This book contains copies of all Dr. Gatling's original Gatling Gun patent and patent drawings from the United States Patent Office. Also included are the patent drawings of the Broadwell Drum Feed, Bruce feed and Accles feed that was used on Colt Gatling Guns. Shortly after the outbreak of the American Civil War, Dr. Richard J. Gatling began work on his most famous invention. A prototype gun was made late in 1861 and was demonstrated in Indianapolis early in 1862. On November 4, 1862, Dr. Gatling received the first of his 10 patents for the famous gun that etched his name into history forever. The Gatling Gun was sometimes called by Dr. Gatling, Colt Firearms Company and the United States Patent Office as a battery gun, rotating battery gun, rotating cannon and machine gun. When the "modern" machine gun was made, it was referred to as an automated machine gun. These patent drawings provide a step back in time to view a technically advanced 19th century weapon that changed history.

Believe it or not, having the skill to pick locks may be the one thing that saves you when faced with a life or death situation. Most people think of survival as an apocalyptic situation that adversely affects the entire planet and all the people on it. Very few people realize that each day on this planet incorporates a struggle to survive. Survival can encompass any number of situations. Going to a concert, a public venue, or just walking down a crowded city street, can result in facing a deadly situation. Amidst the chaos of such an event, there will likely be opportunities to seek the safety of a shelter, although it may be hidden behind a locked door. This guide book details the step by step process of picking a variety of different locks and locking mechanisms. This skill set is not only a survival skill, it is a real world skill that could come in handy for a number of situations, such as locking the keys in the car, losing the house key, etc. To Your Safety & Security, Tristan Trubble
