Charles Dickens' second novel, *Oliver Twist*, or *The Parish Boy's Progress*, was first published as a serial (in monthly instalments) in the magazine *Bentley's Miscellany* from February 1837 to April 1839. The novel was inspired by Robert Blincoe's account of his childhood spent in a cotton mill. *Oliver Twist*, an orphan, is born in a workhouse and later sold off into an apprenticeship. Dickens situates his protagonist amid the squalid lives of beggars, criminals and petty thieves. Trapped in a world of corruption and poverty, Oliver with his

pure heart is rewarded with a fairytale ending. The dark reality of child labour, the effects of industrialisation and the condition of orphans in London in the mid-19th century form the crux of Dickens' heart-rending novel. *Great Expectations* revolves around the life of an orphan nicknamed Pip. The novel, set in the 19th century, traces the psychological growth of Pip in three stages: his childhood in the marshes of Kent, his journey from the rural environs to the London metropolis, and finally his reluctant reconciliation with the vanity of false promises and values. The cast includes the cold yet ethereal Estella, the kind-hearted blacksmith Joe, the 'pale young gentleman' Herbert Pocket and the affluent, eccentric spinster Miss Havisham, among others. George Bernard Shaw said of the novel, 'All of one piece and consistently truthful.'

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development.

Imagine “ smart factories ” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology

empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Written in 1860, at the height of his maturity, it also reveals the novelist' s bittersweet understanding of the extent to which our deepest moral dilemmas are born of our own obsessions and illusions. This edition includes Dickens' s original, discarded conclusion to the novel, the 1907 Everyman preface by G. K. Chesterton, and twenty illustrations by F. W. Pailthorpe.

The Originals: Great Expectations Classic Books Company

In much of his earlier work Roger D. Sell was shaping literary studies, historical perspectives, and pragmatics into a fluent interdisciplinarity. This enabled him to explore the fundamentally human relationships which develop between literary writers and those who respond to them. Literary writers, through their handling of deixis, evaluative and modal expressions, tellability, politeness norms, and genre expectations, activate the same interpersonal function of language as do other language users, and respondents' hermeneutic contextualizations of

literary texts are no less standard as a pragmatic procedure. Not that context is completely determinative. In Sell's account, human beings are profoundly influenced by society, but can sometimes enter into co-adaptations with it. Like other people, literary writers and their respondents are "social individuals", who themselves benefit from respecting each other's relative autonomy. As well as explaining these theoretical positions, the papers selected here offered critical re-assessments of some major writers, including Chaucer and Dickens. They also suggested new ways of dealing with literary texts in literary and language education at all levels.

The Love Hypothesis Currency

Dickens scholar Jerome Meckier's acclaimed *Hidden Rivalries in Victorian Fiction* examined fierce literary competition between leading novelists who tried to establish their credentials as realists by rewriting Dickens's novels. Here, Meckier argues that in *Great Expectations*, Dickens not only updated David Copperfield but also rewrote novels by Lever, Thackeray, Collins, Shelley, and Charlotte and Emily Brontë. He periodically revised his competitors' themes, characters, and incidents to discredit their novels as unrealistic fairy tales imbued with Cinderella motifs. Dickens darkened his fairy tale perspective by replacing Cinderella with the story of Misnar's collapsible pavilion from *The Tales of the Genii* (a popular, pseudo-oriental collection). The Misnar analogue supplied a corrective for the era's Cinderella complex, a warning to both Haves and Have-nots, and a basis for Dickens's tragicomic view of the world.
