Published by the American Geophysical Union as part of the Geophysical Monograph Series, Volume 68. Human activities in the polar regions have undergone incredible changes in this century. Among these changes is the revolution that satellites have brought about in obtaining information concerning polar geophysical processes. Satellites have flown for about three decades, and the polar regions have been the subject of their routine surveillance for more than half that time. Our observations of polar regions have evolved from happenstance ship sightings and isolated harbor icing records to routine global records obtained by those satellites. Thanks to such abundant data, we now know a great deal about the ice-covered seas, which constitute about 10% of the Earth's surface. This explosion of information about sea ice has fascinated scientists for some 20 years. We are now at a point of transition in sea ice studies; we are

concerned less about ice itself and more about its role in the climate system. This change in emphasis has been the prime stimulus for this book.

Lent for Everyone, Matthew: Year A gently takes the reader through the designated Lectionary reading for every day of Lent and Easter.

The Bible readings are Tom Wright's own clear and accessible translations from Matthew for Everyone (SPCK, 2002). Each passage is followed by a greatly written reflection and a prayer that will help readers to ponder the relevance of Matthew's Gospel for their own lives. Suitable for both individual and group study and reflection, Tom Wright's Lent book will allow you to make Matthew your own, thoughtfully and prayerfully. It will help to make your journey through Lent a period of rich discovery and growth. Tom Wright is Research Professor of New Testament and Early Christianity at the University of St Andrews, and was previously Bishop of Durham. He has lectured and broadcast in many parts of the world. He is the author of over fifty books, including the monumental works in the series Christian Origins and the Question of God and the popular For Everyone New Testament guides (SPCK).

These volumes highlight the importance of eastern Paleoindian research in understanding some of the first inhabitants of North America. Although diverse in manufacture and style, fluted point production represents the first widespread cultural phenomenon in North America. Volume II of In the Eastern Fluted Point Tradition continues the work begun in Volume I, expanding the Paleoindian literature with up-to-date summaries of late Pleistocene research in the eastern United States. These artifact and site-specific studies serve as examples of the detailed analyses required on Paleoindian assemblages and provide an

opportunity to better understand changes in population, technology, and settlement over time. Together, the two volumes advance Paleoindian studies in eastern North America, offering new data, interpretations, and hypotheses to create a baseline for future research.
