For over a century, the works of Edgar Allan Poe have sparked the imaginations and sent shivers up the spines of horror-lovers of all ages. While most people know the story or "The Tell-tale Heart" and "The Black Cat" and many can recite "The Raven" from memory, there are many great stories and

poems by Poe that remain "forgotten lore." This book collects many of the lesser known tales and poems from the great mind of Edgar Allan Poe and combines them with wonderful illustrations from many of today's up-and-coming illustrators: Jason Keith Phillips, Dan Gorman, Tyler Sowles, Joshua Werner, Diana Busby, Jeff Sornig, Darcey Young, Summer Ketchum, and Aaron Trendy.

Since 1986, the National Assessment of Educational Progress (NAEP) has collected information from 11th-grade students about their employment activities. Out of the 29,000 students asked about work in the 1986 assessment, 54% reported working some amount of time each week, and over 28% reported working more than 15 hours per week. Thus, of 2.9 million 11th graders questioned in 1986, an estimated 1.6 million were employed and attending school. Data in this report cover the general characteristics and academic achievement of

working students included in the NAEP as well as ancillary information from other studies. Student characteristics analyzed include gender, race/ethnicity, parents' education, high school program type, mathematics and science courses taken, postsecondary expectations, absenteeism, homework time, and television viewing time. Results indicate that: (1) employment has various effects on student achievement; (2) schools vary in the amount of time and effort they demand from their students, but it appears that some teachers lower their expectations regarding working students; (3) students' jobs should be examined in terms of content compatible with youth development and achievement; and (4) where work assignments are connected to schooling objectives, work can complement, rather than compete with, schooling objectives. Twenty-nine data tables and one graph are included. (TJH)

Don't think about why you're applying. Select a topic for entirely strategic reasons. Choose the coolest supervisor. Write only to deadlines. Expect people to hold your hand. Become "that" student. When it comes to a masters or PhD program, most graduate students don't deliberately set out to fail. Yet, of the nearly 500,000 people who start a graduate program each year, up to half will never complete their degree. Books abound on acing the admissions process, but there is little

on what to do once the acceptance letter arrives. Veteran graduate directors Kevin D. Haggerty and Aaron Doyle have set out to demystify the world of advanced education. Taking a wry, frank approach, they explain the common mistakes that can trip up a new graduate student and lay out practical advice about how to avoid the pitfalls. Along the way they relate stories from their decades of mentorship and even share some slip-ups from their own grad experiences. The litany of foul-ups

is organized by theme and covers the grad school experience from beginning to end: selecting the university and program, interacting with advisors and fellow students, balancing personal and scholarly lives, navigating a thesis, and creating a life after academia. Although the tone is engagingly tongue-in-cheek, the lessons are crucial to anyone attending or contemplating grad school. *57 Ways to Screw Up in Grad School* allows you to learn from

others' mistakes rather than making them yourself.

"This book is lewd, rude and superb! Frank and Stein have written the first guide to grad school from a student's point of view; and the result is an irreverent, humorous and USEFUL book of advice. These foul-mouthed sages will help you get through a master's or doctoral program more

quickly, with fewer blunders and less angst. I plan to recommend this book to all the graduate students I coach and teach." -Mary McKinney, Ph.D. Clinical Psychologist and Dissertation Coach <http://www.successfulacademic.com> Yes, sports fans!, er, grad school fans Bad boys Fred and Karl are back with an updated version of their best selling self-help guide for grad students. This New and/or Improved Version is stocked with additional content, more lame attempts at humor, and a lower price (Karl threatened to moon the publisher unless his demands were met). Written with the attitude of a couple ill-mannered schoolboys who exhibit the insight and genius of the Ph.D.'s who wrote it, Playing the Game simplifies even the most complex

aspects of grad school. Authors Frank and Stein have broken down *Playing The Game* into three hilarious and straightforward sections: *Getting In*, *Getting Through*, and *Getting the Hell Out*. In whatever stage of graduate school you find yourself, rest assured that you will never again grumble, "If only I had known! If only someone had explained this @%#! to me sooner!" *Playing the Game* simplifies the entire graduate school experience while imparting comically relevant stories and translating complicated graduate school jargon. This self-help guide helps grad students to comprehensively navigate their graduate school journey from application to matriculation. Unlike most of the material you'll be reading in grad school,

Playing the Game is actually intelligible. www.playing-the-game.com

Your struggling teenager is going to a residential or wilderness treatment program. Their addictions, learning disabilities, or emotional/behavioral issues have brought you to a moment of decision.

Heartsick, anxious, and exhausted, questions bounce endlessly around your mind, "Will this work? Was this really necessary? Will she ever forgive me? Can we handle him at home when the time comes?" Dr. Tim Thayne delivers the answers in his groundbreaking book *Not by Chance*. As an owner/therapist of wilderness and residential programs, Thayne was frustrated when young people made monumental progress, only to

return home where things quickly unraveled. His mission became to vastly improve long-term success by crafting and proving a model to coach parents on their power to lead out through full engagement during treatment and management of the transition home. Not by Chance engages readers through solid research, simple exercises, and captivating stories taken from Thayne ' s own life and the living rooms of hundreds of American homes. This book serves up concrete tools, hope, confidence, and stamina for families, professionals and mentors. Topics include:

- Why good programs work
- How to boost—not undermine—treatment
- Nine dangers waiting after discharge
- How to identify natural mentors for your teen
 - What to do when the testing begins
 - When and how to grant back privileges and freedoms
 - How to ease your

young adult ' s transition from treatment to independent living

- When you know you ' ve succeeded

If you are even considering out-of-home treatment for your teen, do not gamble with the outcomes. Not by Chance should claim its rightful place on your nightstand.

roiling debate over how to
teach about race and slavery
in classrooms.” —David W.
Blight, Sterling Professor of
American History, Yale
University; author of the
Pulitzer Prize – winning
Frederick Douglass: Prophet
of Freedom Donald

Yacovone shows us the clear
and damning evidence of
white supremacy ' s deep-
seated roots in our nation ' s
educational system through a

fascinating, in-depth examination of America's wide assortment of texts, from primary readers to college textbooks, from popular histories to the most influential academic scholarship. Sifting through a wealth of materials from the colonial era to today, Yacovone reveals the systematic ways in which this ideology has infiltrated all aspects of American culture and how it has been at the heart of our collective national identity. Yacovone lays out the arc of America's white supremacy from the country's inception and Revolutionary War years to its nineteenth-century flashpoint of civil war to the civil rights movement of the 1960s and today's Black Lives Matter. In a stunning reappraisal, the author

argues that it is the North, not the South, that bears the greater responsibility for creating the dominant strain of race theory, which has been inculcated throughout the culture and in school textbooks that restricted and repressed African Americans and other minorities, even as Northerners blamed the South for its legacy of slavery, segregation, and racial injustice. A major assessment of how we got to where we are today, of how white supremacy has suffused every area of American learning, from literature and science to religion, medicine, and law, and why this kind of thinking has so insidiously endured for more than three centuries.
