the first day of Ramadan in heat-soaked Bangalore. A young man begins to dress: makeup, a sari, and expensive pearl earrings. Before the mirror he is transformed into Bhuvana. She is a hijra, a transgender seeking love in the bazaars of the city. What Bhuvana wants, she nearly gets: a passing man is attracted to this elusive young woman—but someone points out that Bhuvana is no woman. For that, the interloper's throat is cut. A case for Inspector Borei

Gowda, going to seed, and at odds with those around him including his wife, his colleagues, even the informers he must deal with. More corpses and Urmila, Gowda's ex-flame, are added to this spicy concoction of a mystery novel. Most intriguing is the grim world of Bhuvana. Her hijra fantasies, emotions, and hopes are etched in a way that is chilling yet oddly touching. Some mysteries remain till almost the end, for instance Bhuvana's connection with the wealthy,

corrupt Corporator Ravikumar, who lives in a mansion as grand as the Mysore Palace and controls whole districts of Bangalore. Anita Nair lives in Bangalore and is a prize-winning author. Her novel *Ladies Coupe*, published in the United States by St. Martin's Press, is a feminist classic which has been translated in thirty languages all over the world. This is her first crime novel. *Planning, Shooting, and Editing for Social Analysis* Rich Stowell, Master CFI-A

how turning off screens one  
day a week can work

wonders on your brain, body,  
and soul. Do you wish you  
had more time to do what  
you love, think deeply, and  
focus on the people and  
things that matter most? By  
giving up screens one day a  
week for over a decade,  
Internet pioneer and  
renowned filmmaker Tiffany  
Shlain and her family have  
gained more time,  
productivity, connection, and  
presence. Shlain takes us on a  
thought-provoking and  
entertaining journey through  
time and technology,  
introducing a strategy for

flourishing in our 24/7 world.  
Drawn from the ancient ritual  
of Shabbat, living 24/6 can  
work for anyone from any  
background. With humor and  
wisdom, Shlain shares her  
story, offering the accessible  
lessons she has learned and  
providing a blueprint for how

"This is the first machine-generated scientific book in chemistry published by Springer Nature. Serving as an innovative prototype defining

the current status of the technology, it also provides an overview about the latest trends of lithium-ion batteries research. This book explores future ways of informing researchers and professionals. State-of-the-art computer algorithms were applied to: select relevant sources from Springer Nature publications, arrange these in a topical order, and provide succinct summaries of these articles. The result is a cross-corpora auto-summarization of current texts, organized by means of a similarity-based clustering routine in coherent chapters and

sections. This book summarizes more than 150 research articles published from 2016 to 2018 and provides an informative and concise overview of recent research into anode and cathode materials as well as further aspects such as separators, polymer electrolytes, thermal behavior and modelling. With this prototype, Springer Nature has begun an innovative journey to explore the field of machine-generated content and to find answers to the manifold questions on this fascinating topic. Therefore it was intentionally decided not to manually polish or copy-edit

any of the texts so as to highlight the current status and remaining boundaries of machine-generated content. Our goal is to initiate a broad discussion, together with the research community and domain experts, about the future opportunities, challenges and limitations of this technology."--Publisher's website.
