Reports Books
An award-
winning scientist
offers his
unorthodox
approach to
childrearing:
“ Parentology is
brilliant, jaw-
droppingly funny,
and full of
wisdom...bound
to change your
thinking about
parenting and its
conventions ”
(Amy Chua,
author of Battle
Hymn of the
Tiger Mother). If
you ' re like many
parents, you
might ask family
and friends for
advice when
faced with
important choices
about how to
raise your kids.
You might turn to

parenting books or names (because
simply rely on
timeworn
religious or
cultural traditions.
But when Dalton
Conley, a dual-
doctorate
scientist and full-
blown nerd,
needed
childrearing
advice, he turned
to scientific
research to make
the big decisions.
In Parentology,
Conley hilariously
reports the
results of those
experiments, from
bribing his kids to
do math (since
studies show
conditional cash
transfers
improved
educational and
health outcomes
for kids) to
teaching them
impulse control by
giving them weird

evidence shows
kids with unique
names learn not
to react when
their peers tease
them) to getting a
vasectomy
(because fewer
kids in a family
mean smarter
kids). Conley
encourages
parents to draw
on the latest data
to rear children, if
only because that
level of
engagement with
kids will produce
solid and happy
ones. Ultimately
these
experiments are
very loving, and
the outcomes are
redemptive—even
when Conley ' s
sassy kids show
him the limits of
his profession.

with Baby, by
celebrated family
travel author and
blogger Shelly
Rivoli, helps
parents plan every

trip they'll take with their child from birth through 4 years. In addition to the major modes of transport covered in great detail--air travel (50 pgs.), travels by automobile (40 pgs.), cruise vacations (31 pgs.), rail travel (53 pgs. Including USA, Canada & Europe)--this "Ultimate Guide" also includes advice for traveling with children of different temperaments, health and safety considerations, suggestions for where to travel when during a child's first years, packing lists and travel-friendly baby gear recommendations, and more. As the Society for American Travel Writers Foundation declared, this guide is "...a must have even for families who only travel occasionally." Baby BargainsAmerica's best-selling and best-loved guide to baby gear is back with an updated and revised edition! Yes, a baby book that actually answers the big question about having a baby: How am I going to afford all this? With the average cost of a baby topping \$7400 for just the first year alone, new parents need creative solutions and innovative ideas to navigate the consumer maze that confronts all parents-to-be. Baby Bargains is the answer! Inside, you'll discover: * BEST BET PICKS for cribs, car seats, strollers, high chairs, diapers and more! * CHEAT SHEETS for your baby registry--create a baby registry in minutes with our good, better, best ideas. * SEVEN THINGS no one tells you about baby gear, from nursery furniture to feeding baby. * THE

TRUTH ABOUT STROLLERS--and which brands work best in the real world. * Dozens of SAFETY TIPS to keep baby safe and affordably baby proof your home. * DETAILED CHARTS that compare brands of cribs, high chairs, car seats and more. This new 14th edition adds the latest tips and advice on getting bargains on baby gear, including: Streamlined recommendations by parenting lifestyle, from a crib for space-challenged urban parents to an affordable car seat

for Grandma's car. New recommendations for baby feeding, from baby food processors to storage ideas for homemade baby food. BUDGET-FRIENDLY picks for dozens of items, from high chairs to infant car seats. Expanded coverage of new baby gear items, like extra-large playpens, sleep soothers and moreParentology This beautiful hardback Ladybird treasury of favourite nursery rhymes is a beautifully illustrated introduction to many well-loved

rhymes that are perfect for sharing with young children from 3+. With more than 100 rhymes including favourites such as Three Blind Mice, The Owl and the Pussy-cat, Humpty Dumpty and Head, Shoulders, Knees and Toes, there is a rhyme for everyone in this collection of animal, action, story, food, counting and bedtime rhymes. Dad's Guide to Raising Twins On Becoming The latest scientific research on home birth, breastfeeding, sleep training, vaccines,

and other key topics—to help parents make their own best-informed decisions. In the era of questionable Internet "facts" and parental oversharing, it's more important than ever to find credible information on everything from prenatal vitamins to screen time. The good news is that parents and parents-to-be no longer need to rely on an opinionated mother-in-law about whether it's OK to eat sushi in your third trimester, an old college roommate for sleep-training

“rules,” or an online parenting group about how long you should breastfeed (there's a vehement group for every opinion). Credible scientific studies are out there — and they're “bottom-lined” in this book. The ultimate resource for today's science-minded generation, *The Informed Parent* was written for readers who prefer facts to “friendly advice,” and who prefer to make up their own minds, based on the latest findings as well as their own personal preferences.

Science writers and parents themselves, authors Tara Haelle and Emily Willingham have sifted through thousands of research studies on dozens of essential topics, and distill them in this essential and engaging book. Topics include: Home birth * Labor induction * Vaginal birth vs. Cesarean birth * Circumcision * Postpartum depression * Breastfeeding * Vaccines * Sleep training * Pacifiers * SIDS * Bed-sharing * Potty training * Childhood obesity * Food sensitivities

and allergies * BPA
and plastics *
GMOs vs. organic
foods * The
hygiene hypothesis
* Spanking *
Daycare vs. other
childcare options

Perfect for expecting parents who want to provide a soothing home for the newest

member of their family,
The Happiest Baby on the Block, the national bestseller by respected pediatrician and child development expert Dr. Harvey Karp, is a revolutionary method for calming a crying infant and promoting healthy sleep from day one. In perhaps the most important parenting book of the decade, Dr. Harvey Karp reveals an extraordinary treasure sought by parents for centuries --an automatic " off-switch " for their baby ' s crying. No wonder pediatricians across the country are praising him and thousands of Los Angeles parents, from working moms to superstars like Madonna and Pierce Brosnan, have turned to him to learn the secrets for making

babies happy. Never again will parents have to stand by helpless and frazzled while their poor baby cries and cries. Dr. Karp has found there IS a remedy for colic. “ I share with parents techniques known only to the most gifted baby soothers throughout history ...and I explain exactly how they work. ” In a innovative and thought-provoking reevaluation of early infancy, Dr. Karp blends modern science and ancient wisdom to prove that newborns are not fully ready for the world when they are born. Through his research and experience, he has developed four basic principles that are crucial for understanding babies as well as improving their sleep and soothing their senses:

- The Missing Fourth Trimester: as odd as it may sound, one of the main reasons babies cry is because they are born three months too soon.
- The Calming Reflex: the automatic reset switch to stop crying of any baby in the first few months of life.
- The 5 “ S ’ s ” : the simple steps (swaddling, side/stomach position, shushing, swinging and sucking) that trigger the calming reflex. For centuries, parents have tried these methods only to fail because, as with a knee reflex, the calming reflex only works when it is triggered in precisely the right way. Unlike other books that merely list these techniques Dr. Karp teaches parents exactly how to do them, to guide cranky infants to calm and easy babies to

serenity in minutes...and help them sleep longer too.

- The Cuddle Cure: the perfect mix the 5 “ S ’ s ” that can soothe even the most colicky of infants. In the book, Dr. Karp also explains: What is colic? Why do most babies get much more upset in the evening? How can a parent calm a baby--in mere minutes? Can babies be spoiled? When should a parent of a crying baby call the doctor? How can a parent get their baby to sleep a few hours longer? Even the most loving moms and dads sometimes feel pushed to the breaking point by their infant ’ s persistent cries. Coming to the rescue, however, Dr. Karp places in the hands of parents, grandparents, and all childcare givers the

tools they need to be able to calm their babies almost as easily as...turning off a light. From the Hardcover edition.

[News from CPSC](#)

Simon and Schuster
In a previous study, a computational model of child occupants 6 to 10 years old (YO) was validated using data from a sled test series with the 6YO and

10YO Hybrid-III ATDs. Simulations using this model were used to identify characteristics of a vehicle seat and belt geometry that would improve occupant protection for older children not using booster seats. The current report presents a series of sled tests to examine the effects for other occupants using vehicle seats optimized for 6- to 10-year-old children. Tests were conducted with a 12MO CRABI seated in a Graco SnugRide rear-facing infant restraint and a Hybrid III 50th male ATD. Seat cushion length was set to 450 mm, 400 mm, and 350 mm. Lap belt conditions included one representing the mid-range of FMVSS No. 210, "Seat belt assembly anchorages,"

allowable seat belt anchorage conditions as well as one more forward but closer to the vehicle seat H-point. Shoulder belt conditions included the standard FMVSS No. 213 shoulder belt anchorage as well as one positioned closer to the adult male shoulder. Vehicle seats from a 2008 Dodge Town and Country were used, and some tests included modifications to make the front support structure of the seat cushion stiffer. The tests with the midsize adult male ATD showed no negative consequences from design changes intended to improve protection for children. Kinematics were similar among all conditions tested. For the rear-facing infant restraint, none of the

tests exceeded the 70 ° rotation angle requirement of FMVSS No. 213, although shorter cushion length and more forward belt locations produced larger rotations. The three tests with the more forward lap belt geometry slightly exceeded the 3-ms-chest clip acceleration limit of 60 g, but a review of all chest acceleration curves suggests that the vehicle seat may produce higher chest accelerations than the FMVSS No. 213 test bench. In tests with the [...].

The Informed Parent

Long before they're able to talk, babies have a whole lot to say! Widen their world with this

delightful modern classic—a must-have for growing families and a perfect baby shower or new-baby gift. With this adorable board book of essential signs, babies and toddlers can easily learn how to communicate their needs, wants, and feelings and even make basic observations with a simple gesture. Studies show that babies who use sign language feel less frustrated, throw fewer tantrums, and often learn to talk more easily. Just point to a sign in the book, say the word while making the sign, and the

baby will soon be signing. Communicating a wet diaper or a hungry belly, asking for help or saying "all done" becomes as easy as waving hello or good-bye. And these are just a few of the thirteen signs inside this small and adorably illustrated board book, perfect for little hands and minds to grasp. Parentology Distinguished pediatrician Dr Robert Bucknam, M.D. and co-author Gary Ezzo are two of the world's leading experts on baby sleep and feeding patterns. Millions of new mothers across the globe are coming toward this new brand at an increasing pace

as they find and share the life changing success they are achieving with their newborns. This updated Anniversary edition celebrates 25 years with Bucknam and Ezzo's groundbreaking approach which has found favor with over six million parents in all 50 states and has been translated into 20 languages around the world. For 25 years, *On Becoming Babywise* has been the de facto newborn parenting manual for naturally synchronizing your baby's feeding time, waketime and nighttime sleep cycles, so the whole family can sleep through the night. In his 28th year as a licensed Pediatrician, Dr. Robert Bucknam, M.D. along with co-

author Gary Ezzo, demonstrate how order and stability are mutual allies of every newborn's metabolism and how parents can take advantage of these biological propensities. In particular, they note how an infant's body responds to the influences of parental routine or the lack thereof. Early chapters start with explorations of everyday aspects of infant management such as the three basic elements of daytime activities for newborns: feeding time, waketime, and naptime. Practical discussions then focus on broad and niche topics including feeding philosophies, baby sleep problems, baby scheduling challenges, nap routines, sleep training multiples, baby sleeping props, Colic

and Reflux and many other dimensions which impact breast feeding schedules, bottle feeding tips, and baby sleeping training. Five resource Appendixes provide additional reference material: 1) Taking care of baby and mom 2) A timeline of what to expect and when 3) Baby Sleep Training Problems and Solutions 4) Monitoring Your Baby's Growth 5) Healthy Baby Growth Charts On Becoming Babywise is more than an infant-management concept. It is a mindset for successful parenthood. It can help any parent develop a plan that meets both the needs of a new baby and of the entire family. These principles have worked for millions of parents and, when applied with

common sense to your unique situation, can work wonderfully for you too!

Recommended by doctors across the country.

Ladybird Favourite Nursery Rhymes

This big first learning book will appeal to both child and parent.

Containing basic number, alphabet, word, colour, opposite and phonic concepts this fun book will keep children learning as they engage with the bright artwork throughout.
