivia for real money. The rules are simple, the host is personable and the lure of a real cash prize brings hundreds of thousands of people to the table. What is HQ Trivia? HQ Trivia is a live trivia app that you play for real money. The game goes live at 3 p.m. and 9 p.m. EST on weekdays and 9 p.m. EST on weekends. The game is hosted by comedian Scott Rogowsky, though he occasionally has substitutes, including British broadcast personality Sharon Carpenter. What are the rules? The game consists of 12 multiple choice trivia questions, ranging from easy to devastatingly hard (the latter have been labeled "savage questions" by the hosts). You have roughly ten seconds to answer each question, starting from when the host begins reading it. HQ's creators suggest this keeps the questions from being Googleable (I've found that they're right.) Everyone who completes all 12 questions split the jackpot. If no one wins, it carries over to the next game. How much money can I win? When the game debuted in August, jackpots were around \$100, but they have since ballooned to regular games for \$250 and now \$1,000. Every once in a while, a game will go much higher, including a recent set for a grand prize of \$8,000. Of course, if you win, you're likely splitting it with other winners. You can cash out with a PayPal account. You mentioned iPhones. Is there an Android version? Right now, HQ Trivia is only available on iOS. . But it seems to be coming to Android soon. In a tweet, the company suggested that Android owners could see the game by time the holidays roll around. How do I get extra lives? While HQ used to hand out extra lives, now you seemingly only get them by referring friends. Give them your referral code, which is identical to your username. When they plug it in, you'll get a second chance in your next game. What's with all of the memes? HQ has a chat on the bottom, and boy is it active. I mean, it's really something else. If you find it annoying, you can swipe it away, but it's also the breeding ground for a bunch of weirdness. Chat is where fans started calling Rogowsky "quiz daddy," and started continuously writing the phrases "dink fam" and "Fish Squad Worldwide," neither of which I understand. There's also a lot of horror in the chat, too, with people writing derogatory statements about all types of minority groups, seemingly for no reason. Some people get banned, but that hasn't stopped the behavior. What is The Q? Is it related? You may have recently heard of a similar game, The Q, which has received some buzz. It's an HQ clone with fewer players (for now), far less charismatic hosts, poorer production values and a smaller prize pool (usually \$500 or less). But it's on both iOS and Android, so it planted a flag on the trivia app landscape on Android before HQ did. If you've noticed an uptick in coworkers and friends stopping dead in their tracks around 3pm EST to stare intensely at their phones, it's likely they've fallen under the

spell of HQ Trivia. The live mobile game show app, developed by the team behind Vine and launched in late August, draws hundreds of thousands of contestants multiple times a day to compete for a pot of actual cash. To win, you just need to answer 12 multiple choice trivia questions correctly within the time limit and a piece of the jackpot -- usually \$1,000 per game, but it's been as big as \$8,500 -- is yours. Simple enough, right? Wrong. Winning HQ is hard as hell.

Question answering (QA) systems on the Web try to provide crisp answers to information needs posed in natural language, replacing the traditional ranked list of documents. QA, posing a multitude of research challenges, has emerged as one of the most actively investigated topics in information retrieval, natural language processing, and the artificial intelligence communities today. The flip side of such diverse and active interest is that publications are highly fragmented across several venues in the above communities, making it very difficult for new entrants to the field to get a good overview of the topic. Through this book, we make an attempt towards mitigating the above problem by providing an overview of the state-of-the-art in question answering. We cover the twin paradigms

of curated Web sources used in QA tasks? trusted text collections like Wikipedia, and objective information distilled into large-scale knowledge bases. We discuss distinct methodologies that have been applied to solve the QA problem in both these paradigms, using instantiations of recent systems for illustration. We begin with an overview of the problem setup and evaluation, cover notable sub-topics like open-domain, multi-hop, and conversational QA in depth, and conclude with key insights and emerging topics. We believe that this resource is a valuable contribution towards a unified view on QA, helping graduate students and researchers planning to work on this topic in the near future.
