The contributors to this book focus on the relationship between nature and society from a variety of theoretical and ethnographic perspectives. Their work draws upon recent developments in social theory, biology, ethnobiology, epistemology, sociology of science, and a wide array of ethnographic case studies -- from Amazonia, the Solomon Islands, Malaysia, the Mollucan Islands, rural communities from Japan and north-west Europe, urban Greece, and laboratories of molecular biology and high-energy physics. The discussion is divided into three parts, emphasising the

problems posed by the nature-culture dualism, some misguided attempts to respond to these problems, and potential avenues out of the current dilemmas of ecological discourse.

Shoot, edit, and share action-packed video with a GoPro The world moves fast'so if you want to capture it in real time, only a fast-moving camera will do. Enter the GoPro! This small but powerful camera is easy to hold, wear, or mount to capture video of all your high-speed adventures. Unfortunately, to the uninitiated, it can be a bit intimidating'but fear not! With the help of this revised edition of GoPro Cameras For Dummies, you'll acquire the skills needed to shoot high-quality

video or photos, edit raw footage into a final masterpiece, and share your GoPro works of art with the world. Compared with traditional digital video devices, the GoPro is a superhero. Okay, so it can't scale high rises, but it can go virtually anywhere and produce thrilling new perspectives of an epic slalom down the slopes or awesomely scenic hike and everything in between. When still photos simply won't do the trick, GoPro Cameras For Dummies shows you step by step how to use your GoPro camera to make movies, work with available light, create time-lapse sequences, and so much more. Meet the full line of GoPro cameras, including the HERO5, and find the one that's right for you Get help setting

your GoPro to shoot better video Discover what you need (or don't need) to shoot in the water Find step-by-step guidance for capturing better sound Edit your work like a GoPro guru Packed with full-color photos and updated to cover the latest GoPro cameras and software, this fun and accessible guide is a gadget lover's dream.

Mit Spaß und System zum spektakulären GoPro-Video. Aktualisiert für HERO4 und HERO5 Rich Stowell, Master CFI-A

The author of Create presents “an all-in-one, easily accessible handbook . . . [that] will show you how the pros do it. Study this and take your best shot” (Chase Jarvis, award-winning photographer). In Advancing Your Photography, Marc Silber provides the definitive handbook that will take you through

the entire process of becoming an accomplished photographer. From teaching you the basics to exploring the stages of the full “cycle of photography,” Silber makes it easy for you to master the art form and create stunning pictures. From thousands of hours of interviews with professional photography masters, you will learn valuable insights and tips on beginner, amateur, landscape, wedding, lifestyle, sports, animal, portrait, still life, and iPhone photography. Advancing Your Photography features:

- Top tips for making outstanding photographs from iconic photographers and many other leading professional photography masters of today

Professional Guide to Filmmaking
dpunkt.verlag

The Committee on Astronomy and Astrophysics (CAA), at its meeting on September 8, 1997, was briefed on the legislative report accompanying the bill to authorize appropriations for fiscal years 1998 and 1999 for the National Science Foundation (NSF). The report raised a number of questions about trends in support for research in astronomy and the overall robustness of the programs providing that support. At its meeting, the CAA heard the views of NSF and the National Aeronautics and Space Administration (NASA) on these issues. In consultation with the Board on Physics and Astronomy, the Space Studies Board, and representatives of NASA and NSF, the committee accepted the task of studying three of the questions raised by the House Science Committee (HSC). It was intended that the results of the study would help guide federal

support of basic research for the next decade and serve as analytical input to the new 2000 decadal survey of the Astronomy and Astrophysics Survey Committee (AASC). The study would not offer specific funding recommendations, but rather would provide a background analysis of the alignment between available resources, agency priorities, and the vitality of the basic research program.

The Quilt Project - Commemorating 10 years of the Mobile Arts 2008 - 2018. The Quilt Project is a textile art collaboration originating from mobile photography and art images, created by 234 individual artists located throughout the globe. Art is our common thread, The Quilt Project is our visceral recreation and connection through Mobile Art.

A Machine-generated Summary of Current Research Jordan Hetrick

With amazing low-light capabilities, incredible definition, intelligent autofocus and a host of other features, digital cameras have now become so powerful that they have left their users behind. Most photographers can take competent shots in a range of conditions, or fix imperfect exposures in Photoshop or Lightroom, but very few have the skill to push their cameras to the limit and capture the perfect shot, under all conditions, with no post-processing required. In Camera is the perfect way to take your photography to that level; to master your camera, understand light, exposure and composition, and make amazing photographs, whatever your camera, without cheating after the event. One hundred of Gordon's beautiful photos are given with his

own expert commentary; full settings and camera details are included, and a host of tips and tricks let photographers of any level learn something from every example. The shots are taken with a wide range of cameras, and the emphasis is on getting results by improving your own skills, not wasting money on expensive equipment.

Port City Racing

Although GoPro has experienced tremendous growth since its foundation, investors have started to lose faith in the ability of the firm to continue on its success path. On March 14, 2017 the stock price reached an all-time low of \$7.24 and has been trading below \$10.00 ever since, thus considerably below the initial IPO price of \$24.00 set in June 2014. This case describes how GoPro has rapidly grown to be a billion-dollar company and elaborates on the

several challenges it has been facing in the recent past. Particularly, the competition in the action camera market has become very fierce. For example, the Chinese producer Xiaomi, which has launched products that are technologically advanced while priced very aggressively, has seen increased market share. At the time of the case, in June 2017, GoPro has just completed its entry into the drone market with the introduction of its model Karma. Despite the strong competitive pressures that characterize the drone market--with the Chinese manufacturer DJI holding approximately 70% of the worldwide market share--GoPro hopes this move will help its comeback. The case invites students to put themselves in the shoes of a business consultant who has been hired by GoPro to evaluate its entry into the drone market and provide recommendations to the

top management team on how to win the competitive battle and become profitable again.

Whether you are dreaming of steaming jungle treks, conquering untamed peaks, chatting up the hottie in the hostel or simply chilling out on an isolated beach - this book is your ticket to turning your travel dreams into reality. Packed to bursting with backpacking tips and tricks, How to Travel

the World on \$10 a Day is the ultimate planning resource for the low-budget traveller. Better still, you'll learn how to stretch your dollars further by picking up work on the road, so if you don't want to go back home, you don't have to. Ditch your desk, take the plunge and hit the road... With this book by your side you'll save thousands of dollars, skip unnecessary headaches and be able to travel the world with confidence. "Will Hatton has been on the road for nine years, travelling to far-flung lands and visiting close to 100 countries all over the world. His blog, the Broke Backpacker, is one of the most popular adventure travel blogs in the world. A keen hitchhiker, Will has hitchhiked tens of thousands of kilometers, crossing Europe,

Iran, Pakistan, India and South East Asia by thumb. Will plans to open a backpacker hostel in the mountains of Pakistan. If you find yourself nearby -- come say hey!

Lithium-ion Batteries Svetla Bankova
"This is the first machine-generated scientific book in chemistry published by Springer Nature. Serving as an innovative prototype defining the current status of the technology, it also provides an overview about the latest trends of lithium-ion batteries research. This book explores future ways of informing researchers and professionals. State-of-the-art computer algorithms were applied to: select relevant sources from Springer Nature publications, arrange these in a topical order, and provide succinct summaries of these articles. The result is a cross-corpora auto-summarization of current texts, organized by

means of a similarity-based clustering routine in coherent chapters and sections. This book summarizes more than 150 research articles published from 2016 to 2018 and provides an informative and concise overview of recent research into anode and cathode materials as well as further aspects such as separators, polymer electrolytes, thermal behavior and modelling. With this prototype, Springer Nature has begun an innovative journey to explore the field of machine-generated content and to find answers to the manifold questions on this fascinating topic. Therefore it was intentionally decided not to manually polish or copy-edit any of the texts so as to highlight the current status and remaining boundaries of machine-generated content. Our goal is to initiate a broad discussion, together with the research community and domain experts, about the

future opportunities, challenges and limitations of this technology."--Publisher's website.

[Guida completa all'uso e agli accessori per video mozzafiato](#) Random House LLC

"Nair writes big, brave descriptions of one brutal murder after the next, relentlessly describing each death even as sub-inspector Santosh loses his breakfast over them."—Time Out It's the first day of Ramadan in heat-soaked Bangalore. A young man begins to dress: makeup, a sari, and expensive pearl earrings. Before the mirror he is transformed into Bhuvana. She is a hijra, a transgender seeking love in the bazaars of the city. What Bhuvana wants, she nearly gets: a passing man is attracted to this elusive young woman—but someone points out that Bhuvana is no woman. For that, the interloper's throat is cut. A case for Inspector Borei Gowda, going to seed, and at odds with those around him including his wife, his colleagues, even the informers he must deal with. More corpses and Urmila, Gowda's ex-flame, are added to this spicy

concoction of a mystery novel. Most intriguing is the grim world of Bhuvana. Her hijra fantasies, emotions, and hopes are etched in a way that is chilling yet oddly touching. Some mysteries remain till almost the end, for instance Bhuvana's connection with the wealthy, corrupt Corporator Ravikumar, who lives in a mansion as grand as the Mysore Palace and controls whole districts of Bangalore. Anita Nair lives in Bangalore and is a prize-winning author. Her novel Ladies Coupe, published in the United States by St. Martin's Press, is a feminist classic which has been translated in thirty languages all over the world. This is her first crime novel.

Oxford Dictionary of English Oxford University Press, USA

Few years ago, the topic of aerial robots was exclusively related to the robotics community, so a great number of books about the dynamics and control of aerial robots and UAVs have been written. As the control technology for UAVs

advances, the great interaction that exists between other systems and elements that are as important as control such as aerodynamics, energy efficiency, acoustics, structural integrity, and applications, among others has become evident. Aerial Robots - Aerodynamics, Control, and Applications is an attempt to bring some of these topics related to UAVs together in just one book and to look at a selection of the most relevant problems of UAVs in a broader engineering perspective.

How to Travel the World on \$10 a Day Sky Books (NY)

You've just purchased a TI-84 Plus calculator to assist in performing different types of mathematical equations--now, how can you get the most out of it? You'll find the answer to this question with our comprehensive, 6-page guide that shows in great detail what exactly the TI-84 Plus can do. Function key and mode descriptions, as well as problem-solving

examples, are included within a color-coded format for easy reference.
