The compelling tale of Rima, a strange, birdlike girl of the jungle, and Abel, the European explorer who falls in love with her. Richly colored narrative, steeped in mystery and romance.

1940 Edition Univ of California Press

This book is DEDICATED TO: The eradication of FEAR in America-as FDR articulated: "nameless, unreasoning, unjustified terror which paralyzes needed efforts to convert retreat into advance." In short, fear is the mother of all cancers on the body politic of America.....i.e., fear is a wall to keep the Mexicans out, and drives our insidious racism.....and the pernicious fear resulting from McCarthyism still hangs like a black cloud over and cripples America to this day, resulting in our Third World healthcare system, and Job Creation--and is the parent of the pervasive hate in America today.....to illustrate: I didn't write the following. It is a cut and paste from FACEBOOK, or some blog [would like to give credit if knew the author]--but it is so on target regarding how "fear" is driving Conservative policy in America today- i.e., is undermining America and our progress-and relegating America to a Third World country status, rather than a world leader-"Conservatives are such

cowards: they are afraid of gay people getting married or serving in the military; they are afraid of bringing terrorists to super max prisons in the US from which no one has ever escaped; they are afraid of the boy scouts letting gay kids in; they are afraid of everyone voting and are constantly suppressing the vote under some bogus voter fraud theory; they are afraid of letting students vote at their universities; they are afraid of women having the right to choose; they even are afraid of women getting contraception [the real issue actually is a women's agency and control over their bodies]; they are afraid of immigration reform leading to citizenship because they are afraid of-- name whatever reason; they are afraid of mandating gun purchasers to undergo background checks for crazy people and terrorists; they are afraid of people smoking pot; they are afraid of climate change being real and contradicting their beloved Bible; they are afraid of legitimate campaign reform; they are afraid of Muslims; they are afraid of blacks; they are afraid of atheists; they are afraid of hippies; they are afraid of socialists; they are probably still afraid of monsters under their beds; they are just rank cowards and keep making things up to be afraid of."

Annie has many unanswered questions! Will she find her one and true love or will she be destined to stay single all her life and do a work for God?

When God Unfolds the Rose Elsevier Masson

Habitat: Human Settlements in an Urban Age discusses the man-made environment and its physical setting, focusing on the urban slums of the world and rural hinterlands that caused the slums. Each chapter of this book deals with a specific issue, and the study of each issue is concluded with three questions—one answerable from the text, a second raising value questions for discussion, and a third extending the study beyond the documentation available in this text. Numerous maps, statistical charts, photographs, and end table of facts and figures are also provided to further assist in the investigation process. Topics elaborated in this text include the rural-urban system; urban frontier; rural stagnation; population; poor and rich; hazards of the environment; energy crisis; shelter for the urban millions; and planning for tomorrow. This publication is intended for secondary and tertiary students, but is also a good reference for individuals researching on the issues of habitat or human settlement.

The London Literary Gazette and Journal of Belles Lettres, Arts, Sciences, Etc Elsevier Health Sciences

Stereotactic body radiation therapy (SBRT) has emerged as an important innovative treatment for various primary and metastatic cancers. This book provides a comprehensive and up-to-date account of the physical/technological, biological, and clinical aspects of SBRT. It will serve as a detailed resource for this rapidly developing treatment modality. The organ sites covered include lung, liver, spine, pancreas, prostate, adrenal,

head and neck, and female reproductive tract. Retrospective studies and prospective clinical trials on SBRT for various organ sites from around the world are examined, and toxicities and normal tissue constraints are discussed. This book features unique insights from world-renowned experts in SBRT from North America, Asia, and Europe. It will be necessary reading for radiation oncologists, radiation oncology residents and fellows, medical physicists, medical physics residents, medical oncologists, surgical oncologists, and cancer scientists.

Bearing Witness ASCD

The uniquely prominent role of French intellectuals in European cultural and political life following World War II is the focus of Tony Judt's newest book. He analyzes this intellectual community's most divisive conflicts: how to respond to the promise and the betrayal of Communism and how to sustain a commitment to radical ideals when confronting the hypocrisy in Stalin's Soviet Union, in the new Eastern European Communist states, and in France itself. Judt shows why this was an all-consuming moral dilemma to a generation of French men and women, how their responses were conditioned by war and occupation, and how post-war political choices have come to sit uneasily on the conscience of later generations of French intellectuals. Judt's analysis extends beyond the writings of fashionable "Existentialist" personalities such as Jean-Paul Sartre, Albert Camus, and Simone de Beauvoir to include a wide intellectual community of Catholic philosophers, non-aligned journalists, literary critics and poets, Communist and non-Communist alike. Judt treats the intellectual dilemmas of the postwar years as an unfinished history. French intellectuals have not fully come to terms with the gnawing sense of what Judt calls the "moral irresponsibility" of those years. The result, he suggests, is a legacy of bad faith and confusion that has damaged France's cultural standing, notably in newly liberated Eastern Europe, and which reflects the nation's larger difficulty in confronting its own ambivalent past.

A Compilation of Manuscript Guidelines from Education Periodicals Elsevier

"As the summary of a vision, the book is brilliant. One can feel the enthusiasm of the authors throughout...I see it as a vehicle for initiating a fruitful dialogue between chemical producers and regulatory enforcers without the confrontation, which often characterizes such interactions." -Martyn Poliakoff, Green Chemistry, February ' Its is an introductory text taking a broad view and intergrating a wide range of topics including synthetic methodologies, alternative solvents and catalysts, biosynthesis and alternative feedstocks. There are exercises for students and the last chapter deals with future trends' Aslib She Believed She Could So She Did Journal - Unlined Blank Paper Harper Collins

Presents a multifaceted model of understanding, which is based on the premise that people can demonstrate understanding in a variety of ways.

An Inspirational Guide to Saving Time and Money Through Better Waste and Resource Management Springer Science & Business Media

North Americans are overwhelmed by the immense environmental problems our world faces yet studies report that 66% would do more if they knew it had a measurable impact. Psychologists have long known that simply performing one small step will aid in defining a positive outlook on life and will inspire further participation from the individual. Trash Talk is about changing people's mind-sets by providing thought-provoking ideas that inspire readers to participate from the ground level in their waste reduction efforts. All the ideas are relatively simple and do

not require any special skills or tools.

For over a century, movies have played an important role in our lives, entertaining us, often provoking conversation and debate. Now, with the rise of digital cinema, audiences often encounter movies outside the theater and even outside the home. Traditional distribution models are challenged by new media entrepreneurs and independent film makers, usergenerated video, film blogs, mashups, downloads, and other expanding networks. Reinventing Cinema examines film culture at the turn of this century, at the precise moment when digital media are altering our historical relationship with the movies. Spanning multiple disciplines, Chuck Tryon addresses the interaction between production, distribution, and reception of films, television, and other new and emerging media. Through close readings of trade publications, DVD extras, public lectures by new media leaders, movie blogs, and YouTube videos, Tryon navigates the shift to digital cinema and examines how it is altering film and popular culture.

World Medical Association Declaration of Helsinki National Academies Press

Prenatal care programs have proven effective in improving birth outcomes and preventing low birthweight. Yet over one-fourth of all pregnant women in the United States do not begin prenatal care in the first 3 months of pregnancy, and for some groups--such as black teenagers--participation in prenatal care is declining. To find out why, the authors studied 30 prenatal care programs and analyzed surveys of mothers who did not seek prenatal care. This new book reports their findings and offers specific recommendations for improving the nation's maternity system and increasing the use of prenatal care programs.

Blue Green Waves Journal Rutgers University Press

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as some of these places move, or go out of business and new business places are started giving added employment to members of our race.

This was one of the 6 science fiction stories published in the first issue (April 1926) of the first magazine devoted to science fiction, Amazing Stories, edited and published by Hugo Gernsback, now considered to be the father of the science fiction genre. He described this story in an inset panel: "In 'Alice in the Looking Glass', the beautiful play of fancy which gave immortal fame to a logician and mathematician, we read of the mysterious change in size of the heroine, the charming little Alice. It tells how she grew large and small according to what she ate. But here we have increase in size pushed to its utmost limit. Here we have treated the growth of a man to cosmic dimensions. And we are told of his strange sensation and are led up to a sudden startling and impressive conclusion, and are taken through the picture of his emotions and despair." American science fiction author, journalist, technical writer, editor (Fortune and Time) and naval seaman during World War II.

Commemorating the 50th anniversary of ACOG's premier journal, Obstetrics & Gynecology, this book chronicles the history of the journal and the landmarks presented in it.

Reconstructive Surgery National Academies Press

Fracking, the practice of shattering underground rock to release oil and natural gas, is a major driver of climate change. The 300,000 fracking facilities in the US also directly harm the health and livelihoods of people in front-line communities, who are disproportionately poor and people of color. Impacted citizens have for years protested that their rights have been ignored. On May 14, 2018, a respected international human-rights court, the Rome-based Permanent Peoples' Tribunal, began a week-long hearing on the impacts of fracking and climate change on human and Earth rights. In its advisory opinion, the Tribunal ruled that fracking systematically violates substantive and procedural human rights; that governments are complicit in the rights violations; and that to protect human rights and the climate, the practice of fracking should be banned. The case makes history. It revokes the social license of extreme-extraction industries by connecting environmental destruction to human-rights violations. It affirms that climate change, and the extraction techniques that fuel it, directly violate deeply and broadly accepted moral norms encoded in the Universal Declaration of Human Rights.

Bearing Witness maps a promising new direction in the ongoing struggle to protect the planet from climate chaos. It tells the story of this landmark case through carefully curated court materials, including searing eye-witness testimony, groundbreaking legal testimony, and the Tribunal's advisory opinion. Essays by leading climate writers such as Winona LaDuke, Robin Wall Kimmerer, and Sandra Steingraber and legal experts such as John Knox, Mary Wood, and Anna Grear give context to the controversy. Framing essays by the editors, experts on climate ethics and human rights, demonstrate that a human-rights focus is a powerful, transformative new tool to address the climate crisis.
