The adoption and management of the common

currency has led the Eurozone to a critical point. This book analyzes in an interdisciplinary way the fundamental causes of distress, making sure to relate economic issues to the social and political aspects of the problem. The book explores the reasons why the Eurozone has fallen into a policy trap, as well as what Europe did and should do to exit the crisis, and why this is proving to be so difficult. The book also considers what role the United States has played, and could play to help foster a solution for the Eurozone. The main topics explored are the complex nature of the crisis, the short circuit between policies and the given institutional architecture, the controversial role of Germany, and the importance of an active role of the US. The book brings together a transatlantic group of scholars in order to offer an interdisciplinary analysis of the deep causes of the Eurozone distress. The authors recognize that the Eurozone countries have contrasting situations and interests and face different problems with complex consequences for the vexed question of national sovereignty within the EU; and pay attention to the social and political consequences of the economic and financial distress and of the perceived strain of the common currency.

Knowledge, Class, and Economics: Marxism without Guarantees surveys the "Amherst School" of non-determinist Marxist political economy, 40 years on: its core concepts, intellectual origins, diverse pathways, and enduring tensions. The volume's 30 original essays reflect the range of perspectives and projects that comprise the Amherst School—the

interdisciplinary community of scholars that has enriched and extended, while never ceasing to interrogate and recast, the anti-economistic Marxism first formulated in the mid-1970s by Stephen Resnick, Richard Wolff, and their economics Ph.D. students at the University of Massachusetts-Amherst. The title captures the defining ideas of the Amherst School: an open-system framework that presupposes the complexity and contingency of social-historical events and the parallel "overdetermination" of the relationship between subjects and objects of inquiry, along with a novel conception of class as a process of performing, appropriating, and distributing surplus labor. In a collection of 30 original essays, chapters confront readers with the core concepts of overdetermination and class in the context of economic theory, postcolonial theory, cultural studies, continental philosophy, economic geography, economic anthropology, psychoanalysis, and literary theory/studies. Though Resnick and Wolff's writings serve as a focal point for this collection, their works are ultimately decentered—contested, historicized, reformulated. The topics explored will be of interest to proponents and critics of the post-structuralist/postmodern turn in Marxian theory and to students of economics as social theory across the disciplines (economics, geography, postcolonial studies, cultural studies, anthropology, sociology, political theory, philosophy, and literary studies, among others).

SPECIAL QUESTIONS (FOR GRADE 11, THE AGE OF DEEPENING) The book series is all about education in human sexuality, based on the nourishment and cultivation of the natural gift of a person’s character. The series is based on the premise that SEXUALITY EDUCATION is, basically, CHARACTER EDUCATION, which in turn is founded on human dignity and encompasses formation in moral standards and human conduct; hence, covering the key elements of “life and love, and everything in between”. Comprising an introductory volume for parents and teachers; a volume for classroom use of teachers; a volume for parents; and eight volumes for Grades 5 to 12, respectively, this current volume is specifically addressed to Grade 6 pupils, about 17 to 18 year olds in their late adolescence. It talks about SPECIAL QUESTIONS: on issues concerning life; sex; marriage; and human identity. Since men and women have been gifted with intellect and will, one becomes

highly capable of using well or abusing these powers for the good or damage of self and fellowmen. It is thus extremely important that students at this age have a deep appreciation of the issues confronting the modern world, especially in the realm of sexuality and the channels of its development. The book series is characterized by sound, perennial concepts and by teaching and learning tools geared towards the age group being addressed.

The years of the Ma Ying-jiu presidency in Taiwan were controversial from the beginning. When he came to power in 2008, Ma was considered the strongest and most popular KMT presidential candidate since Lee Teng-hui. However, his rapprochement towards China met with increasing resistance and by the time he stepped down in 2016, he enjoyed the lowest support rates of any incumbent president. What happened in between? This book undertakes a balanced empirical assessment of the achievements and failures of the Ma Ying-jiu era. Renowned Taiwan scholars analyse the changing political environment that

shaped the Ma presidency, covering important topics such as Taiwan's evolving nationalism and rising civil societal activism, cross-strait economic integration and migration, and the factors determining its 'international space'. As the first comprehensive scholarly work on the Ma Ying-jiu presidency, this book is a must read for students and scholars of Taiwanese politics and society, cross-strait relations and East Asian politics in general.

Recognising the different ways that capitalism is theorised, this book explores various aspects of contemporary capitalism in India. Using field

---

research at a local level to engage with larger issues, it raises questions about the varieties and processes of capitalism, and about the different roles played by the state. With its focus on India, the book demonstrates the continuing relevance of the comparative political economy of development for the analysis of contemporary capitalism. Beginning with an exploration of capitalism in agriculture and rural development, it goes on to discuss rural labour, small town entrepreneurs, and technical change and competition in rural and urban manufacturing, highlighting the relationships between agricultural and non-agricultural firms and employment. An analysis of processes of commodification and their interaction with uncommodified areas of the economy makes use of the 'knowledge economy' as a case study. Other chapters look at the political economy of energy as a driver of accumulation in contradiction with both capital and labour, and at how the political economy of policy processes regulating energy highlights the fragmentary nature of the Indian state. Finally, a chapter on the processes and agencies involved in the export of wealth argues that this plays a crucial role in concealing the exploitation of labour in India. Bringing together scholars who have engaged with classical political economy to advance the understanding of contemporary capitalism in South Asia, and distinctive in its use of an interdisciplinary political economy approach, the book will be of interest to students and scholars of South Asian Politics, Political Economy and Development Studies.
