Evidence suggests that the first 10 or so years of life create the foundation for subsequent participation in recreational and health-related physical activity. This book brings together researchers and practitioners with expertise in issues related to physical activity, physical education, and sport during the primary/elementary phase of schooling, to explore these important issues. Combining inter-disciplinary perspectives, the book addresses the inherent complexity of researching with young children. It looks at the evidence on development during the first 10 years and how that evidence relates to physical activity and to sport, in pre-school, school and out of school. Finally, the book offers a series of national case studies, from Asia, Europe and Africa, demonstrating the importance of age-appropriate sport and physical activity. This is important reading for any student, researcher, educator or policy maker with an interest in physical activity and health, education in the early years or at primary/elementary level, paediatric exercise science, or youth sport.

From the author of *Shoeless Joe*—the basis for the film *Field of Dreams*—come baseball stories that capture the magic and wonder of the game. No one can write about baseball with the same brilliant combination of mysticism and realism as W. P. Kinsella. Lovers of the game and lovers of fine writing will thrill at the range and depth of the eleven stories that make up this collection. From the magical conspiracy of the title story, to the celestial prediction in “The Last Pennant Before Armageddon,” to the desolation of “The Baseball Spur,” Kinsella explores the world of baseball and makes it, miraculously, a microcosm of the human condition. Praise for W. P. Kinsella’s *The Dixon Cornbelt League and Other Baseball Stories* “[Kinsella] defines a world in which magic and reality combine to make us laugh and think about the perceptions we take for granted.” —The New York Times “His short stories about baseball are wistful things of beauty which serve to remind us how the game should feel—the innate glory of a diamond etched in the minds of Americans.” —Calgary Sun “[Kinsella] uses baseball . . . As a familiar starting place for exploring, with pinpoint control, the human psyche.” —Booklist “Stories that read like lightning and tantalize the reader with fascinating scenarios.” —Publishers Weekly
