Charles M. Grinstead and J. Laurie Snell ...

[Grinstead-Snell, Introduction to Probability 1] Six women check their hats, and the hats are returned in a random manner. Let E_j be the event that the j th woman gets her own hat back. What is $\Pr(E_j)$? Solution: The sample space Ω has size $6!$ because it is the set of all permutations of the six hats. Suppose $j = 1$.

In the historical remarks for section 6.1, Grinstead and Snell describe Huygen's approach to expected value. The were based on Huygen's book The Value of all Chances in Games of Fortune which can also be found here. Peter reworks Hygen's discussion to show connections with modern ideas such fair markets and hedging.
