IGCSE Mathematics
June 2021 Potential
Papers

HarperCollins UK
This book contains 8 exam practice papers and it is aimed at May/June 2020 IGCSE Mathematics examination for higher level. These papers are written according to the new 9 to 1 syllabus mainly for Edexcel, however they can still be used as practice for other exam boards as well. Each section contains 2 exam

papers labelled as paper 1 & paper 2 similar to the actual exam.

Maths Higher Letts & Lonsdale

This book offers teaching/training professionals an evidence-based pedagogic guide to teaching effectively, efficiently and creatively – also known as Creative Teaching Competence. Firstly it summarizes the extensive research on human psychological functioning relating to learning and how this can be fully utilized in the design and facilitation of quality learning experiences that maximize attainment and engagement opportunities. Secondly, it demonstrates what creativity actually ‘ looks like ’ in terms of specific teaching practices,

modeling the underpinning processes (syntax) of creative learning design. It then establishes Metacognitive Capability as the superordinate twenty-first century competency; in that this unique human attribute can significantly enhance the cognitive and motivational strategies essential for facilitating self-directed learning and wellbeing. The book helps teaching/training professionals to thoughtfully apply evidence-based knowledge and strategies to today ' s challenges, such as developing self-directed learners, enhancing intrinsic motivation, utilizing technology for learning and teaching, developing curricula for twenty-first century competencies and optimally framing and developing the heightened teacher expertise required

today.

The book provides new insights into written corrective feedback by describing students' expectations as well as mediating factors that influence their engagement with it. The book draws on an extensive dataset to illustrate secondary school students' behavioural,

cognitive and emotional engagement with written corrective feedback and the extent to which mediating factors, such as teachers, peers, feedback options, attitudes and emotions, foster or hinder it. It shows why teachers need to provide students with the purpose of the corrective feedback they provide, explain how such feedback works and introduce strategies that can be employed to engage with it. Based on the finding that a combination of several feedback types is essential to ensure learner engagement, the book also provides an extensive description and multiple authentic examples of the Engagement-Feedback Mediator Model that was developed in the context of this study.

This book contains an evidence-based pedagogic guide to enable any motivated teaching/training professional to be able to teach effectively and creatively. It firstly summarises the extensive research field on human psychological functioning relating to learning and how this can be fully utilised in the design and facilitation of quality learning experiences. It then demonstrates what creativity actually 'looks like' in terms of teaching practices, modelling the underpinning processes of creative learning design and how to apply these in lesson planning. The book, having established an evidence-

based and pedagogically driven approach to creative learning design, extensively focuses on key challenges facing teaching professionals today. These include utilising information technologies in blended learning formats, differentiating instruction, and developing self-directed learners who can think well.

The main purpose of the book is to demystify what it means to teach creatively, explicitly demonstrating the principles of good pedagogic design and communication strategies that underpin such activity. The message is clear - creative teaching competence is both a highly useful and a learnable capability.
