How to Be Your Dog's Best Friend Simon and Schuster

Every bad decision I've made in my life has been the result of failing to follow my gut. From career choices to financial decisions, it is not my head that alerts me when I'm making a mistake. Grumbling, churning or just acting flighty, my gut asserts a recognizable opinion. The greater the intestinal objection, the greater I parry with intellectual rationalization. I thought long and hard about whether to take a job in the Defense industry, and then imprudently dismissed the clutching cramps that twisted my insides like a pretzel and accepted a position. I over think and over analyze until I've convinced myself to make what inevitably turns out to be a poor decision. If I can keep my head out of the process and listen to my stomach, I've a shot at doing the right thing. I contacted Guide Dogs for the Blind the next morning. It was easy. I spent the day with a newfound sense of excitement and crawled sober into bed. A warmth filled my chest as visions of a perfectly trained dog heeling at my side punctuated my dreams. I slept through the entire night for the first time in as many nights as I could remember and woke feeling surprisingly optimistic. Something about raising a Guide Dog puppy felt right. That in itself may not have been much, but it was a start. It would be months later before I fully understood how that first decision so dramatically changed my life. I met Gruden at the next meeting. He was an English Labrador, not an American Labrador, with pendulous jowls like an English Mastiff and a square head. When I picked him up, he squirmed against my chest, gave me a head butt and then settled down in my arms. He stared at the other pups beneath him on the ground like he was King Pup, imperious and special, head and tail above the others. He knew that he was different from the American labs, an august breed among the proletariat, and for some reason all the raisers were watching us. He barked once, short and decisive as if issuing a formal proclamation, gave my neck a quick swipe with his tongue, and once more surveyed the entire room with his head held high. Everyone laughed, even Gale, but she nodded at me after I set him down and put a finger to her lips as if thoughtfully considering the interaction. When the meeting ended and we began to exit, Gruden bolted from his raisers, lunged at my pant cuff and clamped his teeth. His raisers had to pry open his jaws to get him loose. It wasn't until a week and a half later that the import of the evening became clear. I was at home, sitting in the backyard before lunch when the phone rang. It was Gale and she had some news for me. Gruden's raisers had decided to discontinue raising him and he was going to be my dog now. Gruden would be my first Guide Dog puppy and the first dog that I'd ever called my own. According to Gale, Gruden had selected me. I called the Topanga Canyon kennel the next morning. Gruden's paper work would be ready the next day. I had a dog crate, borrowed from the club, two stainless steel bowls as recommended in the Guide Dog Puppy Raising Manual, a backyard fully inspected and approved and no real life experience raising a puppy. The next morning, I set off for Topanga Canyon to collect my dog. This book is about all that follows.

BETTY WHITE on EVERY DOG HAS A GIFT: "This book gives us some specific examples of the unique therapy that dogs provide when it is needed most. Enjoy a good read, after which I'm sure you will appreciate your own dog even more." Inspiring stories of dogs who do good. Anyone who has ever had a relationship with a dog will tell you: They want nothing more than to give love and be loved in return. In Every Dog Has a Gift, Rachel McPherson draws on her experience as the founder and executive director of The Good Dog Foundation, the largest animal-assisted therapy organization on the East Coast, to share the amazing stories of dogs that bring hope and healing into our lives. Much has been said about the heroic roles dogs played following September 11th and Hurricane Katrina in providing support and comfort for the families and victims of these terrible tragedies, but the truth is that millions of dogs around the world are heroes every day. These therapy and service dogs (and often quite ordinary, "uncertified" dogs just like your own!) can: *serve as the perfect audience for kids who need help with practicing and improving their reading skills; *hold troubled families together; *provide a calm and centering presence for autistic children, and *help individuals who have lost the ability to walk to more easily navigate the world. Every Dog Has a Gift is a celebration of the gift that each and every dog possesses: the ability to bring the healing power of unconditional love into our lives.

Puppies, like human babies, do a lot of learning to do in their early months, especially when it comes to navigating their new environment and adopting good manners. A well-trained dog is a happy dog. A dog that is well behaved can take part in family life and is welcome in more places. For example: A dog that greets politely rather than jumping up will not need to be shut out of the room when visitors arrive A dog that walks on a loose lead is much more likely to be taken for more walks A dog that is under control and comes back when called can be let off the lead and enjoys more freedom and exercise. This ensures the dog has more mental and physical exercise and will be better behaved in other situations. Do you want to know the secrets to train your dog well? Then this book will tell you. Bringing home a puppy is kind of like bringing home a baby, it is a lot of work. It is very important to start the training process as soon as you bring home your new edition to the family. This book, Puppy Training, is a great read and will provide you with the basic skills to train your new puppy. There will be step-by-step processes that cover hand-feeding; crate and potty training; and basic commands like sit, stay, come, and here. Also about bite inhibition a long with how to avoid or correct typical behavior problems, including jumping, barking, and leash-pulling. Plus: how to insure your dog knows how to behave in a vet's office. Buy this book now.
