Your struggling teenager is going to a residential or wilderness treatment program. Their addictions, learning disabilities, or emotional/behavioral issues have brought you to a moment of decision. Heartsick, anxious, and exhausted, questions bounce endlessly around your mind, "Will this work? Was this really necessary? Will she ever forgive me? Can we handle him at home when the time comes?" Dr. Tim Thayne delivers the answers in his groundbreaking book *Not by Chance*. As an owner/therapist of wilderness and residential programs, Thayne was frustrated when young people made monumental progress, only to return home where things quickly unraveled. His mission became to vastly improve long-term success by crafting and proving a model to coach parents on their power to lead out through full engagement during treatment and management of the transition home. *Not by Chance* engages readers through solid research, simple exercises, and captivating stories taken from Thayne's own life and the living rooms of hundreds of American homes. This book serves up concrete tools, hope, confidence, and stamina for families, professionals and mentors. Topics include:

- Why good programs work
- How to boost—not undermine—treatment
- Nine dangers waiting after discharge
- How to identify natural mentors for your teen
- What to do when the testing begins
- When and how to grant back privileges and freedoms
- How to ease your young adult's transition from treatment to independent living
- When you know you've succeeded

If you are even considering out-of-home treatment for your teen, do not gamble with the outcomes. *Not by Chance* should claim its rightful place on your nightstand.

This revision of an important and path-breaking work holds to its central argument that troubled young people can develop self-worth, significance, dignity, and responsibility only through commitment to the positive values of helping and caring for others. An enlarged and revised edition of the authors' pioneering work on building positive youth culture, *Positive Peer Culture* retains the practical orientation that made the original attractive to teachers and youth workers, while adding new material on positive peer culture (PPC) in schools and community settings, research on PPC, and guidelines for maintaining program

effectiveness and quality. Concepts of positive peer culture have been applied in a wide variety of educational and treatment settings including public and alternative schools, group homes, and residential centers. Vorrath and Brendtro describe specific procedures for getting youth "hooked on helping" through peer counseling groups, and for generalizing caring behavior beyond the school or treatment environment through community-based service learning projects. The authors contend that the young people who populate our nation's schools are in desperate need of an antidote to the narcissism, malaise and antisocial life-styles that have become so prevalent, and that this book seeks to provide a way of meeting their increasing cry to be used in some demanding cause. On publication of the first edition, Richard P. Barth, Frank A. Daniels Professor for Human Services Information Policy, School of Social Work, University of North Carolina at Chapel Hill called *Positive Peer Culture* "a significant contribution to the field."

For over a century, the works of Edgar Allan Poe have sparked the imaginations and sent shivers up the spines of horror-lovers of all ages. While most people know the story or "The Tell-tale Heart" and "The Black Cat" and many can recite "The Raven" from memory, there are many great stories and poems by Poe that remain "forgotten lore." This book collects many of the lesser known tales and poems from the great mind of Edgar Allan Poe and combines them with wonderful illustrations from many of today's up-and-coming illustrators: Jason Keith Phillips, Dan Gorman, Tyler Sowles, Joshua Werner, Diana Busby, Jeff Sornig, Darcey Young, Summer Ketchum, and Aaron Trendy.

Though best known for *The Red Badge of Courage*, his classic novel of men at war, in his tragically brief life and career Stephen Crane produced a wealth of stories—among them "The Monster," "The Upturned Face," "The Open Boat," and the title story—that stand among the most acclaimed and enduring in the history of American fiction. This superb volume collects stories of unique power and variety in which impressionistic, hallucinatory, and realistic situations alike are brilliantly conveyed through the cold, sometimes brutal irony of Crane's narrative voice.

Three experts collaborate in this passionate and rewarding dialogue on the legacy of the great American philosopher and educator John Dewey (1859-1952). Focused on growth and the creation of value within the context of real life, Dewey's pragmatic philosophy shares much with humanistic Buddhism. These similarities, which arise throughout the book, add richness to a dialogue already overflowing with faith in our capacity to find common ground and expand human well being in our rapidly globalizing world. For Dewey, individual and social potential alike are unlimited. Readers will come away ready to embrace rather than fear the increasing complexity of our world."

Since 1986, the National Assessment of Educational Progress (NAEP) has collected information from 11th-grade students about their employment activities. Out of the 29,000 students asked about work in the 1986 assessment, 54% reported working some amount of time each week, and over 28% reported working more than 15 hours per week. Thus, of 2.9 million 11th graders questioned in 1986, an estimated 1.6 million were employed and attending school. Data in this report cover the general characteristics and academic achievement of working students included in the NAEP as well as ancillary information from other studies. Student characteristics analyzed include gender, race/ethnicity, parents' education, high school program type,

mathematics and science courses taken, postsecondary expectations, absenteeism, homework time, and television viewing time. Results indicate that: (1) employment has various effects on student achievement; (2) schools vary in the amount of time and effort they demand from their students, but it appears that some teachers lower their expectations regarding working students; (3) students' jobs should be examined in terms of content compatible with youth development and achievement; and (4) where work assignments are connected to schooling objectives, work can complement, rather than compete with, schooling objectives. Twenty-nine data tables and one graph are included. (TJH)
