Natural disasters-including hurricanes, earthquakes, volcanic eruptions, and floods-caused more than 220,000 deaths worldwide in the first half of 2010 and wreaked havoc on homes, buildings, and the environment. To withstand and recover from natural and human-caused disasters, it is essential that citizens and communities work together to anticipate threats, limit their effects, and rapidly restore functionality after a crisis. Increasing evidence indicates that collaboration between the private and public sectors could improve the ability of a community to prepare for, respond to, and recover from disasters. Several previous National Research Council reports have identified specific examples of the private and public sectors working cooperatively to reduce the effects of a disaster by implementing building codes, retrofitting buildings, improving community education, or issuing extreme-weather warnings. State and federal governments have acknowledged the importance of collaboration between private and public organizations to develop planning for disaster preparedness and response. Despite growing ad hoc experience across the country, there is currently no comprehensive framework to guide private-public collaboration focused on disaster preparedness, response, and recovery. *Building Community Disaster Resilience through Private-Public Collaboration* assesses the current state of private-public sector collaboration dedicated to strengthening community resilience, identifies gaps in knowledge and practice, and recommends research that could be targeted for investment. Specifically, the book finds that local-level private-public collaboration is essential to the development of community resilience. Sustainable and effective resilience-focused private-public collaboration is dependent on several basic principles that increase communication among all sectors of the community, incorporate flexibility into collaborative networks, and encourage regular reassessment of collaborative missions, goals, and practices.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law – the law affecting information and communication technology (ICT) – in the Bangladesh covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and

service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the Bangladesh will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

The Corporate Responsibility Code Book has become the go-to guide for companies trying to understand the landscape of corporate responsibility and searching for their own, unique route towards satisfying diverse stakeholders. There is no one-size-fits-all approach. A company may face quite different challenges if it operates in more than one part of the world. And yet stakeholders, especially consumers and investors, are keen for some degree of comparability with which they can evaluate corporate performance. There are countervailing forces at work within corporate responsibility: on the one hand is the need for convergence in order to simplify the large numbers of codes and standards; and, on the other hand, the need to foster diversity and innovation. Many of the best codes of conduct and standards are not well known, while some CR instruments that are well disseminated are not terribly effective. Some comprehensive codes of conduct achieve nothing, while other quite vague codes of conduct become well embedded into the organization and foster innovation and change. This landmark book explains the best CR instruments available, and distils their most valuable elements. In the fully revised third edition, Deborah Leipziger widens her lens to provide detailed analysis of the UN Guiding Principles on Business and Human Rights, the Gender Equality Principles and ISO 26000 while updating other key tools such as the Equator Principles, the OECD guidelines and GRI's new G4 framework. The codes in this book cover a wide range of issues, including human rights, labour rights, environmental management, corruption and corporate governance. The book also includes how-to (or process) codes focusing on reporting, stakeholder engagement and assurance.

The federal government wastes your tax dollars worse than a drunken sailor on shore leave. The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, The Pig Book proves one thing about Capitol Hill: pork is king!

A flu pandemic is a worldwide epidemic of an influenza virus. As such, the U.S. response to a flu pandemic would have both international and domestic components. Additionally, the domestic response effort would

include contributions from every governmental level, non-governmental org., and the private sector. This report focuses on the role of the DoD in supporting the nation's domestic response effort, although it also touches on DoD's international role. DoD's role during a flu pandemic would center on these objectives: assisting in disease surveillance; assisting partner nations, particularly through military-to-military assistance; protecting and treating U.S. forces and dependents; and providing support to civil authorities in the U.S.

Concurrency of powers – the exercise of jurisdiction by federal governments and constituent units in the same policy areas – is a key, if not the central, mode of governance in most federal systems today. Moreover, the experience has been that federal governments dominate the concurrent space giving rise to contestation. This volume, *Concurrent Powers in Federal Systems: Meaning, Making and Managing*, edited by Professor Nico Steytler, is the first to examine from a comparative perspective this crucial issue confronting both established and emerging federations. Case studies of 16 countries on five continents dissect the various manifestations of concurrency, analyse what drives this modern governance mode, and review management strategies that seek to guard against central dominance of concurrent areas.

"The objective of this report is to identify and establish a roadmap on how to do that, and lay the groundwork for transforming how this Nation- from every level of government to the private sector to individual citizens and communities - pursues a real and lasting vision of preparedness. To get there will require significant change to the status quo, to include adjustments to policy, structure, and mindset"--P. 2.

*Social Studies for Secondary Schools: Teaching to Learn, Learning to Teach, Second Edition* integrates discussions of educational goals and the nature of history and social studies with practical ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme woven throughout the text is that what we choose to teach and the way we teach reflect our broader understanding of society, history, and the purposes of social studies education. Each chapter opens with a broad question about social studies education; provides many examples of lessons, including lesson ideas developed by new and experienced middle school and high school social studies teachers; features a rich variety of teaching, learning, and classroom activities designed to provoke discussion and illustrate different approaches to teaching social studies; and concludes with essays about related social studies topics. Part I focuses on philosophical issues, social studies goals and standards, and the design of social studies curricula. Part II examines and offers examples of strategies for planning units and lessons. Part III explores topics, such as thematic and interdisciplinary teaching, a project approach to social studies, as well as assesses student learning and one's own performance as a teacher, and provides a guide to social studies resource materials and organizations. New in the Second Edition: \*Every chapter has been updated and includes a number of new lesson ideas. \*The lesson ideas are designed especially to help beginning teachers address learning standards; work in inclusive settings; and promote literacy and the use of technology in social studies classrooms. \*Sample activities developed with members of the Hofstra New Teachers Network reflect the current focus on document-based instruction and assessment, and can serve as tools for assessing student learning. \*Increased attention is given to project-based social studies instruction and to multicultural education. Intended as a text for undergraduate and graduate preservice social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.
