In her book *Teaching to Diversity*, Dr. Jennifer Katz synthesizes the research, and 16 years experience of teaching in inclusive classrooms and schools, to provide answers to several questions: How do I make inclusion work for ALL students? What are the foundational best practices of a truly inclusive learning community? How does one create such a community? The author pulls together, in an organized way, a three-block model of universal design for learning (UDL) and suggests a step-by-step approach for implementing it. This framework includes: Block One, Social and Emotional Learning: details ways to build compassionate learning communities (K-12) in which all students feel safe and valued, and develop a positive self-concept, sense of belonging, and respect for diverse others. Block Two, Inclusive Instructional Practice: includes a framework for planning units from K-12, and explains instructional and management practices for teaching, assessing, grading, and reporting in UDL Classrooms. Block Three, Systems and Structures: suggests strategies for creating inclusive learning communities, and explores ways in which resource teachers, student services personnel, and school administrators can support and create socially and academically inclusive schools and classrooms. The three-block model of UDL can empower educators with the knowledge, skills, and confidence required to teach diverse learners in the same classroom--including those who have previously been excluded. Ultimately, it is about creating classrooms and schools that heal by teaching to the heart, mind, and spirit of every student.

CIR Staff Paper

This Handbook outlines the current state of research in social studies education - a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum.

Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS standards, and topics reflecting an emerging or reemerging field within the social studies. The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.
