Peterson's Graduate Programs in Business, Education, Information Studies, Law & Social Work 2014 contains comprehensive profiles of more than 11,000 graduate programs in disciplines such as, accounting & finance, business administration & management, education, human resources, international business, law, library & information studies, marketing, social work, transportation management, and more. Up-to-date info, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable data on degree offerings, professional accreditation, jointly offered degrees, part-time & evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. Also find valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Commission on Government Security Springer

China's emergence as the world's second largest economy has been driven by more than four decades of explosive growth. To support this expansion, China has required massive expansion in its steel production capacity, which is highly correlated to its demand for iron ore imports. The scale and pace of China's iron ore demand shock has pushed the global iron ore market into a historical adjustment. Using economic frameworks, this book brings to bare new data and field observations throughout Asia and Africa to investigate how the rapid growth in China's iron ore demand has affected the organisation and structure of the global iron ore market. The research provides several important contributions to the extant literature including analysis of whether the Big Three Asian market iron ore exporters coordinated to sustain the profits arising from the price boom; estimating the financial impact of the Chinese state's intervention in iron price negotiations; and addressing the concerns arising from the Chinese state's provision of cheap financial support for its companies' iron ore procurement. Offering unique insights into China's economic rise and the structure of the iron ore market, this book will be relevant to students and scholars of resource economics, and the Australian and Chinese economies.

The American School Board Journal Wintergreen Orchard House Peterson's Private Secondary Schools is everything parents need to find the right private secondary school for their child. This valuable resource allows students and parents to compare and select from more than 1,500 schools in the U.S. and Canada, and around the world. Schools featured include independent day schools, special needs schools, and boarding schools (including junior boarding schools for middle-school students). Helpful information listed for each of these schools include: school's area of specialization, setting, affiliation, accreditation, tuition, financial aid, student body, faculty, academic programs, social life, admission information, contacts, and more. Also includes helpful articles on the merits of private education, planning a successful school search, searching for private schools online, finding the perfect match, paying for a private education, tips for taking the necessary standardized tests, semester programs and understanding the private schools' admission application form and process.

Monthly Catalogue, United States Public Documents SAGE
In Managing Organizations Stewart Clegg, Cynthia Hardy and Walter Nord explore the major issues and debates in management and organization. The textbook addresses key topics such as

leadership, decision-making and innovation in organizations alongside such themes as diversity, globalization and ecology. Students and teachers of management will find this a comprehensive and wide-ranging resource on the core issues for contemporary managers and organizations.

This book presents more than four decades of research in international business at the Department of Business Studies, Uppsala University. Gradually, this research has been recognized as 'The Uppsala School'. The work in Uppsala over the years reflects a broad palette of issues and approaches.

[Ethical Theory and Corporate Behaviour](#) Peterson's
Online instruction is rapidly expanding the way administrators and educators think about and plan instruction. In addition, due to a pandemic, online instructional practices and learning in a virtual environment are being implemented with very little training or support. Educators are learning new tools and strategies at a quick pace, and often on their own, even through resistance. It is important to explore lessons learned through

the pandemic but also of importance is sharing the virtual classroom options and instruction that align to best practices when transitioning to online instruction. Sharing these will allow educators to understand and learn that virtual instruction can benefit all, even when not used out of need, and can enhance face-to-face courses in many ways. The Handbook of Research on Lessons Learned From Transitioning to Virtual Classrooms During a Pandemic is a critical reference that presents lessons instructors have learned throughout the COVID-19 pandemic including what programs and tools were found to be the most impactful and useful and how to effectively embed virtual teaching into face-to-face teaching. With difficult choices to be made and implemented, this topic and collection of writings demonstrates the learning curve in a state of survival and also lessons and resources learned that will be useful when moving back to face-to-face instruction as a tool to continue to use. Highlighted topics include the frustrations faced during the transition, lessons learned from a variety of viewpoints, resources found and used to support instruction, online learner perspectives and thoughts, online course content, and best practices in transitioning to online instruction. This book is ideal for teachers, principals, school leaders, instructional designers, curriculum developers, higher education professors, pre-service teachers, in-service teachers, practitioners, researchers, and anyone interested in developing more effective virtual and in-classroom teaching methods.
