In recent years there has

been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate

what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This

scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student 's knowledge and skills. Book Collins

Academic Days of Timișoara: Social Sciences Today is a book of the proceedings of the 3rd International Symposium

“ Social Sciences Today: Between Theory and Practice ” held in Timișoara, Romania, on May 6 – 7, 2011, under the auspices of the Romanian Academy. It will appeal to teachers of social sciences, no matter the level of instruction. The papers it contains deal with economics (economic crisis, communications, and Total Quality Management), education (systems of formal education, process of education, and educational theory), philosophy (education of the future, orthodoxy and nationalism, philosophy of history, Islamic tourism, rites and beliefs, and aesthetics), psychology (family imaginary, self-esteem, stress, personality, behaviour, intelligence, violence, and communication), and sociology (education, communication, social rituals, and non-formal education).

Report Pearson South Africa

This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and

Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

Proceedings

This is the story of a system that failed utterly, at almost every level, and with fatal effect. People died, hundreds of others were made horribly sick, and for days, no one knew what was happening, or why. There were rumours about the water, but the Public Utilities Commission blandly assured callers that the water was okay. Which left investigators trying to figure out if the problem was tainted food

– or something else. Colin Perkel was among the first reporters to visit Walkerton when word finally got out that the water was poisoned. Using the interviews he conducted and the testimony given to the Walkerton Inquiry, Perkel has pieced together an authoritative and riveting account of the tragedy. He tells the story from the point of view of the people who lived through it. He shows how the virtues of a small town – its closeness, loyalty, tradition, and sense of community – contributed to the disaster. He shows how two brothers, Stan and Frank Koebel, were sustained by those virtues despite their own limitations. He provides a day-by-day account of the epidemic itself, the moments of heroism and good sense, and the instances of incompetence, wilful blindness, and plain stupidity. A few heroes do emerge: the pediatrician who was thoughtful and worried enough to raise the alarm; the investigator who worked feverishly through a holiday weekend to find the source of the poison; even perhaps the reporter at the local radio station who broadcast the boil-water advisory. Neither the politicians – at any level – nor the bureaucrats in the Department of Environment and the health ministry come out very well. But Colin Perkel never loses sight of the fact that this story is about real people. And his

account of what happened **Scotland...[without
