"If you're thinking about buying your first sailboat and making it your own, you need to read this refreshingly honest tale." -- Ed Robinson, author of *Poop, Booze & Bikinis* Had I ever sailed? No. Did I think that mattered? No. I felt I had whatever grit and guile I needed to handle this silly sailing stuff. I parachuted with a sheet, drove a car that started with a screwdriver, swished with hydrogen peroxide. I rode horses, climbed rocks, leapt off cliffs. I spent summers in the sleeper of a big rig. I ate Malt-o-Meal. Surely these were excellent traits of a sailor. Surely I was salty enough. I fancied I was. Either way, we were going to find out. The time to go was now. All we needed was a boat. "In the cozy den of the large but modest house in Omaha where he has lived since he started on his first billion, Warren Buffett watched the horrors of Hurricane Katrina unfold on television in early September 2005. . . . On the fourth day, he beheld in disbelief the paralysis of local, state, and federal authorities unable to commence basic operations of rescue and sustenance, not just in New Orleans, but in towns and villages all along the Gulf Coast. . . . He knew exactly what he had to do. . . ." So begins the vivid fictional

account by political activist and bestselling author Ralph Nader that answers the question, "What if?" What if a cadre of superrich individuals tried to become a driving force in America to organize and institutionalize the interests of the citizens of this troubled nation? What if some of America's most powerful individuals decided it was time to fix our government and return the power to the people? What if they focused their power on unionizing Wal-Mart? What if a national political party were formed with the sole purpose of advancing clean elections? What if these seventeen superrich individuals decided to galvanize a movement for alternative forms of energy that will effectively clean up the environment? What if together they took on corporate goliaths and Congress to provide the necessities of life and advance the solutions so long left on the shelf by an avaricious oligarchy? What could happen? This extraordinary story, written by the author who knows the most about citizen action, returns us to the literature of American social movements—to Edward Bellamy, to Upton Sinclair, to John Steinbeck, to Stephen Crane—reminding us in the process that changing the body politic of America starts with imagination. *Lords of the Fly* CRC Press

Visual Imagery and Human Rights Practice examines the interplay between images and human rights, addressing how, when, and to what ends visuals are becoming a more central means through which human rights claims receive recognition and restitution. The collection argues that accounting for how images work on their own terms is an ever more important epistemological project for fostering the imaginative scope of human rights and its purchase on reality. Interdisciplinary in nature, this timely volume brings together voices of scholars and practitioners from around the world, making a valuable contribution to the study of media and human rights while tackling the growing role of visuals across cultural, social, political and legal structures.
