Globalisation and National Identity in History Textbooks iUniverse
The latest volume in the World Yearbook of Education Series explores the relationship between education and the globally prevalent principle of nationalism. This book identifies the diverse ways in which educational policies, discourses, curricula and pedagogy embed and promote the concept of "the nation" both historically and in the age of globalization. By challenging accounts owed to the discourse of "globalization" which conceal the presence of national epistemologies and interests in education, this book offers important insights into the role of education in making nationalism one of the most enduring and yet easily obscured forces of our time. Organized into four sections, this book looks at the following main issues: Historical (re)production of the nation considers how countries consider and reproduce their national identity and how this is built on their history. Hegemonic aspirations and interventions examines how instruction technologies developed during the Cold War have been propagated and disseminated around the world, how the development of educational policy based on the human capital theory emerged, and analyzes the extent to which tech companies are intent on establishing an imperial order of learning. Imperial policies and resurgences of nationalisms explores how global or imperial policies have been indulged in different parts of the world and how new forms of nationalism have been emerging. Paradoxes, inconsistencies, and a self-reflection focuses on nations acting imperially as sites of domestic injustices, addresses unresolved paradoxes between the global and the national and includes a historically informed critical review of the World Yearbooks of Education. Bringing together the voices of researchers from around the globe, The World Yearbook of Education 2022 is ideal reading for anyone interested in learning how nationalism has affected the expansion of education systems and how its imperial aspirations are currently affecting education policy and practice.

The essays in *Web Writing* respond to contemporary debates over the proper role of the Internet in higher education, steering a middle course between polarized attitudes that often dominate the conversation. The authors argue for the wise integration of web tools into what the liberal arts does best: writing across the curriculum. All academic disciplines value clear and compelling prose, whether that prose comes in the shape of a persuasive essay, scientific report, or creative expression. The act of writing visually demonstrates how we think in original and critical ways and in ways that are deeper than those that can be taught or assessed by a computer. Furthermore, learning to write well requires engaged readers who encourage and challenge us to revise our muddled first drafts and craft more

distinctive and informed points of view. Indeed, a new generation of web-based tools for authoring, annotating, editing, and publishing can dramatically enrich the writing process, but doing so requires liberal arts educators to rethink why and how we teach this skill, and to question those who blindly call for embracing or rejecting technology.

Why and How for Liberal Arts Teaching and Learning McFarland

This book explores the changing food culture of the urban American South during the Jim Crow era by examining how race, ethnicity, class, and gender contributed to the development and maintenance of racial segregation in public eating places. Focusing primarily on the 1900s to the 1960s, Angela Jill Cooley identifies the cultural differences between activists who saw public eating places like urban lunch counters as sites of political participation and believed access to such spaces a right of citizenship, and white supremacists who interpreted desegregation as a challenge to property rights and advocated local control over racial issues. Significant legal changes occurred across this period as the federal government sided at first with the white supremacists but later supported the unprecedented progress of the Civil Rights Act of 1964, which—among other things—required desegregation of the nation's restaurants. Because the culture of white supremacy that contributed to racial segregation in public accommodations began in the white southern home, Cooley also explores domestic eating practices in nascent southern cities and reveals how the most private of activities—cooking and dining—became a cause for public concern from the meeting rooms of local women's clubs to the halls of the U.S. Congress.

In writing the Declaration of Independence and the Constitution, our Founding Fathers established a democratic republic with a solid political basis. What they wrote was the political map that future representatives would need to follow to conduct the people's business in an efficient and effective manner. As long as they faithfully carried out the people's will, our democracy and republic would function in a way congruent with our forebears' wishes. What in the world happened? H. John Lyke, a board-certified psychologist and professor emeritus at Metropolitan State College of Denver, and the author of multiple political psychology books, suggests that ever since George Washington retired as captain of our ship of state, subsequent presidents and members of Congress have failed to use the sailing chart of the Constitution. Instead, they've chosen to pursue their own and their political parties' self-interests. Lyke uses psychological principles to explore the reasons why our government has fallen so low, and in the voice of a kind but determined therapist, he offers simple and viable solutions to get us back to following our map.

In the United States, the causes and even the meanings of poverty are disconnected from the causes and meanings of global poverty. The *Routledge Handbook of Poverty in the United States* provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization. Reorienting its national economy towards a global logic, US domestic policies have promoted a market-based strategy of economic development and growth as the obvious solution to alleviating poverty, affecting approaches to the problem discursively, politically, economically, culturally and experientially. However, the handbook explores how rather than alleviating poverty, it has instead exacerbated poverty and pre-existing inequalities – privatizing the services of social welfare and educational institutions, transforming the state from a benevolent to a punitive state, and criminalizing poor women, racial and ethnic minorities, and immigrants. Key issues examined by the international selection of leading scholars in this volume include: income distribution, employment, health, hunger, housing and urbanization. With parts focusing on the lived experience of the poor, social justice and human rights frameworks – as opposed to welfare rights models – and the role of helping professions such as social work, health and education, this comprehensive handbook is a vital reference for anyone working with those in poverty, whether directly or at a macro level.

Taking Northern Ireland as its primary case study, this book applies the burgeoning literature in memory studies to the primary question of transitional justice: how shall societies and individuals reckon with a traumatic past? Joseph Robinson argues that without understanding how memory shapes, moulds, and frames narratives of the past in the minds of communities

and individuals, theorists and practitioners may not be able to fully appreciate the complex, emotive realities of transitional political landscapes. Drawing on interviews with what the author terms "memory curators," coupled with a robust analysis of secondary literature from a range of transitional cases, the book analyses how the bodies of the dead, the injured, and the traumatised are written into - or written out of - transitional justice. The author argues that scholars cannot appreciate the dynamism of transitional memory-space unless they first engage with the often silenced or marginalised voices whose memories remain trapped behind the antagonistic politics of fear and division. Ultimately challenging the imperative of national reconciliation, the author argues for a politics of public memory that incubates at multiple nodes of social production and can facilitate a vibrant, democratic debate over the ways in which a traumatic past can or should be remembered.

Myths, Realities and Critical Engagements Routledge

The partitioning of British India into independent Pakistan and India in August 1947 occurred in the midst of communal holocaust, with Hindus and Sikhs on one side and Muslims on the other. More than 750,000 people were butchered, and 12 million fled their homes—primarily in caravans of bullock-carts—to seek refuge across the new border: it was the largest exodus in history. Sixty-seven years later, it is as if that August never ended. Renowned historian and journalist Dilip Hiro provides a riveting account of the relationship between India and Pakistan, tracing the landmark events that led to the division of the sub-continent and the evolution of the contentious relationship between Hindus and Muslims. To this day, a reasonable resolution to their dispute has proved elusive, and the Line of Control in Kashmir remains the most heavily fortified frontier in the world, with 400,000 soldiers arrayed on either side. Since partition, there have been several acute crises between the neighbors, including the secession of East Pakistan to form an independent Bangladesh in 1971, and the acquisition of nuclear weapons by both sides resulting in a scarcely avoided confrontation in 1999 and again in 2002. Hiro amply demonstrates the geopolitical importance of the India-Pakistan conflict by chronicling their respective ties not only with America and the Soviet Union, but also with China, Israel, and Afghanistan. Hiro weaves these threads into a lucid narrative, enlivened with colorful biographies of leaders, vivid descriptions of wars, sensational assassinations, gross violations of human rights—and cultural signifiers like cricket matches. *The Longest August* is incomparable in its scope and presents the first definitive history of one of the world's longest-running and most intractable conflicts.

In *The Texas Miracle*, author John Marshall offers a detailed examination of the largest political fraud in Texas since the Sharpstown scandal in the early 1970s. An extension of his earlier book, *Playing Possum*, he expands on the information surrounding a massive land deal. Marshall offers a political look at what took place in Texas. In 2006, the Staubach Company advised the Brazos River Authority to begin charging a fair market rate at Possum Kingdom Lake to the people who had built their weekend homes around the shoreline. At that time, the average lake lot was three-quarters of an acre and the average rental rate was \$76 per month. In 2007, Governor Rick Perry, Lt. Governor David Dewhurst, and a handful of Texas legislators attempted to force the Brazos River Authority to sell the shoreline of Possum Kingdom Lake to the wealthy weekenders at a discount. This effort was opposed by Republicans, Democrats, and bureaucrats alike, and it met a humiliating defeat. Two years later, the weekenders and the politicians enlisted the services of the River Card. *The Texas Miracle* tells

that tale.

Three-dimensional stereoviews were wildly popular in the mid-19th century. Yet public infatuation fueled highbrow scorn, and even when they fell from favor, critics retained their disdain. Thus a dazzling body of photographic work has unjustly been buried. This book explores how compelling images were made by carefully combining subject matter, composition, lighting, tonality, blocking and depth. It draws upon the fine arts, the mass media, humanities, history, and even geology. Throughout, overlooked photographers are celebrated, such as the one who found extraordinary visual parallels within nature, anticipating Cézanne and Seurat—or the one who refused to play favorites during a bitter war and found humanity on both sides—or the one who took a favorite American glen and found menace all about. Stereographers were actually more like film directors or television producers than large format photographers: the best ones fused artistry with commercial appeal.

New Zealand has to rebuild the majority of its second-largest city after a devastating series of earthquakes – a unique challenge for a developed country in the twenty-first century. The 2010-2011 earthquakes fundamentally disrupted the conventions by which the people of Christchurch lived. The exhausting and exhilarating mix of distress, uncertainty, creativity, opportunities, divergent opinions and competing priorities generates an inevitable question: how do we know if the right decisions are being made? *Once in a Lifetime: City-building after Disaster in Christchurch* offers the first substantial critique of the Government's recovery plan, presents alternative approaches to city-building and archives a vital and extraordinary time. It features photo and written essays from journalists, economists, designers, academics, politicians, artists, publicans and more. *Once in a Lifetime* presents a range of national and international perspectives on city-building and post-disaster urban recovery.

Applied studies scholarship has triggered a not-so-quiet revolution in the discipline of ethnomusicology. The current generation of applied ethnomusicologists has moved toward participatory action research, involving themselves in musical communities and working directly on their behalf. The essays in *The Oxford Handbook of Applied Ethnomusicology*, edited by Svanibor Pettan and Jeff Todd Titon,

theorize applied ethnomusicology, offer histories, and detail practical examples with the goal of stimulating further development in the field. The essays in the book, all newly commissioned for the volume, reflect scholarship and data gleaned from eleven countries by over twenty contributors. Themes and locations of the research discussed encompass all world continents. The authors present case studies encompassing multiple places; other that discuss circumstances within a geopolitical unit, either near or far. Many of the authors consider marginalized peoples and communities; others argue for participatory action research. All are united in their interest in overarching themes such as conflict, education, archives, and the status of indigenous peoples and immigrants. A volume that at once defines its field, advances it, and even acts as a large-scale applied ethnomusicology project in the way it connects ideas and methodology, *The Oxford Handbook of Applied Ethnomusicology* is a seminal contribution to the study of ethnomusicology, theoretical and applied.

With crucial insights and indispensable information concerning modern-day political upheavals, *Revolutions and Revolutionary Movements* provides a representative cross section of the most significant revolutions of the twentieth and twenty-first centuries. This Fifth Edition is revised and updated with a new chapter on the Arab Revolution from its beginning in December 2010 to the present. In this widely used text, students can trace the historical development of eleven revolutions using a five-factor analytical framework. Author James DeFronzo clearly explains all relevant concepts and events, the roles of key leaders, and the interrelation of each revolutionary movement with international economic and political developments and conflicts, including World Wars I and II, the Cold War, and the War on Terror. Student resources include multiple orienting maps, summary and analysis sections, suggested readings, chronologies, and documentary resources.

Contrary to the view held by many who study American foreign policy, public diplomacy has seldom played a decisive role in the achievement of the country's foreign policy objectives. The reasons for this are not that the policies and interventions are ill-conceived or badly executed, although this is sometimes the case. Rather, the factors that limit the effectiveness of public diplomacy lie almost entirely outside the control of American policy-makers. In particular, the resistance of foreign opinion-leaders to ideas and information about American motives and actions that do not square with their pre-conceived notions of the United States and its activities in the world is an enormous and perhaps insurmountable wall that limits the impact of public diplomacy. This book does not conclude that public diplomacy has no place in the repertoire of American foreign policy. Instead, the expectations held for this soft power tool need to be more realistic. Public diplomacy should not be viewed as a substitute for hard power tools that are more likely to be correlated with actual American influence as opposed to the somewhat nebulous concept of American standing.

Across Africa, a burgeoning middle class has become the poster child for the 'Africa rising' narrative. Ambitious, aspirational and increasingly affluent, this group is said to embody the values and hopes of the new Africa, with international bodies ranging from the United Nations Development Programme to the World Bank regarding them as important agents of both economic development and democratic change. This narrative, however,

obscures the complex and often ambiguous role that this group actually plays in African societies. Bringing together economists, political scientists, anthropologists and development experts, and spanning a variety of case studies from across the continent, this collection provides a much-needed corrective to the received wisdom within development circles, and provides a fresh perspective on social transformations in contemporary Africa.
