This is the second of a three-volume comprehensive reference work on "Gender across Languages", which provides systematic descriptions of various categories of gender (grammatical, lexical, referential, social) in 30 languages of diverse genetic, typological and socio-cultural backgrounds. Among the issues discussed for each language are the following: What are the structural properties of the language that have an impact on the relations between language and gender? What are the consequences for areas such as agreement, pronominalisation and word-formation? How is specification of and abstraction from (referential) gender achieved in a language? Is empirical evidence available for the assumption that masculine/male expressions are interpreted as generics? Can tendencies of variation and change be observed, and have alternatives been proposed for a more equal linguistic treatment of women and men? This volume (and the previous two volumes) will provide the much-needed basis for explicitly comparative analyses of gender across languages. All chapters are original contributions and follow a common general outline developed by the editors. The book contains rich bibliographical and indexical material.Languages of Volume 2: Chinese, Dutch, Finnish, Hindi, Icelandic, Italian, Norwegian, Spanish, Vietnamese, Welsh.

Recent years have seen a revival of interest in morphology. The Yearbook of Morphology series supports and enforces this upswing of morphological research and gives an overview of the current issues and debates at the heart of this revival. The Yearbook of Morphology 1994 focuses on prosodic morphology, i.e. the interaction between morphological and prosodic structure, on the semantics of word formation, and on a number of related issues in the realm of inflection: the structure of paradigms, the relation between inflection and word formation, and patterns of language change with respect to inflection. There is also discussion of the relevance of the notion 'level ordering' for morphological generalizations. All theoretical and historical linguists, morphologists, and phonologists will want to read this book.

This combines the traditional reference grammar with a section on contemporary usage and a third part on vocabulary. Each third concentrates on demystifying areas of common error and confusion for the English speaker and on developing in the user an appreciation of key structures along with a sensitivity to nuance and authentic expression. Part 2 in particular promotes an awareness of register, providing a range of expressions to suit different needs - advising, offering, requesting etc - from the most formal usage to argot and vulgarity. The final word-master section extends productive skills in building on verbs and nouns to extend idiom, using synonyms, avoiding faux amis together with specialist vocabulary for topics such as computer sciences,

banking, literature. All examples are fully translated and realia illustrates particular grammar/usage vocabulary points in practice.
