Encyclopedia of Latin American Literature Oxford : Clarendon P. From an Ivy League dean and a college admissions expert, a guide to help parents support their children as they navigate their way to college The College Conversation is a comprehensive resource for mapping the path through the college application process that provides practical advice and reassurance to keep both anxious parents and confused children sane and grounded. Rather than adding to the existing canon of "How to Get In" college guides or rankings, Eric Furda and Jacques Steinberg provide a step-by-step approach to having the tough conversations on this topic with less stress and more success. The book is organized around key discussions and themes that trace the chronological arc of admissions and financial aid--beginning before the assembly of a list of potential colleges and continuing through the receipt of decisions--with a final section that includes advice on the first year of college. The topics include preliminary conversations about the

search, and specifically how parents can think about their children's interests and what kind of college would best suit them; choosing a college (based on its curriculum, culture, and community); writing the most effective essays; assessing acceptances, including considerations of finances and aid; and making the transition from high school to college life. The College Conversation will provide parents, students, and counselors with the credible, level-headed information often missing in this process, as well as a much-needed dash of perspective borne of experience.

This book takes a fresh look at the most dynamic area of American law today, comprising the fields of copyright, patent, trademark, trade secrecy, publicity rights, and misappropriation. Topics range from copyright in private letters to defensive patenting of business methods, from moral rights in the visual arts to the banking of trademarks, from the impact of the court of patent appeals to the management of Mickey Mouse. The history and political science of intellectual property law, the challenge of digitization, the many statutes and judge-made doctrines, and the interplay with antitrust principles are all examined. The treatment is both positive (oriented toward understanding the law as it is) and normative (oriented to the reform of the law). Previous analyses have tended to overlook the paradox that expanding intellectual property rights can effectively reduce the amount of new intellectual property by raising the creators' input costs. Those analyses have also failed to integrate the fields of intellectual property law. They have failed as well to integrate intellectual property law with the law of physical property, overlooking the many economic and legal-doctrinal parallels. This book demonstrates the fundamental economic rationality of intellectual property law, but is sympathetic to critics who believe that in recent decades Congress and the courts have gone too far in the creation and protection of intellectual property rights. Table of Contents: Introduction 1. The Economic Theory of Property 2. How to Think about Copyright 3. A Formal Model of Copyright 4. Basic Copyright Doctrines 5. Copyright in Unpublished Works 6. Fair Use, Parody, and

Burlesque 7. The Economics of Trademark Law 8. The Optimal Duration of Copyrights and Trademarks 9. The Legal Protection of Postmodern Art 10. Moral Rights and the Visual Artists Rights Act 11. The Economics of Patent Law 12. The Patent Court: A Statistical Evaluation 13. The Economics of Trade Secrecy Law 14. Antitrust and Intellectual Property 15. The Political Economy of Intellectual Property Law Conclusion Acknowledgments Index Reviews of this book: Chicago law professor William Landes and his polymath colleague Richard Posner have produced a fascinating new book...[The Economic Structure of Intellectual Property Law] is a broad-ranging analysis of how intellectual property should and does work...Shakespeare's copying from Plutarch, Microsoft's incentives to hide the source code for Windows, and Andy Warhol's right to copyright a Brillo pad box as art are all analyzed, as is the question of the status of the all-bran cereal called 'All-Bran.' --Nicholas Thompson, New York Sun Reviews of this book: Landes and Posner, each widely respected in the intersection of law and economics, investigate the right mix of protection and use of intellectual property (IP)...This volume provides a broad and coherent approach to the economics and law of IP. The economics is important, understandable, and valuable. --R. A. Miller, Choice Intellectual property is the most important public policy issue that most policymakers don't yet get. It is America's most important export, and affects an increasingly wide range of social and economic life. In this extraordinary work, two of America's leading scholars in the law and economics movement test the pretensions of intellectual property law against the rationality of economics. Their conclusions will surprise advocates from both sides of this increasingly contentious debate. Their analysis will help move the debate beyond the simplistic ideas that now tend to dominate. --Lawrence Lessig, Stanford Law School, author of The Future of Ideas: The Fate of the Commons in a Connected World An image from modern mythology depicts the day that Einstein, pondering a blackboard covered with sophisticated calculations, came to the life-defining discovery: Time = \$\$\$. Landes and Posner, in the role of that mythological Einstein, reveal at every turn how perceptions of economic efficiency pervade legal doctrine. This is a fascinating and resourceful book. Every page reveals fresh, provocative, and surprising insights into the forces that shape law. --Pierre N. Leval, Judge, U.S. Court of Appeals, Second Circuit The most important book ever written on intellectual property. --William Patry, former copyright counsel to the U.S. House of Representatives, Judiciary Committee Given the immense and growing importance of intellectual property to modern economies, this book should be welcomed, even devoured, by readers who want to understand how the legal system affects the development, protection, use, and profitability of this peculiar form of property. The book is the first to view the whole landscape of the law of intellectual property from a functionalist (economic) perspective. Its examination of the principles and doctrines of patent law, copyright law, trade secret law, and trademark law is unique in scope, highly accessible, and altogether greatly rewarding. --Steven Shavell, Harvard Law School, author of Foundations of Economic Analysis of Law

New York Times-bestselling author and cultural critic Chuck Klosterman sorts through the past decade and how we got to now. Chuck Klosterman has created an incomparable body of work in books, magazines, newspapers, and on the Web. His writing spans the realms of culture and sports, while also addressing interpersonal issues, social quandaries, and ethical boundaries. Klosterman has written nine previous books, helped found and establish Grantland, served as the New York Times Magazine Ethicist, worked on film and television productions, and contributed profiles and essays to outlets such as GQ, Esquire, Billboard, The A.V. Club, and The Guardian. Chuck Klosterman's tenth book (aka Chuck Klosterman X) collects his most intriguing of those pieces, accompanied by fresh introductions and new footnotes throughout. Klosterman presents many of the articles in their original form, featuring previously unpublished passages and digressions. Subjects include Breaking Bad, Lou Reed, zombies, KISS, Jimmy Page, Stephen Malkmus, steroids, Mountain Dew, Chinese Democracy, The Beatles, Jonathan Franzen, Taylor Swift, Tim Tebow, Kobe Bryant, Usain Bolt, Eddie Van Halen, Charlie Brown, the Cleveland Browns, and many more cultural figures and pop phenomena. This is a tour of the past decade from one of the sharpest and most prolific observers of our unusual times.
