The concept of concurrent engineering (CE) was first developed in the 1980s. Now often referred to as transdisciplinary engineering, it is based on the idea that different phases of a product life cycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). The main goal of CE is to increase the efficiency and effectiveness of the PCP and reduce errors in later phases, as well as incorporating considerations – including environmental implications – for the full lifecycle of the product. It has become a substantive methodology in many industries, and has also been adopted in the development of new services and service support. This book presents the proceedings of the 25th ISPE Inc. International Conference on Transdisciplinary Engineering, held in Modena, Italy, in July 2018. This international conference attracts researchers, industry experts, students, and government representatives interested in recent transdisciplinary engineering research, advancements and applications. The book contains 120 peer-reviewed papers, selected from 259 submissions from all continents of the world, ranging from the theoretical and conceptual to papers addressing industrial best practice, and is divided into 11 sections reflecting the themes addressed in the conference program and addressing topics as diverse as industry 4.0 and smart manufacturing; human-centered design; modeling, simulation and virtual design; and knowledge and data management among others. With an overview of the latest research results, product creation processes and related methodologies, this book will be of interest to researchers, design practitioners and educators alike.

My GoPro Hero Camera offers a comprehensive introduction to using the most recently released GoPro Hero camera models, including the basic GoPro Hero, GoPro Hero3+ and the GoPro Hero4. All three of these cameras utilize the same basic operating system and menus, but each has slightly different features, functions and possible shooting resolutions for digital images and video. After offering an initial introduction to the cameras themselves, as well as their menus and buttons, this book offers an overview of the different camera housings and mounts available, plus explains how to utilize the GoPro mobile app and computer software. How to best use other "must have" GoPro accessories, including the Wi-Fi Remote and the LCD Touch BacPac display are also covered. Throughout the book are hundreds of shooting tips and strategies that teach readers how to capture the best possible photos and videos in a wide range of situations. Strategies for shooting professional-quality first and third-person photos/videos, as well as traditional photos/video, plus ways to achieve the best possible results indoors, outdoors, underwater, in low-light situations, and in high-action situations are covered. This book appeals to those who purchased a GoPro camera to take on vacation or to capture "family moments," as well as to more active people who want to capture crystal-clear "action" images or videos of themselves engaged in various activities, using their GoPro camera in conjunction with the best combination of optional camera accessories, housings and mounts, based on their activity and the shooting conditions. How and why all of the accessories, housings, mounts, menu options and camera settings were used to capture the sample content is explained in the text and with plenty of visual examples within the book. Some additional companion video content is available through the Que website.

How do you sell an innovative product to a market that does not yet exist? Entrepreneurial businesses often create products and services based on radically new technology that have the power to change the marketplace. Existing market research data will be largely irrelevant in these cases, making sales and marketing of innovative new products especially challenging to entrepreneurs. Entrepreneurial Marketing focuses on this challenge. Classic core marketing concepts, such as segmentation, positioning and the marketing mix undergo an 'extreme makeover' in the context of innovative products hitting the market. Edwin J. Nijssen stresses principles of affordable loss, experimentation and adjustment for emerging opportunities, as well as cooperation with first customers. Containing many marketing examples of successful and cutting edge innovations (including links to websites and videos on the Internet), useful lists of key issues and instructions on how to make a one-page marketing plan, Entrepreneurial Marketing: An Effectual Approach provides a vital guide to successfully developing customer demand and a market for innovative new products. This second edition has been thoroughly expanded with: a one-page marketing plan which now focuses on the three entrepreneurial challenges that can be easily adapted; coverage of the customer development process; and updated references and new examples. This book provides students and entrepreneurs with the fundamental tools to succeed in marketing.
