Literature and Language Teaching Trinity Rock & Pop 2018

This collection of papers examines the relationship between the teaching of language and the teaching of literature to non-native students. The book attempts to identify key theoretical issues and principles as a basis for further discussion.

[Perspectives, Practices and Possibilities](#) HSRC Press

This collection presents educational assessment research from Latin America, adding to a relatively small but growing body of research considering educational assessment and evaluation issues in this large region. The predominance of Chile reflects its early highly centralized education system, and the fact that it adopted national

testing before other Latin American countries. It was also an early participant in international assessment programmes. Other countries have followed the trend of implementing national testing, and to a lesser extent participating in international surveys. The complementary development of technical expertise in quantitative research methods has enabled extensive analysis of the large data sets generated by these testing and assessment programmes. Taken together, the evidence reported provides a means not only of reviewing educational quality issues in Latin America, but also of facilitating comparisons that allow the context specificity of equivalent research conducted in western developed countries to be considered. The chapters in this book were originally published as a special issue of *Assessment in Education: Principles, Policy and Practice*.

The English Bulletin Trinity Theory Past Papers

Now in its second edition, *How to Read Texts* introduces students to key critical approaches to literary texts and offers a practical introduction for students developing their own critical and close-reading skills.

Written in a lively, jargon-free style, it explains critical concepts, approaches and ideas including: - Debates around critical theory - The role of history and context - The links between creativity and criticism - The relationship between author, reader and text. The new edition now includes guidance on analysing a range of multi-media texts, including film and online media as well as the purely literary. In addition to new practical examples, readings, exercises and 'checkpoints' that help students to build confidence in their own critical readings of both primary and secondary texts, the book now also offers guidance on writing fully-formed critical essays and tips for independent research. Comprehensively updated and revised throughout, *How to Read Texts* is an indispensable guide for students making the transition to university study.

Reflecting on the theoretical and ideological work that has contributed to the growth of mathematics education research in South Africa, this study provides a historical analysis of forces that have changed and shaped mathematics curricula over the years. The themes researched and explored include radical pedagogy, progressive classroom practices, ethnomathematics, and South African mathematics education research within both its local and international contexts.
