In the classroom, knowledge is widely distributed among the students and teacher, but is difficult to share across linguistic and cultural barriers. Seeking paths across these barriers, Lynne Wiltse meticulously explores the question: What is the discourse frame in which students and teachers work? Situated in a grade nine multilingual classroom, her work provides a rich description of the research process in the classroom. At the same time, she draws the reader sequentially through the analysis, revealing inferences in increasing levels of abstraction within a framework of “communities of practice.” She highlights issues related to second language acquisition, students’ immigration experiences, teaching, and learning, and points the way toward multi-vocal dialogues and practices that can forge a path across cultural and linguistic divides.

While attention has been paid to various aspects of music education in China, to date no single publication has systematically addressed the complex interplay of sociopolitical transformations underlying the development of popular music and music education in the multilevel culture of China. Before the implementation of the new curriculum reforms in China at the beginning of the twenty-first century, there was neither Chinese nor Western popular music in textbook materials. Popular culture had long been prohibited in school music education by China’s strong revolutionary orientation, which feared ‘spiritual pollution’ by Western cultures. However, since the early twenty-first century, education reform has attempted to help students deal with experiences in their daily lives and has officially included learning the canon of popular music in the music curriculum. In relation to this topic, this book analyses how social transformation and cultural politics have affected community relations and the transmission of popular music through school music education. Ho presents music and music education as sociopolitical constructions of nationalism and globalization. Moreover, how popular music is received in national and global contexts and how it affects the construction of social and musical meanings in school music education, as well as the reformation of music education in mainland China, is discussed. Based on the perspectives of school music teachers and students, the findings of the empirical studies in this book address the power and potential use of popular music in school music

education as a producer and reproducer of cultural politics in the music curriculum in the mainland.

The editors of this volume highlight the fact that although the Church often stands up for other public issues such as human rights, democratic political rights, economic justice, etc., sexual and gender-based violence do not receive the attention they deserve. There are no theological or cultural arguments that can justify such a position. Sexual and gender-based violence are a scourge that defies our Christian understanding of human dignity ? and challenges the Church in all its formations to respond. ? Although most of the case studies are from Zimbabwe, they challenge us regardless of which country we are living in ? or the tradition of our specific denomination. ? In the context of Southern Africa, where the HIV and AIDS burden is among the highest in the world, sexual and gender-based violence are a major contributor to the spread of the disease. This will only change if the Church challenges this practice as part of its educational and public work ? in theological institutions, in congregations, but also in its pastoral work within families. ?

This book offers insights into the exciting dynamics permeating creative arts education in the Greater China region, focusing on the challenges of forging a future that would not reject, but be enriched by its Confucian and colonial past. Today’s ‘Greater China’ – comprising China, Hong Kong, Macau and Taiwan – has grown into a vibrant and rapidly transforming region characterized by rich historical legacies, enormous dynamism and exciting cultural metamorphosis. Concomitant with the economic rise of China and widespread calls for more ‘creative’ and ‘liberal’ education, the educational and cultural sectors in the region have witnessed significant reforms in recent years. Other factors that will influence the future of arts education are the emergence of a ‘new’ awareness of Chinese cultural values and the uniqueness of being Chinese.

First published in 1990, this investigative overview of the politics of arts’ and cultural funding examines the question of public support for the arts. Looking at both popular commercial forms of culture, including radio, pop music and cinema, and the more traditional highbrow arts such as drama and opera, *Art, Culture and Enterprise* was the first book of its kind to deal systematically with the politics of contemporary culture. Drawing examples from specific British venues, Justin Lewis shows how innovative projects work in practice, and considers arts marketing and the promotion of culture as an economic strategy. A particularly relevant title in the context of the debate surrounding Arts Council funding, this reissue will prove valuable for artists, administrators and students of media and cultural studies, alongside those with a general interest in the future of public art and culture. *Culture, Music Education, and the Chinese Dream in Mainland China* Peterson’s *Introduction to Art: Design, Context, and Meaning* offers a comprehensive introduction to the world of Art. Authored by four USG faculty members with advance degrees in the arts, this textbook offers up-to-date original scholarship. It includes over 400 high-quality images illustrating the history of art, its technical applications, and its many uses. Combining the best elements of both a traditional textbook and a reader, it introduces such issues in art as its meaning and purpose; its meaning and purpose; its structure, material, and form; and its diverse effects on our lives. Its digital nature allows students to follow links to applicable sources and videos, expanding the students’ educational experiences beyond the textbook. *Introduction to Art: Design, Context, and Meaning* provides a new and free alternative to traditional textbooks, making it an invaluable resource in our modern age of technology and advancement.

In today’s multi-ethnic classroom, multiculturalism plays an increasingly vital role. What it is, how it developed, and what it means for education, especially music education, are the questions that form the essence of this book. *Music, Education, and Multiculturalism* traces the growth and development of multicultural music education in the United States from its start in the early 1900s to the present, and describes the state of multicultural music education internationally. Beginning with a discussion of the philosophical foundations surrounding multiculturalism, Part I addresses the various definitions of multiculturalism and its associated problems and possibilities in both education at large and music education in particular. It offers a succinct discussion of the various philosophical concepts and rationales for a multicultural approach, and concludes with current thoughts and applications in music education. Part II follows multicultural music education in the U.S. as it paralleled changes in general education brought about by social and historical events. The last chapter in this section outlines multiculturalism in music education around the world. Part III focuses on the implications of multiculturalism for music education, both in teacher training and in classroom instruction. Designed to assist music educators at all levels in understanding and implementing multicultural education, *Music, Education, and Multiculturalism* provides suggestions for curricular development, offers teaching strategies, and provides practical applications including materials and methodologies. Combining personal narrative and oral history with the support of primary and archival documents, this text is essential reading for all students and teachers of the history and foundations of music education and of multiculturalism in general education.

and well-being? This remarkable book illustrates that embracing a healthy lifestyle is not only beneficial for teachers, but for students, classrooms, and schools, too. It suggests that teachers can reduce the work they do outside the classroom and still be a motivated and engaged teacher. Promoting a healthy work – life balance, the book explores how to avoid burnout while still creating an effective learning community. The conversational tone and a wealth of anecdotes will make this an invaluable guide for every educator.

This book focuses on the rapidly changing sociology of music as manifested in Chinese society and Chinese education. It examines how social changes and cultural politics affect how music is currently being used in connection with the Chinese dream. While there is a growing trend toward incorporating the Chinese dream into school education and higher education, there has been no scholarly discussion to date. The combination of cultural politics, transformed authority relations, and officially approved songs can provide us with an understanding of the official content on the Chinese dream that is conveyed in today ' s Chinese society, and how these factors have influenced the renewal of values-based education and practices in school music education in China.

A student's personal identity constantly changes as part of the lifelong human process to become someone who matters. Art educators in grades K-16 have a singular opportunity to guide important phases of this development. How can educators create a supportive space for young people to work through the personal and cultural factors influencing their journey? Laura Hetrick draws on articles from the archives of Visual Arts Research to approach the question. Juxtaposing the scholarship in new ways, she illuminates methods that allow educators to help students explore identity through artmaking; to reinforce identity in positive ways; and to enhance marginalized identities. A final section offers suggestions on how educators can use each essay to engage with students who are imagining, and reimagining, their identities in the classroom and beyond. Contributors: D.
