The GRE—also known by its full name, the Graduate Record Examination—is an important exam for anyone looking to continue their education by enrolling in a graduate school program. As such, the GRE is meant to assess whether the prospective applicant possesses the skills necessary to thrive in a graduate school environment. The

current edition of the GRE splits into three sections:

Quantitative Reasoning, Verbal Reasoning, and Analytical Writing.

The GRE Quantitative section is broken up into Problem Solving questions and Quantitative Comparison (QC) questions. The math section will always begin with either seven or eight QC questions. For each QC question you must

compare two columns, A and B, to determine which one is bigger.
