A thoughtful, illuminating exploration of modern Japanese politics and culture through the eyes of an investigative reporter Dreux Richard presents post-Fukushima Japan in three illustrative parts. He follows members of Japan's Nigerian community, whose struggles with a hostile immigration system lead to the death of a Nigerian immigrant in a Japanese detention center, investigated here for the first time. In Japan's northernmost city, Richard goes door to door with the region's youngest census employee, meeting the city's elderly residents and documenting the stories that comprise the nation's record-breaking population decline. Finally, he takes us into the offices of energy

executives and nuclear regulators, as they fight to determine whether reactors threatened by earthquake faults will be permitted to restart after the Fukushima disaster, a conflict that brings the entire regulatory system to the brink of collapse. Six years in the making, Richard's perceptive and probing account establishes him as an authority on his subjects, but he remains aware of his status as an outsider and interpreter for his readers. His long-term engagement with the personal lives of his sources revives the expatriate literary tradition of Lafcadio Hearn and Donald Richie, bringing its best qualities into a century where forensic investigation of wrongdoing and compassionate observation of its consequences are equally crucial. Through an exceptional range of approaches to an exceptionally complex society, Every Human Intention provides an understanding of today's Japan that goes far beyond politics, truisms, and sensational arguments.

Dad's Guide to Raising Twins Springer

Fouad Ajami presents a firsthand look at the political culture in Saudi Arabia and its conduct and influence in foreign lands from the early 1990s to around 2010. From the influence of Islam in public life to Saudi rulers' attitudes toward the George W. Bush and Obama administrations, the author fills a significant gap in our understanding of that country.

"Dolvett offers a dieting trifecta: easy, effective, and friendly to cheaters. He helps trick your metabolism into cooperating with his rapid weight loss formula for success." --Mehmet Oz, M.D. Want to finally lose the weight and keep it off? Want to be able to eat the foods you love? Reaching your goals can only happen when you don't feel deprived and you continue to stay motivated. Now, celebrity trainer and star of the hit reality series The Biggest Loser, Dolvett Quince, tells you how to do all of that and more in his revolutionary program, The 3-1-2-1 Diet. This 21-day program works by manipulating your body's natural tendency to slow its metabolic rate in response to calorie restriction. It takes a new approach to getting lean-one scientifically based on changing up food and calories to tap into your body's potential to burn fat. This unconventional plan results in greater muscle and less fat than any other diet you've ever tried. Dolvett's effective eating plan is as easy as 3-1-2-1: three days of clean eating, one day of cheating, two more days of clean eating, and one final reward meal at the end of the week. No foods are off limits and you will never feel deprived because the plan is flexible enough to fit into any lifestyle. You'll lose weight fast-10 pounds or more in just 21 days-

and you won't plateau. Dolvett's simple meal plans and delicious, easy-to-prepare recipes, together with his fast and effective workouts that combine cardio and body-shaping moves, will have you back in your skinny jeans in less than three weeks!

India will be the world's most populous country by 2024 and its third largest economy by 2028. But the size of our population and a sense of historical greatness alone are insufficient to guarantee we will fulfil our ambition to become a global power. Our approach to realize this vision needs more than just planning for economic growth. It requires a shift in attitudes. In *Making India Great*, Aparna Pande examines the challenges we face in the areas of social, economic, military and foreign policy and strategy. She points to the dichotomy that lies at the heart of the nation: our belief in becoming a global power and the reluctance to implement policies and take actions that would help us achieve that goal. The New India holds all the promise of greatness many of its citizens dream of. Can it become a reality? The book delves into this question.

Dad's Guide to Twins HarperCollins

You survived the twin pregnancy and have brought the twins home. Now the real adventure begins. This guide will walk you through the challenging and exciting aspects of raising twins. You can thrive as a father of twins even during the crazy early years with twins. In this book, you will learn how to:

- * Keep balance in your personal life with twins
- * Juggle work and family life
- * Feed your twins and get them on a schedule
- * Get your twins to sleep through the night
- * Keep your twins healthy and deal with inevitable sick kids
- * Encourage individuality in your twins
- * Teach your twins to be self-sufficient
- * Keep your other kid(s) happy along the way
- * Escape diapers and potty train your twins

Travel with twins * Create and capture memories with your twins

Joe's first book for fathers of twins, the "*Dad's Guide to Twins*," got you ready for your twins' arrival. This companion book continues the journey and helps you from the moment you get the twins home. It guides you through what to expect and how to handle those precious twins through the first couple of years. If you are expecting twins, have newborns, or are struggling through that first year (or more) with twins, this book is for you. You'll find tips and tricks to tackle each stage of your twins' development plus ideas to improve what you're already doing.

Baby Bargains Grand Central Life & Style

Aimed at boaters, this book is about building things of wood. Written by an experienced boatbuilder / designer, it presents joinery techniques and gimmicks that were born of trial and error. It provides alternative procedures for many of the projects, telling how to make them by Method A, Method B, and Method C.

Auto & Traffic Safety Hassell Street Press

This comprehensive book contains contributions from specialists who provide a complete status update along with outstanding issues encompassing different topics related to deep-sea mining. Interest in exploration and exploitation of deep-sea minerals is seeing a revival due to diminishing grades and increasing costs of processing of terrestrial minerals as well as availability of several strategic metals in seabed mineral resources; it therefore becomes imperative to take stock of various issues related to deep-sea mining. The authors are experienced scientists and engineers from around the globe developing advanced technologies for mining and metallurgical extraction as well as performing deep sea exploration for several decades. They invite readers to learn about the resource potential of different deep-sea

minerals, design considerations and development of mining systems, and the potential environmental impacts of mining in international waters.

NATIONAL BESTSELLER From a leading child psychologist comes this groundbreaking new understanding of children's behavior, offering insight and strategies to support both parents and children.

Nominated for Malcolm Gladwell, Susan Cain, Adam Grant, and Daniel H. Pink's Next Big Idea Club Over her decades as a clinical psychologist, Dr. Mona Delahooke has routinely counseled distraught

parents who struggle to manage their children's challenging, sometimes oppositional behaviors. These families are understandably focused on correcting or improving a child's lack of compliance, emotional outbursts, tantrums, and other "out of control" behavior. But, as she has shared with these families, a perspective shift is needed.

Behavior, no matter how challenging, is not the problem but a symptom; a clue about what is happening in a child's unique physiologic makeup. In Brain-Body Parenting, Dr. Delahooke offers a radical new approach to parenting based on her clinical experience as well as the most recent research in neuroscience and child psychology.

Instead of a "top-down" approach to behavior that focuses on the thinking brain, she calls for a "bottom-up" approach that considers the essential role of the entire nervous system, which produces children's feelings and behaviors. When we begin to understand the biology beneath the behavior, suggests Dr. Delahooke, we give our children the resources they need to grow and thrive—and we give ourselves the gift of a happier, more connected relationship with them.

Brain-Body Parenting empowers parents with tools to help their children develop self-regulation skills while also encouraging parental self-care, which is crucial for parents to have the capacity to provide the essential "co-regulation" children need. When parents shift from trying to secure compliance to supporting connection and balance in the body and mind, they unlock a deeper understanding of their child, encouraging calmer behavior, more harmonious family dynamics, and increased resilience.

Making India Great University of Michigan Press ELT

In this book, Dr. Billings shares the "secret sauce" which has made the Acellus Learning System a game changer for thousands of schools coast-to-coast. Acellus makes a science of the learning process. It contains tools to recover discouraged students and to accelerate the learning process. In these pages, the author shares the tools, the techniques, and the magic of Acellus that is changing education, discussing important aspects of the system: - What is Acellus? - How does it work? - What happens when a student gets stuck? - How does Acellus accelerate the learning process? Dr. Maria Sanchez, Chairman International Academy of Science

National Automotive Sampling System, Crashworthiness Data System

The new edition of Toward Speaking Excellence addresses the recent changes to the Test of Spoken English (TSE(R)). The text introduces readers to the format of the new TSE(R), typical questions, and scoring criteria. The second edition of Toward Speaking Excellence includes actual student responses that are used or modified to highlight specific characteristics of effective communication. Two complete sample TSE(R)-like tests are included for further practice. Also provided are practice with some of the skills that, while no longer tested on the TSE(R), are key to sounding more native-like and fluent. Toward Speaking Excellence may be used as an individual study tool or as a course text. While the material is directed toward

the TSE(R) and SPEAK(R) tests, the communication strategies presented will prepare students for other types of oral exams (including the TAST(R), interviews, and performance tests. Toward Speaking Excellence is a course book but may also be used for individual test-preparation/self-study. Dean Papajohn is a Specialist in Education at the Center for Teaching Excellence, University of Illinois, Urbana-Champaign..

We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Boat Joinery and Cabinet Making Simplified

Despite efforts to increase renewables, the global energy mix is still likely to be dominated by fossil-fuels in the foreseeable future, particularly gas for electricity and oil for land, air and sea transport. The reliance on depleting conventional oil and natural gas resources and the geographic distribution of these reserves can have geopolitical implications for energy importers and exporters. Global Energy Policy and Security examines the security of global and national energy supplies, as well as the sensitivity and impacts of sustainable energy policies which emphasize the various political, economic, technological, financial and social factors that influence energy supply, demand and security. Multidisciplinary perspectives provide the interrelated topics

of energy security and energy policy within a rapidly changing socio-political and technological landscape during the 21st century. Included are two main types of interdisciplinary papers. One set of papers deals with technical aspects of energy efficiency, renewable energy and the use of tariffs. The other set of papers focuses on social, economic or political issues related to energy security and policy, also describing research, practical projects and other concrete initiatives being performed in different parts of the world. This book will prove useful to all those students and researchers interested in the connections between energy production, energy use, energy security and the role of energy policies.
