Elites in "The Great Gatsby" and "American Psycho". A Comparison of the Illustration of Elites THE GREAT GATSBY The renowned British novelist's "casual and wittily acute guidance" on reading—and writing—great fiction (Harper's). Renowned for such classics as *A Room with a View*, *Howards End*, and *A Passage to India*, E. M. Forster was one of Britain's—and the world's—most distinguished

fiction writers, a frequent nominee for the Nobel Prize in Literature. In this collection of lectures delivered at Trinity College, Cambridge, in 1927, he takes a wide-ranging look at English-language novels—with specific examples from such masters as Dickens and Austen—discussing the elements they all have in common. Using a witty, informal tone and drawing as well on his extensive readings in French and Russian literature, Forster discusses his ideas in reference to such figures as Tolstoy, Dostoevsky, and Proust; explains the difference between “ flat ” and “ round ” characters and between plot and story; and ultimately provides an “ admirable and delightful ” education for anyone who appreciates the art of a good book (The New York Times).

Current research is pushing schools to adopt more student-centered approaches to the classroom experience, and educators—librarians and classroom teachers alike—are being challenged to revise their

curricula and instruction to be student-centered, personalized, and differentiated. This book empowers librarians, teachers, and administrators to be empathic problem-solvers and decision-makers. By reframing the challenges that members of a learning community face as opportunities to better meet teaching and learning needs, readers will find that adoption of a mindset focused on users—namely, design thinking—elevates and creates opportunities for innovating pedagogy. Moreover, it can enhance school culture as well as build channels of communication among various stakeholders in schools and districts. When educators of any subject or discipline apply design thinking skills to their curriculum implementation, authentic student-centered learning experiences become the core of the learning experience. The case studies shared in this book provide examples of student-centered approaches being used in elementary, middle, and high schools, so that readers have many models on which to base

---

their work and from which to build confidence in shifting their pedagogy to keep the student at the center of teaching and learning decisions. Explanations of design thinking models, how they work, and how they apply to teaching and learning Opportunities to practice empathizing with learning community stakeholders and designing to meet those stakeholders' needs Models for writing curricula, units, and lesson plans that are student-centered by design Resources for implementing project-based learning experiences with students Reproducible graphics and organizers for instructional use

Reader's Guide to *The Great Gatsby* BookCaps Study Guides

This book addresses questions that have concerned rhetoricians, literary theorists, and philosophers since the time of the pre-Socratics and the Sophists: How do people come to believe and to act on the basis of communicative experiences? What is the nature of reason and rationality in these experiences? What is the role of values in human decision making and action? How can reason and values be assessed? In answering these questions, Professor Fisher proposes a reconceptualization of humankind as *homo narrans*,

---

that all forms of human communication need to be seen as stories—symbolic interpretations of aspects of the world occurring in time and shaped by history, culture, and character; that individuated forms of discourse should be considered "good reasons"—values or value-laden warrants for believing or acting in certain ways; and that a narrative logic that all humans have natural capacities to employ ought to be conceived of as the logic by which human communication is assessed.

"Monumental... an authoritative and disturbing morality tale."—Chicago Tribune The strongest weapon against pandemic is the truth.

Read why in the definitive account of the 1918 Flu Epidemic. Magisterial in its breadth of perspective and depth of research, *The Great Influenza* provides us with a precise and sobering model as we confront the epidemics looming on our own horizon. As Barry concludes, "The final lesson of 1918, a simple one yet one most difficult to execute, is that...those in authority must retain the public's trust. The way to do that is to distort nothing, to put the best face on nothing, to try to manipulate no one. Lincoln said that first, and best. A leader must make whatever horror exists concrete. Only then will people be able to break it apart." At the height of World War I, history's most lethal influenza virus erupted in an army camp in Kansas, moved east with American troops, then exploded, killing as many as 100 million people worldwide. It killed more people in twenty-four months than AIDS killed in

twenty-four years, more in a year than the Black Death killed in a century. But this was not the Middle Ages, and 1918 marked the first collision of science and epidemic disease.

This master's thesis examines gender and social roles seen in dialogue in the American classic novel, *The Great Gatsby*, by F. Scott Fitzgerald. The researcher conducted a coding and rhetorical analysis to determine if elements of muted group theory were in the novel. Muted group theory was developed by Edwin and Shirley Ardener after their research

indicated that a culture's values and social structure were voiced through rhetoric. The theory states that dominance in certain groups mutes, or silences, others from communicating effectively. Five passages from *The Great Gatsby* were selected for this analysis. These passages highlighted dialogue between the main male and female characters in the book, and were of scholarly importance. The researcher created four research questions from which the study flowed. Results of the study indicated that some groups in *The Great Gatsby* were muted due to their gender, social status, race, or religion. Coding indicated that compliance and manipulation were the most common forms of muted group dominance found in the book. These results are closely linked to the reality of society in the 1920s, when the book was written, as F. Scott Fitzgerald is an author who wrote heavily from his own experiences and surroundings.

help students become more responsive to the ethical themes and questions that emerge from the narratives they study. It helps teachers to integrate character education into the classroom by focusing on a variety of ways of drawing instructive insights from fictional life narratives. The case studies and questions throughout are designed to awaken students' moral imagination and prompt ethical reflection on four protagonists' motivations, aspirations, and choices. The book is divided into two parts. The first provides a theoretical approach while the second features case studies to apply this approach to the study of four literary characters: Sydney Carton from Tale of Two Cities Jay Gatsby from The Great Gatsby Elizabeth Bennet from Pride and Prejudice Janie Crawford from Their Eyes Were Watching God The questions, ideas and approaches used in these case studies can also be applied to protagonists from other narrative works in the curriculum.

Understanding The Great Gatsby Greenwood Publishing Group

Bachelor Thesis from the year 2014 in the subject English Language and Literature Studies - Literature, grade: 2.0, Bielefeld University, language: English, abstract: This paper aims at comparing the illustration of

elites in two different temporal episodes. The novels, which will be the basis for this comparison, are F. Scott Fitzgerald 's The Great Gatsby and Bret Easton Ellis American Psycho. The explanation of the literary choices will be delivered in the next section. Both, F. Scott Fitzgerald and Bret Easton Ellis, have created characters larger than life which partly represent the perversion of the upper classes but both also provide literally, symbolically and figuratively different approaches to escape the problems they are facing. May it be Jay Gatsby or Patrick Bateman; they both feel uncomfortable in their respective environments and strive for something their current life cannot provide. Those desires reflect the bygone and contemporary decoupling of the upper classes lives and thereby comment on society as a whole in their respective temporal context. After explaining what makes those

---

novels predestinated for a comparison, New York as a social and cultural concept and its history will be depicted. Considering that both novels take place in New York and the geographical space clearly has an impact on the progression of the plot but also the mindset of the protagonists, New York needs to be understood first, to then derive sense from the novels taking place there. Afterwards, the term elites will be defined and set into context. After having created a working definition of the term elites, the work on the two novels will start with a temporal contextualization of the novel and the authors' lives. After doing so, the actual illustration of the elites will be analyzed. In a second step, the two novels and their depiction of the upper classes will be compared and contrasted. After identifying both, differences but also uniting factors, the conclusion will pick up the hypothesis from the

beginning and on the basis of that, new questions for further research will be raised. Media and artists had and still have enhanced interest in the life and doings of elites. The reasons for that might be diverse and range from pure voyeurism to complex social criticism. Nonetheless, elites occupy artists' minds ever since and the list of authors who incorporated elites into their plays, stories or novels is long and prestigious. Even until today, the concept of elites has an undeniable impact on both, society and art.
