The adoption and  
management of the  
common currency has led  
the Eurozone to a critical  
point. This book analyzes  
in an interdisciplinary  
way the fundamental  
causes of distress,  
making sure to relate  
economic issues to the  
social and political  
aspects of the problem.  
The book explores the

reasons why the Eurozone  
has fallen into a policy  
trap, as well as what  
Europe did and should do  
to exit the crisis, and why  
this is proving to be so  
difficult. The book also  
considers what role the  
United States has played,  
and could play to help  
foster a solution for the  
Eurozone. The main  
topics explored are the  
complex nature of the  
crisis, the short circuit  
between policies and the  
given institutional  
architecture, the  
controversial role of

Germany, and the  
importance of an active  
role of the US. The book  
brings together a  
transatlantic group of  
scholars in order to offer  
an interdisciplinary  
analysis of the deep  
causes of the Eurozone  
distress. The authors  
recognize that the  
Eurozone countries have  
contrasting situations and  
interests and face  
different problems with  
complex consequences  
for the vexed question of  
national sovereignty  
within the EU; and pay

Brothers Prakashan Recognising the different ways that capitalism is theorised, this book explores various aspects of contemporary capitalism in India. Using field research at a local level to engage with larger issues, it raises questions about the varieties and processes of capitalism, and about the different roles played by the state. With its focus on India, the book

---

demonstrates the continuing relevance of the comparative political economy of development for the analysis of contemporary capitalism. Beginning with an exploration of capitalism in agriculture and rural development, it goes on to discuss rural labour, small town entrepreneurs, and technical change and competition in rural and urban manufacturing, highlighting the relationships between agricultural and non-agricultural firms and employment. An analysis of processes of commodification and their interaction with uncommodified areas of the economy makes use of the 'knowledge economy' as a case study. Other chapters look at the political economy of energy as a driver of accumulation in contradiction with both capital and labour, and at how the political economy of policy processes regulating energy highlights the fragmentary nature of the Indian state. Finally, a chapter on the processes and agencies involved in the export of wealth argues that this plays a crucial role in concealing the exploitation of labour in India. Bringing together scholars who have engaged with classical political economy to advance the understanding of contemporary capitalism in South Asia, and distinctive in its use of an interdisciplinary political economy

---

approach, the book will be of interest to students and scholars of South Asian Politics, Political Economy and Development Studies.

The present thoroughly revised and updated edition of Core Economics with Video Lectures is strictly according to the latest syllabus prescribed by the CBSE, New Delhi of Class XII.

As in the previous editions, I have kept the treatment as simple as possible and confined the scope of each topic to the requirement of the syllabus. The treatment has been supplemented by the real life examples and numerical illustrations to enhance the understanding of the subject. This book is an outcome of my interaction with a large number of

teachers in the Orientation Programmes organised by the CBSE and KVS in various parts of India and by School Associations in UAE and Kuwait. I have taken care of the suggestions and observations made by the teachers. My sincere thanks to them. Goyal Brothers Prakashan

SPECIAL QUESTIONS (FOR GRADE 11, THE AGE OF DEEPENING) The book series is all about education in human sexuality, based on the nourishment and cultivation of the natural gift of a person's character. The series is based on the premise that SEXUALITY EDUCATION is, basically, CHARACTER EDUCATION, which in turn is founded on human dignity and

encompasses formation in moral standards and human conduct; hence, covering the key elements of "life and love, and everything in between". Comprising an introductory volume for parents and teachers; a volume for classroom use of teachers; a volume for parents; and eight volumes for Grades 5 to 12, respectively, this current volume is specifically

addressed to Grade 6 pupils, about 17 to 18 year olds in their late adolescence. It talks about SPECIAL QUESTIONS: on issues concerning life; sex; marriage; and human identity. Since men and women have been gifted with intellect and will, one becomes highly capable of using well or abusing these powers for the good or damage of self and fellowmen. It is thus extremely important that

---

students at this age have a deep appreciation of the issues confronting the modern world, especially in the realm of sexuality and the channels of its development. The book series is characterized by sound, perennial concepts and by teaching and learning tools geared towards the age group being addressed.
