DK Eyewitness Travel Guide: Japan Peter Lang

Need help figuring out what you can and can't eat on your keto diet? "Low-Carb Queen" Dana Carpender takes the guesswork out of knowing which foods are on or off the table with this handy little guide. This book includes

a comprehensive directory of total fat, carbs, protein, fiber, and calorie amounts for countless types of food—from meat, fruits, and vegetables to popular packaged and restaurant foods. Also included are the best keto/low-carb tips from the Low-Carb Queen herself. This is a perfect quick reference to help you balance your macronutrients for a successful keto/low-carb/intermittent fasting lifestyle. Grab this little book and carry it in your purse, pocket, or briefcase and you'll never struggle to stay keto.

1949 Penguin

This book won the Ohio Professional Writer's, Inc. 2014 Communication Competition Award Now in its second edition, *The Televiewing Audience* is a

user's guide for the only household appliance that doesn't come with one. Watching television seems relatively effortless - it is, after all, a major form of entertainment in the U.S. and overseas - yet this book argues that there is nothing simple about watching television; it is a learned activity which is in a constant state of revision and upgrading. Now more than ever, televiewing requires the generation and application of critical thinking to guide program selection, inform appreciation, generate greater pleasure, and inspire dialogue after consumption. This book

is about becoming a more thoughtful and informed consumer, designed to shatter the anonymity of the viewer, and to create a sense of community, for we rarely think of ourselves as instrumental in the viewing experience or think of the experience as a shared event. Designed for courses related to broadcasting, media effects, media literacy, and audience studies, this book provides a comprehensive overview of the ways in which television influences the way we think about ourselves and our culture. It places us center-stage in the extremely complicated, competitive, creative, and costly endeavor that is television.

The Viewing Audience Fair Winds Press

The global phenomenon of political consumerism is known through such diverse manifestations as corporate boycotts, increased preferences for organic and fairtrade products, and lifestyle choices such as veganism. It has also become an area of increasing research across a variety of disciplines. Political consumerism uses consumer power to change institutional or market practices

that are found ethically, environmentally, or politically objectionable. Through such actions, the goods offered on the consumer market are problematized and politicized. Distinctions between consumers and citizens and between the economy and politics collapse. The Oxford Handbook of Political Consumerism offers the first comprehensive theoretical and comparative overview of the ways in which the market becomes a political arena. It maps the four major forms of political consumerism: boycotting, buycotting (spending to show support), lifestyle politics, and discursive actions, such as culture jamming. Chapters by leading scholars examine political consumerism in different locations and industry sectors, and in consideration of environmental and human rights problems, political events, and the ethics of production and manufacturing practices. This volume offers a thorough exploration of the phenomenon and its myriad dilemmas, involving religion, race, nationalism, gender relations, animals, and our common future. Moreover, the Handbook takes stock of political consumerism's effectiveness in solving complex global problems and its use to both promote and impede democracy.

Publications of the National Institute of Standards and Technology ... Catalog Penguin

This handbook provides an exhaustive description of polyethylene. The 50+ chapters are written by some of the most experienced and prominent authors in the field, providing a truly unique view of polyethylene. The book starts with a historical discussion on how low density polyethylene was discovered and how it provided unique opportunities in the early days. New catalysts are presented and show how they created an expansion in available products including linear low density polyethylene, high density

polyethylene, copolymers, and polyethylene produced from metallocene catalysts. With these different catalyst systems a wide range of structures are possible with an equally wide range of physical properties. Numerous types of additives are presented that include additives for the protection of the resin from the environment and processing, fillers, processing aids, anti-fogging agents, pigments, and flame retardants. Common processing methods including extrusion, blown film, cast film, injection molding, and thermoforming are presented along with some of the more specialized processing techniques such as rotational molding, fiber processing, pipe extrusion, reactive extrusion, wire and cable, and foaming processes. The business of polyethylene including markets, world capacity, and future prospects are detailed. This handbook provides the most current and complete technology assessments and business practices for polyethylene resins.
