Maintaining dignity for patients approaching death is a core principle of palliative care. Dignity therapy, a psychological intervention developed by Dr. Harvey Max Chochinov and his internationally lauded research group, has been designed specifically to address many of the psychological, existential, and spiritual challenges that patients and their families face as they grapple with the reality of life drawing to a close. In the first book to lay out the blueprint for this unique and meaningful intervention, Chochinov addresses one of the most important dimensions of being human. Being alive means being vulnerable and mortal; he argues that dignity therapy offers a way to preserve meaning and hope for patients approaching death. With history and foundations of dignity in care, and step by step guidance for readers interested in implementing the program, this volume

illuminates how dignity therapy can change end-of-life experience for those about to die - and for those who will grieve their passing.

General's Report details the causes and the consequences of tobacco use among youth and young adults by focusing on the social, environmental, advertising, and marketing influences that encourage youth and young adults to initiate and sustain tobacco use. This is the first time tobacco data on young adults as a discrete population have been explored in detail. The report also highlights successful strategies to prevent young people from using tobacco. This three volume set includes the following items: A booklet containing highlights from the 2012 Surgeon General's report on tobacco use among youth and teens ages 12 through 17 and young adults ages 18 through 26. This booklet provides an overview of tobacco use within this targeted age group. The second booklet is an Executive Summary with two messages.

One message from for Kathleen Sebelius, Secretary of Health and Human Services and a second message from Howard Koh, Assistant Secretary of Health and contains a brief introduction to the set and summary and conclusions for each chapter contained in the final volume. The final volume contains over 800 pages of documentation, interwoven with text and data addressing the adverse health consequences of tobacco use by children and young adults. It includes research on a variety of topics, including nicotine addiction, trends in cigarette smoking among young adults, trends in smokeless tobacco use and cigar smoking over time, genetic factors in tobacco use among youth, and mass media influence on smoking to this age group to name a few. This third volume is rich with table data research findings to support the Surgeon General's concerns with America's use and tobacco. Federal Aviation Regulations, COA, & Section 333 Exemption Compliant. This logbook has been specifically designed to be compliant with 14 CFR 61.51, Section 333 exemptions, and COA logbook requirements. Easy COA Reporting. If you have MULTIPLE aircraft, this will NOT work. Buy one logbook for each drone. The FAA requires that commercial operators who have 333 exemptions and "blanket" COA's to file monthly reports. It is EXTREMELY annoying to log all this information and then send it in via email. If you have one drone per logbook, do not have any takeoff or landing damage, equipment malfunctions, or lost link events, you could simply make scans of the pages for the month and email them into the FAA. The COA's say, "number of flights (per location, per aircraft)" & "total aircraft operational hours[.]" The columns only support one aircraft; however, recreational flyers could list multiple aircraft because they are currently not required to report. Disclaimer: Current FAA "blanket" COAs say "must submit the following information" and do not explicitly say scans are acceptable. The FAA could issue guidance in the future further clarifying the mode of report (text in email vs. scan in email). It is up to YOU to keep up to date on this. The FAA or Law Enforcement Can Request Your Logbook. 14 C.F.R. § 61.51(i) says, "Persons must present their pilot certificate, medical certificate, logbook, or any other record required by this part for inspection upon a reasonable request by" the FAA, an authorized representative from the National Transportation Safety Board, or any Federal, State, or local law enforcement officer. If your electronic logbook is on your device, do you really want to give law enforcement or the FAA your device? Furthermore,

how are you to get the data off that device? Insurance. When you apply for insurance, they will ask you to fill out a form that is going to ask for all sorts of information. A logbook will assist you in filling out the form so you can receive the most accurate quote. Marketing. Showing a completed logbook to a potential customer is a great marketing point. Like the old adage, "A picture is worth a thousand words," a good logbook is worth a thousand flights. You can quickly demonstrate your flight experience by flipping through the pages. Furthermore, a well-kept and orderly logbook gives the impression that you are a professional. Required in Other Countries. Other countries such as South Africa require the drone logbook to be in paper. Paper is the current industry standard. Going for a Certificate/Rating. Individuals can use this logbook to apply their experience towards UAS certificates / ratings. While the FAA is still working on creating certificates and ratings, you can prepare for the future by logging everything now. Less Cumbersome. If you are marketing to a potential client, you can scan pages of your logbook and send it to them. It is more cumbersome to get the data off a phone or website. Very Little Problems. What happens if your phone is stolen, water damaged, battery dies, or there is poor cell phone signal? Paper does not need a cell signal or batteries. No Data Theft. You don't have to worry about data theft like you would with a website or an app. Fidelity. Electronic logbooks can be changed while pen and paper is permanent.
