STARRING MICHAEL B. JORDAN AND
JAMIE FOXX • A powerful true story about
the potential for mercy to redeem us, and a
clarion call to fix our broken system of
justice—from one of the most brilliant and
influential lawyers of our time. “[Bryan
Stevenson’s] dedication to fighting for justice
and equality has inspired me and many others
and made a lasting impact on our
country.”—John Legend NAMED ONE OF
THE MOST INFLUENTIAL BOOKS OF
THE DECADE BY CNN • Named One of the
Best Books of the Year by The New York
Times • The Washington Post • The Boston
Globe • The Seattle Times • Esquire • Time
Bryan Stevenson was a young lawyer when he
founded the Equal Justice Initiative, a legal
practice dedicated to defending those most
desperate and in need: the poor, the wrongly
condemned, and women and children trapped
in the farthest reaches of our criminal justice
system. One of his first cases was that of
Walter McMillian, a young man who was
sentenced to die for a notorious murder he
insisted he didn’t commit. The case drew
Bryan into a tangle of conspiracy, political
machination, and legal brinkmanship—and
transformed his understanding of mercy and
justice forever. Just Mercy is at once an
unforgettable account of an idealistic, gifted
young lawyer’s coming of age, a moving
window into the lives of those he has
defended, and an inspiring argument for
compassion in the pursuit of true justice.

"The Gift of the Magi" is a short
story by O. Henry first published
in 1905. The story tells of a
young husband and wife and how
they deal with the challenge of
buying secret Christmas gifts for
each other with very little money.
As a sentimental story with a
moral lesson about gift-giving, it
has been popular for adaptation,
especially for presentation at
Christmas time.

Discovered in the attic in which she spent the last
years of her life, Anne Frank’s remarkable diary
has since become a world classic—a powerful
reminder of the horrors of war and an eloquent
testament to the human spirit. “The single most
compelling personal account of the Holocaust ...
remains astonishing and excruciating.” —The
New York Times Book Review In 1942, with
Nazis occupying Holland, a thirteen-year-old
Jewish girl and her family fled their home in
Amsterdam and went into hiding. For the next
two years, until their whereabouts were betrayed
to the Gestapo, they and another family lived
cloistered in the “Secret Annex” of an old
office building. Cut off from the outside world,
they faced hunger, boredom, the constant
cruelties of living in confined quarters, and the
ever-present threat of discovery and death. In
her diary Anne Frank recorded vivid impressions
of her experiences during this period. By turns
thoughtful, moving, and amusing, her account
offers a fascinating commentary on human
courage and frailty and a compelling self-portrait
of a sensitive and spirited young woman whose
promise was tragically cut short.

An accounting study guide with questions, and answers is a helpful tool for anyone that is taking an accounting class. An accounting course book covers topics extensively. With the study guide the person can take the quizzes, and check their answers. The study guide shows which answer is correct. Some study guide books will explain why the other answers is close, but not correct. Once the person takes the quiz on a specific topic. They will find out where their weakness is, and what areas they have to study. The book will help them prepare for class exams, and any professional exams they may take.

Foundations of Analysis is an excellent new text for undergraduate students in real analysis. More than other texts in the subject, it is clear, concise and to the point, without extra bells and whistles. It also has many good exercises that help illustrate the material. My students were very satisfied with it. --Nat Smale, University of Utah I have taught our Foundations of Analysis course (based on Joe Taylor's book) several times recently, and have enjoyed doing so. The book is well-written, clear, and concise, and supplies the students with very good introductory discussions of the various topics, correct and well-thought-out proofs, and appropriate, helpful examples. The end-of-chapter problems supplement the body of the text very well (and range nicely from simple exercises to really challenging problems).

--Robert Brooks, University of Utah An excellent text for students whose future will include contact with mathematical analysis, whatever their discipline might be. It is content-comprehensive and pedagogically sound. There are exercises adequate to guarantee thorough grounding in the basic facts, and problems to initiate thought and gain experience in proofs and counterexamples. Moreover, the text takes the reader near enough to the frontier of analysis at the calculus level that the teacher can challenge the students with questions that are at the ragged edge of research for undergraduate students. I like it a lot. --Don Tucker, University of Utah My students appreciate the concise style of the book and the many helpful examples. --W.M. McGovern, University of Washington Analysis plays a crucial role in the undergraduate curriculum. Building upon the familiar notions of calculus, analysis introduces the depth and rigor characteristic of higher mathematics

courses. Foundations of Analysis has two main goals. The first is to develop in students the mathematical maturity and sophistication they will need as they move through the upper division curriculum. The second is to present a rigorous development of both single and several variable calculus, beginning with a study of the properties of the real number system. The presentation is both thorough and concise, with simple, straightforward explanations. The exercises differ widely in level of abstraction and level of difficulty. They vary from the simple to the quite difficult and from the computational to the theoretical. Each section contains a number of examples designed to illustrate the material in the section and to teach students how to approach the exercises for that section. The list of topics covered is rather standard, although the treatment of some of them is not. The several variable material makes full use of the power of linear algebra, particularly in the treatment of the differential of a function as the best affine approximation to the function at a given point. The text includes a review of several linear algebra topics in preparation for this material. In the final chapter, vector calculus is presented from a modern point of view, using differential forms to give a unified treatment of the major theorems relating derivatives and integrals: Green's, Gauss's, and Stokes's Theorems. At appropriate points, abstract metric spaces, topological spaces, inner product spaces, and normed linear spaces are introduced, but only as asides. That is, the course is grounded in the concrete world of Euclidean space, but the students are made aware that there are more exotic worlds in which the concepts they are learning may be studied. This volume, 16th in a series about service learning and the academic disciplines, focuses on the ways service learning adds immediacy and relevance to the study of history. The authors of this collection

provide answers to why history and service learning should be connected, and they describe strategies to bring this about. The chapters are: (1) "Service-Learning as a Strategy for Advancing the Contemporary University and the Discipline of History" (Bill M. Donovan); (2) "Service-Learning, Academically Based Community Service, and the Historic Mission of the American Urban Research University" (Ira Harkavy); (3) "Emerson's Prophecy" (John Saltmarsh); (4) "Service-Learning and History: Training the Metaphorical Mind" (J. Matthew Gallman); (5) "The Turnerian Frontier: A New Approach to the Study of the American Character" (Michael Zuckerman); (6) "Reflections of a Historian Teaching a Service-Learning Course about Poverty and Homelessness in America" (Albert Camarillo); (7) "History as Public Work" (Elisa von Joeden-Forgey and John Puckett); (8) "Reclaiming the Historical Tradition of Service in the African American Community" (Beverly W. Jones); (9) "Service-Learning as a Tool of Engagement: From Thomas Aquinas to Che Guevara" (Bill M. Donovan); (10) "Serving and Learning in the Chilean Desert" (Marshall C.
