NEW YORK TIMES BESTSELLER • A former Galleon Group trader portrays an after-hours Wall Street culture where drugs and sex are rampant and billions in trading commissions flow to those

who dangle the most enticements. A remarkable writing debut, filled with indelible moments, *The Buy Side* shows as no book ever has the rewards—and dizzying temptations—of making a living on the Street. Growing up in the 1980's Turney Duff was your average kid from Kennebunk, Maine, eager to expand his horizons. After trying – and failing – to land a job as a journalist, he secured a trainee position at Morgan Stanley and got his first feel for the pecking order that exists in the trading pits. Those on the “buy side,” the traders who make large bets on whether a stock will rise or fall, are the “alphas” and those on the “sell side,” the brokers who handle their business, are eager to please. How eager to please was brought home stunningly to Turney in 1999 when he arrived at the Galleon Group, a colossal hedge-fund management firm run by secretive founder Raj Rajaratnam. Finally in a position to trade on his own, Turney was encouraged to socialize with the sell side and siphon from his new broker friends as much information as possible. Soon he was not just vacuuming up valuable tips but also being lured into a variety of hedonistic pursuits. Naïve enough to believe he could keep up the lifestyle without paying a price, he managed to keep an eye on his buy-and-sell charts and, meanwhile, pondered the strange goings on at Galleon, where tens of millions were being made each week in sometimes mysterious ways. At his next positions, at Argus Partners and J.L. Berkowitz, Turney climbed to even higher heights – and, as it turned out, plummeted to even lower depths – as, by day, he solidified his reputation one of the Street's most powerful healthcare traders, and by night, he blazed a path through the city's nightclubs, showing off his social genius and

voraciously inhaling any drug that would fill the void he felt inside. A mesmerizingly immersive journey through Wall Street's first millennial decade, and a poignant self portrait by a young man who surely would have destroyed himself were it not for his decision to walk away from a seven-figure annual income, *The Buy Side* is one of the best coming-of-age-on-the-Street books ever written.

The English Teacher's Companion Hodder & Stoughton
"Most of the research on multinationals has focused on companies from developed markets. Research on multinationals from emerging economies is relatively new and most of the attention has been focused on multinationals from Asia. Little research has been done on the internationalization strategies and challenges of Latin American multinationals. This book aims to fill this void. Studying Latin American multinationals will not only provide insights into specific strategies deployed by successful firms but will also identify best practices that can be employed by the next generation multinationals from emerging markets." --Book Jacket.

1871. When Fergus Deagan's wife dies in childbirth, she makes him promise to take their family from Ireland to Western Australia to join his brother Bram, and also to marry again to make sure their children don't miss out on a mother's love. Disowned by her father for becoming pregnant, Cara Payton bears a stillborn baby. She struggles on in deep despair, until a plea to wet-nurse a motherless baby gives her life new purpose. When Fergus proposes marriage, she accepts. She respects him and is happy to stay with the baby she now loves. During the voyage to Australia, she and Fergus draw closer, until her past rears its ugly head and they face a terrible crisis . . . When they finally get to Fremantle, Fergus and Bram, always rivals, struggle to get along. To make matters worse,

Bram has financial problems and there is no railway where Fergus can find engineering work. Can the two brothers solve their problems? And will the newcomers find a way to build a new life? ***** What readers are saying about THE TRADER'S REWARD 'An excellent book, and series, that I couldn't put down. Definitely worth reading' - 5 stars 'A great end to a wonderful series' - 5 stars 'Fantastic reading' - 5 stars 'Brilliant as always' - 5 stars 'I loved this one as much as the rest of the Trader Saga' - 5 stars

This title was first published in 2003. Among the major challenges transition economies are facing is how to cope with globalization. Foreign direct investment (FDI) has proved the most dynamic (defensive and offensive) response, as an integration and network tool, yet outward FDI has so far been overlooked in research. The vitality of outward FDI as an entry mode to the global economy is discussed in this authoritative volume from various angles, beginning with the context of the development strategy and the transition process. The experiences of the Slovene way of internationalization are compared with those of other transition economies. Readers will learn about the size, geographical distribution, trends and sectoral allocation of such outward FDI (OFDI) as well as the major motives, barriers and problems. The book also responds to questions about the extent to which outward FDI is instrumental in development/transition, EU accession and competitiveness strengthening. Based on extensive empirical research and focused case studies, the volume provides valuable lessons for other EU candidate countries and transition economies, while

managerial experiences in entering Central and Eastern European markets offer universal internationalization lessons.

Teachers and teacher educators asked for: the latest research on literacy more information about national standards ways to consider gender in instruction advice for teaching Advanced Placement classes ideas for teaching media literacy and incorporating technology effectively into instruction even more resources for mentoring new teachers analysis of how trends in society, culture, and politics impact teachers and their classrooms. And Jim delivers. He has revamped his introductory chapters on literacy learning to include up-to-the-minute thinking from the field, and he has incorporated lists of key standards and helpful suggestions for reaching them. His practical strategies turn recent findings on literacy and gender into well-designed, research-based instruction, and his ideas help you meet the very different needs of AP students by understanding their goals and providing them with appropriate challenges.

Essentials in Modern HPLC Separations, Second Edition discusses the role of separation in high performance liquid chromatography (HPLC). This new and updated edition systematically presents basic concepts as well as new developments in HPLC. Starting with a description of basic concepts, it provides important guidance for the practical utilization of various HPLC procedures, such as the selection of the HPLC type, proper choice of the chromatographic column, selection of mobile phase and selection of the method of detection, all of which are in correlation with the physico-chemical characteristics of the compounds separated. Every chapter has been carefully reviewed, with several new sections added to bring the book completely up-to-date. Hence, it is a valuable reference for students and professors in chemistry. Provides a thoroughly updated resource, with an entirely new section on Computer-aided Method Development in HPLC and new subsections on miniaturization and automation in HPLC, chemometric aspects of HPLC, green solvent use in HPLC, and more. Includes insights into the chromatographic process to find the optimum solution for analyzing complex samples. Presents a basis for understanding the utilization of modern HPLC for applications, particularly for the analysis of pharmaceutical, biological, food, beverage and environmental samples

The need for a single reference book of recommendations and guidance for tunnel lining design has long been recognised. In partnership with the Institution of Civil Engineers Research and Development fund, The British Tunnelling Society (BTS) considered that the valuable knowledge and experience of its members on tunnel lining design should be made available to the wider international underground construction industry.

Tunnel lining design guide is primarily intended to provide those determining specifications of tunnel linings with a guide to the recommended rules and practices to apply in their design. In addition, it provides practitioners who procure, operate, or maintain tunnels, along with those seeking to acquire data for use in their design, with details of the factors that influence correct design, such as end use, construction practice and environmental influences.

In this edited volume on advances in forensic geotechnical engineering, a number of technical contributions by experts and professionals in this area are included. The work is the outcome of deliberations at various

conferences in the area conducted by Prof. G.L. Sivakumar Babu and Dr. V.V.S. Rao as secretary and Chairman of Technical Committee on Forensic Geotechnical Engineering of International Society for Soil Mechanics and Foundation Engineering (ISSMGE). This volume contains papers on topics such as guidelines, evidence/data collection, distress characterization, use of diagnostic tests (laboratory and field tests), back analysis, failure hypothesis formulation, role of instrumentation and sensor-based technologies, risk analysis, technical shortcomings. This volume will prove useful to researchers and practitioners alike.

Patients can spend many hours in bed or sitting, with little to do. The influence of the immediate environment on their sense of well-being and actual recovery is the subject of this report, based on a case study of two hospitals (one general medicine, the other mental health). The study indicates that the architectural environment can contribute to the treatment of patients and significantly affect their health outcomes.

Amongst the findings are: patients are sensitive and articulate about their architectural environment; patients make better progress in purpose-designed modern buildings than in older ones; better places create an overall improved atmosphere, leading to mental patients being less abusive, and general patients requiring less analgesic medication; most of the features responsible for benefits are generic place-making ones rather than hospital-specific; costs do not appear significantly higher in the new accommodation. The authors suggest that their findings are conservative, given that the wards studied were themselves not ideal in terms of architectural features.
