All kinds of dogs have a number of hard-wired traits bred into them. Hounds love to follow their noses, Retrievers love to fetch and Herding dogs love to herd.

With few exceptions, these are pretty harmless activities and don't stand in the way of training. Terriers, however, were bred to hunt and kill vermin independently, digging underground and barking excitedly, almost impervious to pain. Let's see...just a few challenges to overcome in training: strong prey drive, independence, feistiness, digging, barking, the list goes on. In *Terrier-Centric Dog Training*, author Dawn Antoniak-Mitchell takes up the challenge to help terrier owners train their dogs by making sure they understand the instincts bred into terriers and what the most effective training and management techniques are to use when working with a "natural born killer." You can train your terrier, but just don't let him loose off-leash in a park full of squirrels!

Puppies, like human babies, do a lot of learning to do in their early months, especially when it comes to navigating their new environment and adopting good manners. A well-trained dog is a happy dog. A dog that is well behaved can take part in family life and is welcome in more places. For example: A dog that greets politely rather than jumping up will not need to be shut out of the room when visitors arrive. A dog that walks on a loose lead is much more likely to be taken for more walks. A dog that is under control and comes back when called can be let off the lead and enjoys more freedom and exercise. This ensures the

dog has more mental and physical exercise and will be better behaved in other situations. Do you want to know the secrets to train your dog well? Then this book will tell you. Bringing home a puppy is kind of like bringing home a baby, it is a lot of work. It is very important to start the training process as soon as you bring home your new edition to the family.
