Grizzly is a multiphysics simulation code for characterizing the behavior of nuclear power plant (NPP) structures, systems and components (SSCs) subjected to a variety of age-related aging mechanisms. Grizzly simulates both the progression of aging processes, as well as the capacity of aged components to safely perform. This initial beta release of

Grizzly includes capabilities for engineering-scale thermo-mechanical analysis of reactor pressure vessels (RPVs). Grizzly will ultimately include capabilities for a wide range of components and materials. Grizzly is in a state of constant development, and future releases will broaden the capabilities of this code for RPV analysis, as well as expand it to address degradation in other critical NPP components.

Backpacker The Survival Hacker ' s Handbook provides detailed instruction on how to use everyday items to survive in extraordinary

circumstances. Sure, the quirk is here. For instance, learn how to make a fishhook out of a beer can, start a fire with hand sanitizer, or purify water with bleach. But it goes beyond the quirk to identify real solutions for real scenarios—with real items you carry with you. The book includes useful tips and tricks from survival experts, and provides step-by-step instructions, along with short stories of survival situations where these modern survival skills have come into play. The book is organized around basic fundamental concepts of survival: finding food, building shelter, securing water, etc.

The Museum Educator's Manual U of Nebraska Press

The Museum Educator's Manual addresses the role museum educators play in today's museums from an experience-based perspective. Seasoned museum educators author each chapter, emphasizing key programs along with case studies that provide successful examples, and demonstrate a practical foundation for the daily operations of a museum education department, no matter how small. The book covers: volunteer and docent management and training; exhibit development; program and event design and implementation; working with families, seniors, and teens; collaborating with schools and other institutions; and funding. This second edition interweaves technology into every aspect of the manual and includes two entirely new chapters, one on Museums - An Educational Resource for Schools and another on Active Learning in Museums. With invaluable checklists, schedules, organizational charts, program examples, and other how-to documents included throughout, The Museum

Educator's Manual is a 'must have' book for any museum educator.

PREFACE By enrolling in this self-study course, you have demonstrated a desire to improve yourself and the Navy. Remember, however, this self-study course is only one part of the total Navy training program. Practical experience, schools, selected reading, and your desire to succeed are also necessary to successfully round out a fully meaningful training program. COURSE OVERVIEW: In completing this nonresident training course, you will demonstrate a knowledge of the subject matter by correctly answering questions on the following: History and Organization of the Seabees and Laws of War; Special Clothing and Equipment; Service Rifle and Pistol Marksmanship; Combat Maneuvers, Formations, Patrols, and Ambushes; Land Navigation; Evasion, Survival, and Escape;

Individual Protective Measures; Entanglements; Chemical, Biological, and Radiological (CBR) Defense; First Aid and Field Sanitation; Grenades, Land Mines, and Booby Traps; Organic Support Weapons: M203 and Machine Guns; and Organic Support Weapons: 60-mm Mortar and AT4. THE COURSE: This self-study course is organized into subject matter areas, each containing learning objectives to help you determine what you should learn along with text and illustrations to help you understand the information. The subject matter reflects day-to-day requirements and experiences of personnel in the rating or skill area. It also reflects guidance provided by Enlisted Community Managers (ECMs) and other senior personnel, technical references, instructions, etc., and either the occupational or naval standards, which are listed in the Manual of Navy Enlisted Manpower Personnel

Classifications and Occupational Standards, NAVPERS 18068. THE QUESTIONS: The questions that appear in this course are designed to help you understand the material in the text. VALUE: In completing this course, you will improve your military and professional knowledge. Importantly, it can also help you study for the Navy-wide advancement in rate examination. If you are studying and discover a reference in the text to another publication for further information, look it up. CONTENTS - Volume 1: CHAPTER PAGE 1. The appeal of woodturning is simple: with only a few hand tools and a lathe, remarkable results can be quickly achieved, including beautiful bowls, boxes in the round, lamp bases, and furniture parts. And for over 20 years, woodturners have been turning to Richard Raffan for expert advice and inspiration.

Revised and updated to embrace the increase and improvement in turning tools and lathes now on the market, this updated and expanded edition of his 1985 classic covers everything from the lathe -- how it works and how to choose the right model --

to fixings, cutting tools, safety, measuring, centerwork, and more. Raffan also includes a brand new chapter on crafting hollow vessels.
