and Accles
feed that
was used on
Colt Gatling
Guns.
Shortly
after the
outbreak of
the American
Civil War,
Dr. Richard
J. Gatling
began work
on his most

famous invention. A prototype gun was made late in 1861 and was demonstrated in Indianapolis early in 1862. On November 4, 1862, Dr. Gatling received the first of his 10 patents for the famous gun that etched his name into history forever. The Gatling Gun was sometimes called by Dr. Gatling,

Colt Firearms Company and the United States Patent Office as a battery gun, rotating battery gun, rotating cannon and machine gun. When the "modern" machine gun was made, it was referred to as an automated machine gun. These patent drawings provide a step back in time to view a technically advanced

19th century weapon that changed history.
