Wound Care John Wiley & Sons

This open access book aims to provide a comprehensive but practical overview of the knowledge required for the assessment and management of the older adult with or at risk of fragility fracture. It considers this from the perspectives of all of the settings in which this group of patients receive nursing care. Globally, a fragility fracture is estimated to occur every 3 seconds. This amounts to 25 000 fractures per day or 9 million per year. The financial costs are reported to be: 32 billion EUR per year in Europe and 20 billion USD in the United States. As the population of China ages, the cost of hip fracture care there is likely to reach 1.25 billion USD by 2020 and 265 billion by 2050 (International Osteoporosis Foundation 2016). Consequently, the need for nursing for patients with fragility fracture across the world is immense. Fragility fracture is one of the foremost challenges for health care providers, and the impact of each one of those expected

9 million hip fractures is significant pain, disability, reduced quality of life, loss of independence and decreased life expectancy. There is a need for coordinated, multi-disciplinary models of care for secondary fracture prevention based on the increasing evidence that such models make a difference. There is also a need to promote and facilitate high quality, evidence-based effective care to those who suffer a fragility fracture with a focus on the best outcomes for recovery, rehabilitation and secondary prevention of further fracture. The care community has to understand better the experience of fragility fracture from the perspective of the patient so that direct improvements in care can be based on the perspectives of the users. This book supports these needs by providing a comprehensive approach to nursing practice in fragility fracture care. Gentell Wound Advisor Elsevier Health Sciences

Written by renowned wound care experts Sharon Baranoski and Elizabeth Ayello, in collaboration with an interdisciplinary team of experts, this handbook covers all aspects of wound assessment, treatment, and care.

Denials" today!

Chronic Wound Care Lippincott Williams & Wilkins

Pressure ulcers are now a universally recognized quality indicator and demand renewed attention by all clinicians. Initiatives by the Centers for Medicare and Medicaid Services (CMS) place emphasis on timely and accurate wound documentation. These policies include reimbursement guidelines for hospitals and revised surveyor guidelines for nursing homes, as well as other care settings. The interdisciplinary nature of wound care requires all levels of staff to be aware of pressure ulcer assessment across the health care continuum. This guide was developed as a basic reference tool for clinicians caring for patients who are at risk for or who have pressure ulcers. Illustrations depict typical examples encountered in clinical practice. Although the 2009 National Pressure Ulcer Advisory Panel (NPUAP), European Pressure Ulcer Advisory Panel (EPUAP) system now uses the term "category" rather than "stage," we have chosen to use "stage" for compliance with CMS terminology. This resource is designed to assist in wound identification and documentation and is not intended as a treatment guide.

Document Smart Lippincott Williams & Wilkins

This textbook provides the best diagnostic and management information for chronic wound care in conjunction with evidence-based clinical pathways illustrated by case studies and more than 350 pictures in addition to up-to-date information for the challenging chronic wound care problems in an easy-to-understand format.

Product Guide to Skin & Wound Care

Lippincott Williams & Wilkins

Written by expert clinicians, Core Curriculum Wound Management, 2nd Edition is one of the few nursing texts to offer the basic pathology, physiology and current clinical skills required for high-level wound care. This is essential content for those seeking WOC certification, including nursing students in wound care programs; nurses involved in wound care; nurses in gastroenterology, urology, and surgical nursing; graduate nursing students and nursing faculty.

Essentials for Wound Care Nursing

Lippincott Williams & Wilkins

"Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb,
