Since the internet speeds went above the 500kbps mark, the number of things people can do with their interconnected devices skyrocketed. Automated homes, connected cars, and internet enabled TVs. The latter is what threatens to revolutionize the entertainment world as we know it, do away with cable TV and abolish the need for expensive blue-ray players. Even though smart TVs are so lucrative, most people find them either too costly, or limiting. The alternative would be going for a TV with an HDMI port, a USB port and purchasing a dongle to bring in the power of internet TV. Chromecast is one of the best and cheapest such tools in the market.

Chromecast Ultra Device 2018 Ultimate User Guide CreateSpace

Chromecast is a selection of digital media players manufactured by Google. Created as small dongles, the devices play audio or video content on a smart TV or audio system by streaming the content through Wi-Fi or from networks operating in that area. Users choose the means through which they want to play with the help of apps found on cellular phones and apps from the internet that is compatible with Google Cast technology. Also, videos or music can be mirrored from the Chrome operating on a personal computer. The original Chromecast, which was a video streaming device, was launched on July 24, 2013, and was in stores at the same time and sold for US\$35. The Google Cast was launched on February 3, 2014, which gave access to third parties to adjust their software to be compatible with Chromecast. Google reported that over 20,000 Google Cast compatible apps are accessible after of May 2015.

The Ultimate Chrome OS Guide For The Acer Chromebook Spin 11 R751T
GadChick Books

When you hear Apple TV you immediately think it is an actual TV that you are purchasing. But this is not the case. The Apple TV is actually a device that you will use to stream something a little similar to Amazon's Fire or Roku. It is a little black box that is about an inch and a half tall, just a little bit less than four inches, and it runs on a very similar platform to the iPad and the popular iPhones. You can download a list of apps and also games beyond the standard streaming video that you could get from Hulu, Netflix, Amazon, just to name a few. The Apple TV has been centered on various apps, and it is still able to stream multiple TV shows, movies straight to your HDTV, but this is just the tip of the iceberg on the features this box has been packed with. The box allows you to watch and stream podcasts, play your favorite game, stream your workout playlist, and much more. But what is important to note, to enjoy all these benefits this box is ready to provide it will all depend on the apps that you have installed. Some of the apps you will use are free, and some will cost. Think of it this way; the Apple TV is able to turn your TV into a Smart TV. You can either rent your favorite movies or merely stream your collection from your iTunes account. You could also stream movie shows from apps like Hulu Plus or Netflix; stream your music from the Pandora or Apple Music apps. I mean the list is endless on what the Apple TV can actually do for you. The Apple TV 4K has been designed with some of the fastest processors you could find, the same that powers the iPad Pro. The Apple TV box has been made to be as powerful as most laptops we use. It also has a fast graphics processor that has been designed with enough power that could turn the black box into a game console. Nothing sounds better than this. Apple has genuinely revamped the new generation, but this does not mean you have to throw away your older model, just the same thing they have been doing with iPhone. The third generation is still available in the market for you to purchase.
