with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, *The Daily Show* with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers—including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of *The Daily Show*'s most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics—a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, *The Daily Show* has been a cultural touchstone. Now,

for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

The social sciences in the United Kingdom are extensive, diverse and influential. At any one time, more than four million students study the social sciences in schools; and about a half million students study social science in universities. Total university income from the social sciences is at the four billion dollar level. Beyond that, many social scientists hold key positions in government, business, the media, civil service, and the voluntary sector. Great Expectations reviews the status of the social sciences in Great Britain at the beginning of the twenty-first century. While making clear that work opportunities for social

scientists are substantial and that levels of intellectual performance equal that of graduates in physics, it provides a hard hitting, empirically grounded examination of a near crisis situation. The report goes far beyond what one conventionally expects in commissioned reports, arguing that the academic treadmill, driven by excessive accountability burdens, reduces the originality and quality of much academic research. The report emphasizes the ideological and parochial nature of much British social research. As a result, there is little applicability internationally, even less interdisciplinary work, and at times, an outright bias against the market economy as such. The Commission Report, is even handed, tough minded, and frank in discussing how it is that social science and new social and technical forces do not always mesh. The optimism exuded is measured, but genuine. Great Expectations offers policy recommendations and scientific goals that can be serviceable not only in the United Kingdom, but in all advanced societies in which social research is a central component of economic stability and development. It is a superb reference volume enriched by original analysis and pungent, clear-headed writing. Members of the commission include: Professor David Rhind, Vice Chancellor of the City University served as Chairman of the Commission. Members included Huw Beynon (Cardiff), Patricia Broadbent (Bristol), Vicki Bruce (Edinburgh), Barry Buzzan (LSE), Sue Duncan (Government Researcher), Stuart Etherington (National Council for Voluntary Organizations), Janet Lewis (Oxford), Denise Lievesley (UNESCO), Richard Portes (LBS), Marc Renaud (Research Council of Canada), Michael Tonry (Cambridge), and David Walker (The Guardian).

genetic gifts and limits. And yet the idea of innate limits—of biology as destiny—dies hard, as witness the attention devoted to *The Bell Curve*, whose arguments are here so effectively anticipated and thoroughly undermined by Stephen Jay Gould. In this edition Dr. Gould has written a substantial new introduction telling how and why he wrote the book and tracing the subsequent history of the controversy on innateness right through *The Bell Curve*. Further, he has added five essays on questions of *The Bell Curve* in particular and on race, racism, and biological determinism in general. These additions strengthen the book's claim to be, as Leo J. Kamin of Princeton University has said, "a major contribution toward deflating pseudo-biological 'explanations' of our present social woes."
