### Criminology Routledge

This book provides a comprehensive and up-to-date introduction to criminological theory for students taking courses in criminology at both undergraduate and postgraduate level. Building on previous editions, this book presents the latest research and theoretical developments. The text is divided into five parts, the first three of which address ideal type models of criminal behaviour: the rational actor, predestined actor and victimized actor models. Within these, the various criminological theories are located chronologically in the context of one of these different traditions, and the strengths and weaknesses of each theory and model are clearly identified. The fourth part of the book looks closely at more recent attempts to integrate theoretical elements from both within and across models of criminal behaviour, while the fifth part addresses a number of key recent concerns of

criminology: postmodernism, cultural criminology, globalization and communitarianism, the penal society, southern criminology and critical criminology. All major theoretical perspectives are considered, including: classical criminology, biological and psychological positivism, labelling theories, feminist criminology, critical criminology and left realism, situation action, desistance theories, social control theories, the risk society, postmodern condition and terrorism. The new edition also features comprehensive coverage of recent developments in criminology, including ‘ the myth of the crime drop ’ , the revitalization of critical criminology and political economy, shaming and crime, defiance theory, coerced mobility theory and new developments in social control and general strain theories. This revised and expanded fifth edition of *An Introduction to Criminological Theory* includes chapter summaries, critical thinking questions, policy implications, a full glossary of terms and theories and a timeline of

Anarchists were among the earliest modern thinkers to offer a systemic critique of criminal justice and among the first to directly criticize academic criminology while formulating a critical criminology.

They identified the sources of social problems in social structures and relations of inequality and recognized that the institutions preferred by mainstream criminologists as would-be solutions to social problems were actually the causes or enablers of those harms

in the first place. This volume collects critical writings on criminology from radicals and thinkers like William Godwin, Pierre-Joseph Proudhon, Mikhail Bakunin, Peter Kropotkin, Lucy Parsons, Emma Goldman, and many others.

Criminology has experienced tremendous growth over the last few decades, evident, in part, by the widespread popularity and increased enrollment in criminology and criminal justice departments at the undergraduate and graduate levels across the U.S. and internationally. Evolutionary paradigmatic shift has accompanied this surge in definitional, disciplinary and pragmatic terms. Though long identified as a leading sociological specialty area, criminology has emerged as a stand-alone discipline in its own right, one that continues to grow and is clearly here to stay. Criminology, today, remains inherently theoretical but is also far more applied in focus and thus more connected to the academic and practitioner concerns of criminal justice and related professional service fields. Contemporary criminology is also increasingly interdisciplinary and thus features a broad variety of ideological orientations to and perspectives on the causes, effects and responses to crime. 21st Century Criminology: A Reference Handbook provides straightforward and definitive overviews of 100 key topics comprising traditional criminology and its modern outgrowths. The individual chapters have been designed to serve as a "first-look" reference source for most criminological inquires. Both connected to the sociological origins of criminology (i.e., theory and research methods) and the justice systems response to crime and related social problems, as well as coverage of major crime types, this two-volume set offers a comprehensive overview of the current state of criminology. An Introduction to Criminological Theory  
Routledge

Criminology is at a crossroads. In the last two decades it has largely failed to produce the kind of new intellectual frameworks and empirical data that might help us to explain the high levels of crime and interpersonal violence that beset inner city areas and corrode community life. Similarly, it has failed to adequately explain forms of antisocial behaviour that are just as much a part of life in corporate boardrooms as they are in the ghettos of north America and the sink estates

of Britain. Criminology needs to rethink the problem of crime and re-engage its audience with strident theoretical analysis and powerful empirical data. In *New Directions in Crime and Deviancy* some of the world's most talented and polemical critical criminologists come together to offer new ideas and new avenues for analysis. The book contains chapters that address a broad range of issues central to 21st century critical criminology: ecological issues and the new green criminology; the broad impact of neoliberalism upon our cultural and economic life; recent signs of political resistance and opposition; systemic and interpersonal forms of violence; growing fear and enmity in cities; the backlash against the

---

women ' s movement; the subjective pathology of the serial killer; computer hacking and so on. Based on key papers presented at the historic York Deviancy Conferences, this cutting-edge volume also contains important critical essays that address criminological research methods and the production of criminological knowledge. It is key reading material for those with an academic interest in critical, cultural and theoretical criminology, and crime and deviance more generally.
