Hi David, the most common example of C&S is a speculative office building - owner designs and builds the base building, but the use and design of the tenant spaces is not known until tenants sign leases and move in. So the basic purpose of LEED-CS is to certify the building based on what the owner does control without considering tenant spaces.

LEED Green Building Rating System For Core & Shell ...

LEED (Leadership in Energy and Environmental Design) is an internationally recognized green building certification system, providing third-party verification that a building or community was designed and built using strategies aimed at improving performance across all the metrics that matter most: energy savings, water efficiency, CO₂ emissions reduction, improved indoor environmental quality, and stewardship of resources and sensitivity to their impacts.

Green Building Core Concepts / QGBC

Thirty four states, 14 government agencies and 202 localities now include LEED in existing legislation, mostly mandating public buildings to meet Certified or Silver standards. While LEED has increased green building awareness, the system must remain dynamic and willing to adapt criteria to meet federal, state and local needs of the greater population.
