Routledge

Ethnographies Revisited provides first-hand accounts of how leading qualitative researchers crafted key theoretical concepts found in their major book-length ethnographies. Great ethnographic research lies not in the rigid execution of prescribed methodological procedures, but on the unrelenting cultivation of theoretical ideas.

These contributors focus squarely on this neglected topic, providing reflexive accounts of how research decisions were made in light of emerging theoretical questions. The continuous generation of creative concepts is arguably the most important skill in developing powerful results in field research, since the originality of the ideas produced is how the study is

ultimately judged. Yet, this topic is often taken for granted, treated rigidly and artificially, or is entirely absent from existing qualitative research manuals. In contrast, this volume offers candid insights of how leading ethnographers generated their initial questions, chose their research sites, made theoretical and methodological

adjustments, and oriented their research to maximize the conceptual payoff, leading to such successful research contributions. This provides a fresh approach to the topic of qualitative research, by linking practical decisions in the field to the dynamic features of theory in the making, told through the first-hand experiences of some

of the best ethnographers in our field.

A Monograph Consisting of the Intelligence Sections of the Seven Mental Measurements Yearbooks (1938-72) and Tests in Print II (1974) AFRICAN SUN MeDIA

This title takes a look at the importance of keeping active and eating a balanced diet. It also offers helpful suggestions on how to make healthy lifestyle changes. Features

include an ask the expert section, tips on being healthy, a glossary, additional resources, and an index. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO. Tourism and Hospitality Studies New Africa Books
ÿ On a spectrum of hostility towards irregular migrants, South Africa ranks on top, Germany in the middle and Canada at the bottom. South African xenophobic violence by impoverished slum dwellers is directed against fellow

Africans. Why would a society that liberated itself in the name of human rights turn against people who escaped human rights violations or unlivable conditions at home? What happened to the expected African solidarity? Why do former victims become victimizers? ÿ Imagined Liberation ÿ asks what xenophobic societies can learn from other immigrant societies which avoided the backlash against multiculturalism in Europe. *Study Skills 2* Pearson South Africa
Motivation makes all the difference. And what's more motivating than the expectation of success? The instructions

are clear and to the point, so students can quickly get down to writing practice in these 64-page worktexts. Helpful prompts pack the worktext lesson pages including illustrations, examples, and sample responses. Sample Content: book and movie reviews, travelogue, a character sketch, fashions. *shaping education policy, perceptions, and practice* Highland Park, N.J. : Gryphon Press
A child wanders too far into the Knysna Forest ... he never returns. Nine years later government officials working on a census find a white child living

with a Coloured family in the mountains beyond the forest. They take him away from the stricken Fiela, who has brought him up as her son, and give him back to his 'original' family. Stunned and helpless, Benjamin waits for Fiela to reclaim him. But, powerless against authority, Fiela never comes. Benjamin has to grow up before he can go in search of the truth ...

Florida Educational Leadership Exam Subtest 1-3 Springer Science & Business Media

This book focusses on structural bonding, including many facets, like fundamental aspects of adhesion, science and technology of surfaces, adhesive materials, mechanical properties of bonded

joints, innovative designs and applications, testing and standardization, industrial aspects, quality procedures, environmental and ecological aspects. This first volume of the new series gathers selected contributions of the 6th international conference on structural adhesive bonding AB 2021, held in Porto, Portugal, 8-9 July 2021, represents the latest trends and serves as a reference volume for researchers and graduate students working in this field.

Teachers make a difference. The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those

attracted to the field and their preparation. Yet there are many questions about how teachers are being prepared and how they ought to be prepared. Yet, teacher preparation is often treated as an afterthought in discussions of improving the public education system. Preparing Teachers addresses the issue of teacher preparation with specific attention to reading, mathematics, and science. The book evaluates the characteristics of the candidates who enter teacher preparation programs, the sorts of instruction and experiences teacher candidates receive in

preparation programs, and the extent that the required instruction and experiences are consistent with converging scientific evidence. Preparing Teachers also identifies a need for a data collection model to provide valid and reliable information about the content knowledge, pedagogical competence, and effectiveness of graduates from the various kinds of teacher preparation programs. Federal and state policy makers need reliable, outcomes-based information to make sound decisions, and teacher educators need to know how best to contribute to the

development of effective teachers. Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to ensuring that the same critiques and questions are not being repeated 10 years from now. *Science and Engineering for Grades 6-12 Life Orientation Gr12 L/b* On a spectrum of hostility towards irregular migrants, South Africa ranks on top, Germany in the middle and Canada at the bottom. In this engaging book, Amber Reed provides a new perspective on South Africa's democracy by exploring Black residents' nostalgia for life during apartheid in the rural Eastern Cape. Reed looks at a surprising phenomenon encountered in the post-apartheid nation: despite the Department of Education mandating curricula meant to teach values of civic responsibility and liberal democracy, those who are actually responsible for teaching this material (and the students taking it) often resist what they see as the imposition of "white" values. These teachers and

students do not see South African democracy as a type of freedom, but rather as destructive of their own “African culture”—whereas apartheid, at least ostensibly, allowed for cultural expression in the former rural homelands. In the Eastern Cape, Reed observes, resistance to democracy occurs alongside nostalgia for apartheid among the very citizens who were most disenfranchised by the late racist, authoritarian regime. Examining a rural town in the former Transkei homeland and the urban offices of the Sonke Gender Justice Network in Cape Town, Reed argues that nostalgic memories of a time when African culture was not under attack, combined with the socioeconomic

failures of the post-apartheid state, set the stage for the current political ambivalence in South Africa. Beyond simply being a case study, however, *Nostalgia after Apartheid* shows how, in a global context in which nationalism and authoritarianism continue to rise, the threat posed to democracy in South Africa has far wider implications for thinking about enactments of democracy. *Nostalgia after Apartheid* offers a unique approach to understanding how the attempted post-apartheid reforms have failed rural Black South Africans, and how this failure has led to a nostalgia for the very conditions that once oppressed them. It will interest scholars of African studies,

postcolonial studies, anthropology, and education, as well as general readers interested in South African history and politics. *Femina* New Africa Books There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the

design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How

People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.
