This new edited volume expands our understanding of the processes by which individuals and groups disengage from terrorism. While there has been a growing awareness of the need to understand and prevent processes of radicalization into terrorism, disengagement and deradicalization from terrorism have long been neglected areas in research on terrorism. This book uses empirical data to explore how and why individuals and groups disengage from terrorism, and what can be done to facilitate it. The work also presents a series of case studies of disengagement programmes, from Colombia, northern Europe, Italy, Yemen, Saudi Arabia, Indonesia, Singapore and Malaysia, comparing and assessing their various strengths and weaknesses. In light of the lessons learned from these cases, this book describes and explains the potential for new developments in counter-terrorism. This book will be of great interest to all students of terrorism studies, war and conflict studies, international security and politics in general, as well as professionals in the field of counter-terrorism.

"Drs. Julius and Jude Austin have written a most informative and engaging guide for students navigating the demands of their academic program and internships. They provide practical wisdom in each chapter and serve as mentors to their readers through their self-disclosure and the lessons they have learned. This book needs to be in the hands of every counseling student, as it offers extremely useful pointers and encouragement to survive and thrive in their program."

—Marianne Schneider Corey, MA, LMFT, NCC —Gerald Corey, EdD, ABPP, NCC Professor Emeritus of Human Services and Counseling California State University, Fullerton "This is a valuable resource for students in graduate-level training in counseling or counselor education and supervision. In addition, it will be a useful update for counselor educators regarding the experiences of contemporary graduate counseling students."

—Richard E. Watts, PhD, LPC-S Sam Houston State University

Written for graduate students who want to get the most out of their experience, this book presents down-to-earth discussions and suggestions on counselor training and life after graduation. The authors, both millennials and recent doctoral program graduates, draw upon their own personal and professional training and career experiences, as well as shared insight from a diverse group of current graduate students, recent graduates, and new professionals. The realistic, personal, and often humorous narratives throughout the book give an insider's perspective on graduate school and illuminate the emotional journey of students and new professionals. Topics include choosing and getting into a program, handling the opportunities and challenges that each year of the program presents, gaining emotional maturity, dealing with setbacks, managing conflicts, increasing cultural awareness, getting a doctoral degree, searching for a job, finding a supervisor, and obtaining licensure. Readers will also be able to peek behind the curtains of faculty meetings to glean what faculty members expect, develop skills for their first session, and create and maintain a self-care plan for improving work-life balance.

Selections from the Book of Psalms John Wiley & Sons

First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom

activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Building on the strengths of the fourth edition, Basic Nursing: Essentials for Practice is back in a new edition! Thoroughly updated and revised to provide a more focused and engaging presentation, this new edition offers the basic

principles, concepts, and skills needed by nursing students. The five-step nursing process returns to provide a consistent, logical organizational framework, with a clear writing style and numerous learning aids. An increased emphasis on caring, along with new boxes on Focused Client Assessment and Outcome Evaluation, reflect current practice trends. This new edition is better than ever! Five-Step Nursing Process provides a consistent organizational framework. More than 40 nursing skills are presented in a clear, 2-column format with rationales for all steps. Procedural Guidelines boxes provide streamlined step-by-step instructions for performing basic skills. Growth and Development chapter and age-related considerations throughout clinical chapters help prepare students to care for clients of all ages. Sample Nursing Care Plans highlight defining characteristics in assessment data, include client goals and expected outcomes in the planning section, and provide rationales for each nursing intervention. Progressive Case Studies follow the interactions of a client and nurse throughout the chapter to illustrate steps in the nursing process and develop critical thinking skills. Brief coverage of higher level concepts including research, theory, professional roles, and management, maintains the text's focus on essential, basic content. The narrative style makes the text more engaging and appealing. Focused Client Assessment boxes provide specific guidelines for factors to assess, questions and approaches, and physical assessment. Content on delegation is discussed throughout the narrative and specific guidelines are included for each skill. Skills now include Unexpected Outcomes and Interventions to alert for potential undesirable responses and provide appropriate nursing actions. Caring in Nursing is presented in a new chapter and as a thread throughout the text. Outcome Evaluation are based on the chapter's case study and provide guidelines on how to ask questions and evaluate care based on the answers received. NIC and NOC are discussed in the Nursing Process chapter to provide an overview of these taxonomies encountered in practice. NCLEX-style multiple-choice questions at the end of each chapter help students evaluate learning.
