• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

#1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the

plan he sets out here, it is a goal firmly within our reach.

Dr. Virtue teaches us how to use our sixth sense so we can lay our hearts open to the possibility of healing. Begin a dialogue with the angels and you can achieve, in a practical way, the fulfilling life you want and deserve. In *Divine Prescriptions*, bestselling author Dr. Doreen Virtue illuminates the ways all of us can receive healing messages from God and the guardian angels when we need guidance. The angels will speak to us about health, family, relationships, finances, and careers, and *Divine Prescriptions* proves that fact citing case studies, angel readings, and transcripts from Dr. Virtue's angel therapy sessions. When the problems we face are too complex to be solved by counselors, friends, or even Dear Abby, Dr. Virtue shows us another way—a divine way—to discover answers. *Divine Prescriptions* also explains how and why God and our guardian angels use us as messengers to give advice and consolation to others. She explains how to distinguish between normal conversations and key messages from the angels (who are constantly around us) and provides step-by-step instructions for performing angel readings. Dr. Virtue's universe is benign, the angels around us mean us well, and once we are able to receive their vitally important communications our goals and those of the people we love will become attainable.

Oil and coal have built our civilisation, created our wealth and enriched the lives of billions. Yet their rising costs to our security, economy, health and environment are starting to outweigh their benefits. Moreover, the tipping point where alternatives work better and compete purely on cost is not decades in the future - it is here and now. And that tipping point has become the fulcrum of economic transformation. In *Reinventing Fire*, Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race - not forced by public policy but led by business for long-term advantage. This independent and rigorous account offers market-based solutions integrating transportation, buildings, industry and electricity. It maps pathways for running a 158%-bigger US economy in 2050 but needing no oil, no coal, no nuclear energy, one-third less natural gas and no new inventions. This transition would cost \$5 trillion less than business-as-usual - without counting fossil fuels' huge hidden costs. Whether you care most about profits and jobs, or national security, or environmental stewardship, climate, and health, *Reinventing Fire* makes sense. It's a story of astounding opportunities for creating the new energy era. -- Publisher description.

In this sequel to bestselling *The Visual Miscellaneum*, author David McCandless reveals unexpected—and much needed—positive developments from around the world. David McCandless creates simple, elegant ways to see and understand complex, abstract, and often obscured information important to our lives. A specialist in infographics, McCandless cuts through the noise of data overload, creating visually stunning displays that not only make facts comprehensive, but illuminates their connections and adds context, making information meaningful in beautiful and entertaining way. Designed in David McCandless's signature style. *Beautiful News* focuses on fascinating positive developments at a time when the world has never seemed more dangerous and unpredictable. McCandless draws from philosophy, spirituality, ecology, society, technology, history, science, economics, and pop culture, to reveal positive trends and developments, from the invention of a breakthrough device that uses ocean forces to clean plastic from the world's seas, to a new method of converting donated blood to the crucial "O" negative type that can be used universally. In cutting edge graphs, charts, and illustrations, David McCandless creatively visualizes unexpected and compelling relationships between diverse data sets. Among his surprising findings: almost 250 US cities have remained in the Paris Accord; there are more female CEOs in the world than ever before; a new vaccine has been developed to help protect bees; Zika is disappearing from the Americas. At a time when we are besieged by disturbing events, *Beautiful News* is the antidote to brighten the darkest day—a shot of positivity and good cheer that will lift the spirits and provide sorely needed hope about our world in a way never before seen.

We've all seen bullies in action. Many of us have been the victims. Some of us have been the perpetrator. Thanks to all the attention being focused on bullies and the issues that surround them, most of us are getting the information we need. But if we're raising children in this culture of bullying or if we're part of the village that helps, we also need some effective and user-friendly tools to go up against the bully. We need some very specific and action-oriented strategies to help every child feel welcomed and valued. And that's the reason why Bud Ramey and Bobby Kipper wrote *No BULLIES*.

A decade ago, Tim Flannery's #1 international bestseller, *The Weather Makers*, was one of the first books to break the topic of climate change out into the general conversation. Today, Earth's climate system is fast approaching a crisis. Political leadership has not kept up, and public engagement with the issue of climate change has declined. Opinion is divided between technological optimists and pessimists who feel that catastrophe is inevitable. The publication of this new book is timed for the lead-up to the Climate Change Conference in Paris in December 2015, which aims to achieve a legally binding and universal agreement on climate from all the nations in the world. This book anticipates and will influence the debates. Time is running out, but catastrophe is not inevitable. Around the world people are now living with the consequences of an altered climate—with intensified and more frequent storms, wildfires, droughts and floods. For some it's already a question of survival. Drawing on the latest science, Flannery gives a snapshot of the trouble we are in and more crucially, proposes a new way forward, including rapidly progressing clean technologies and a "third way" of soft geo-engineering. Tim Flannery, with his inimitable style, makes this urgent issue compelling and accessible. This is a must-read for anyone interested in our global future.

Invasion, defection and a last stand to save Earth. Dissident alien commander Arid Ricimer and his human allies, Captain Jim Coalbridge and Lieutenant Commander Griff Leher, are the courageous and very mortal heroes who must face down the forces of a tyrannical star empire. Captain Arid Ricimer, an alien starship commander with integrity and a clever plan, attempts to defect to Earth with his officers and entire spaceship—a vessel that mounts a superweapon of almost unimaginable power. He's pursued by his former fleet, a force that has already devastated Earth once and is poised to wipe humanity from existence forever. In a thriller filled with echoes of *The Hunt for Red October* and cool hard science fiction technology, it's a desperate gambit for the alien captain and for humanity, as well. Yet after years of battling back from the brink of destruction, the U.S. space navy has the war-tested heroes to rise to the challenge, among them attack ship captain Jim Coalbridge and alien analyst, Griff Leher. The players are in motion and the greatest confrontation this sector of the galaxy has ever witnessed is at hand. All depends on the courage of an honorable alien warrior and the intelligence and daring of his human counterparts and would-be compatriots. At the publisher's request, this title is sold without DRM (Digital Rights Management).
