### The Notenki Memoirs Keith Martin

Alain Briot states that, "The personality of the photographer must be present in the image for an artistic photograph to have value." And in this book he sets out to teach the things that are essential in achieving this goal. Following his successful first book, *Mastering Landscape Photography*, Briot goes beyond the conventional rules of composition and takes on a fresh, new approach to teaching the art of photography. Based upon his personal experiences as an artist, teacher, and photographer, he opens new doors to the reader-doors leading to new ways of seeing and composing images. Briot approaches fine art photography as being a combination of art and technique. In this new book he addresses both of these by presenting artistic and technical information. On the artistic side, Briot introduces artistic concepts that have been rarely, if ever, associated with photography. On the technical side, he presents numerous tools that can help you learn how to create better photographs and provides technical solutions to common photographic problems. The author practices photography as a fine art. What matters most to him is how photography can be used to express feelings and emotions. For Briot, a good photograph must be both artistically inspired and technically excellent. To have just one of these two elements is not enough for a fine art photograph to be successful. Topics include: - How to compose with color, with black and white, and with light - Why you need to consider your audience while composing a photograph - Recreate the emotions you felt when you captured your photographs - How the elements of color-hue, contrast, and saturation-work in your images - How to control the elements that have a visual effect in your photographs - How to draw upon your personal way of seeing and then share your vision - How to diagnose image maladies and apply the proper remedies - How to define a color palette for a specific photograph - How to use compositional elements to develop a personal style Forword by Tony Sweet

This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

A leading book in the field, *Cinematography* has been translated into many languages and is a staple at the world's top film schools. Lavishly produced and illustrated, it covers the entire range of the profession. The book is not just a comprehensive guide to current professional practice; it goes beyond to explain the theory behind the practice, so you understand how the rules came about and when it's appropriate to break them. In addition, directors will benefit from the book's focus on the body of knowledge they should share with their Director of Photography. *Cinematography* presents the basics and beyond, employing clear explanations of standard practice together with substantial illustrations and diagrams to reveal the real world of film production. Recognizing that professionals know when to break the rules and when to abide by them, this book discusses many examples of fresh ideas and experiments in cinematography. Covering the most up-to-date information on the film/digital interface, new formats, the latest cranes and camera support and other equipment, it also illustrates the classic tried and true methods.

Could you be Captain of a whaling ship if all the crew around you died in a tragedy? Would you even want to? And what would you do if the cook on board has plans of his own and wants to kill you? This and much more is what poor fifteen year old Dick Sands has to deal with as the only surviving crew member. Everything seems to be going according to plan. That is until the cook sabotages the ship and rather than arriving in South America, the group ends up in Africa. The evil cook's plan is to sell everyone on board into slavery. Will they survive all the obstacles and unexpected occurrences or will they fall victims to the African slave trade? 'Dick Sands, the Boy Captain' is an adventure novel which not only keeps you on the edge until the very end, but it also depicts the widespread condemnation of slavery. Jules Verne (1828-1905) was a French novelist who mostly wrote adventure fiction inspired by the scientific advances of the 19th century. With the help of editor Pierre-Jules Hetzel he wrote a series of books called 'Extraordinary Travels', which includes 'Journey to the Center of the Earth' (1864), 'Twenty Thousand Leagues Under the Sea' (1870) and 'Around the World in Eighty Days' (1873). There have been many film adaptations of Jules Verne's books with the most notable being 'Journey to the Center of The Earth' (2008) starring Brendan Fraser and Josh Hutcherson (The Hunger Games), 'Around the World in 80 Days' (1956) and 'Journey 2: The Mysterious Island' (2012) starring

Dwayne Johnson. Widely popular with both children and adults, Verne is one of the most translated authors of all time, and still inspires people the world over.
