Paramilitarism Edward Elgar Publishing

NEW YORK TIMES BESTSELLER • The first definitive history of the Mossad, Shin Bet, and the IDF’s targeted killing programs, hailed by The New York Times as “an exceptional work, a humane book about an incendiary subject.” WINNER OF THE NATIONAL JEWISH BOOK AWARD IN HISTORY NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY JENNIFER SZALAI, THE NEW YORK TIMES NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Economist • The New York Times Book Review • BBC History Magazine • Mother Jones • Kirkus Reviews The Talmud says: “If someone comes to kill you, rise up and kill him first.” This instinct to take every measure, even the most aggressive, to defend the Jewish people is hardwired into Israel’s DNA. From the very beginning of its statehood in 1948, protecting the nation from harm has been the responsibility of its intelligence community and armed services, and there is one weapon in their vast arsenal that they have relied upon to thwart the most serious threats: Targeted assassinations have been used countless times, on enemies large and small, sometimes in response to attacks against the Israeli people and sometimes preemptively. In this page-turning, eye-opening book, journalist and military analyst Ronen Bergman—praised by David Remnick as “arguably [Israel’s] best investigative reporter”—offers a riveting inside account of the targeted killing programs: their successes, their failures, and the moral and political price exacted on the men and women who approved and carried out the missions. Bergman has gained the exceedingly rare cooperation of many current and former members of the Israeli government, including Prime Ministers Shimon Peres, Ehud Barak, Ariel Sharon, and Benjamin Netanyahu, as well as high-level figures in the country’s military and intelligence services: the IDF (Israel Defense Forces), the Mossad (the world’s most feared intelligence agency), Caesarea (a “Mossad within the Mossad” that carries out attacks on the highest-value targets), and the Shin Bet (an internal security service that implemented the largest targeted assassination campaign ever, in order to stop what had once appeared to be unstoppable: suicide terrorism). Including never-before-reported, behind-the-curtain accounts of key operations, and based on hundreds of on-the-record interviews and thousands of files to which Bergman has gotten exclusive access over his decades of reporting, Rise and Kill First brings us deep into the heart of Israel’s most secret activities. Bergman traces, from statehood to the present, the gripping events and thorny ethical questions underlying Israel’s targeted killing campaign, which has shaped the Israeli nation, the Middle East, and the entire world. “A remarkable feat of fearless and responsible reporting . . . important, timely, and informative.”—John le Carré

Every company has a personality. Does yours help or hinder your results? Does it make you fit for growth? Find out by taking the quiz that ’ s helped 50,000 people better understand their organizations at OrgDNA.com and to learn more about Organizational DNA. Just as you can understand an individual ’ s personality, so too can you understand a company ’ s type—what makes it tick, what ’ s good and

bad about it. Results explains why some organizations bob and weave and roll with the punches to consistently deliver on commitments and produce great results, while others can ’ t leave their corner of the ring without tripping on their own shoelaces. Gary Neilson and Bruce Pasternack help you identify which of the seven company types you work for—and how to keep what ’ s good and fix what ’ s wrong. You ’ ll feel the shock of recognition (“ That ’ s me, that ’ s my company ”) as you find out whether your organization is:

- Passive-Aggressive (“ everyone agrees, smiles, and nods, but nothing changes ”): entrenched underground resistance makes getting anything done like trying to nail Jell-O to the wall
- Fits-and-Starts (“ let 1,000 flowers bloom ”): filled with smart people pulling in different directions
- Outgrown (“ the good old days meet a brave new world ”): reacts slowly to market developments, since it ’ s too hard to run new ideas up the flagpole
- Overmanaged (“ we ’ re from corporate and we ’ re here to help ”): more reporting than working, as managers check on their subordinates ’ work so they can in turn report to their bosses
- Just-in-Time (“ succeeding, but by the skin of our teeth ”): can turn on a dime and create real breakthroughs but also tends to burn out its best and brightest
- Military Precision (“ flying in formation ”): executes brilliant strategies but usually does not deal well with events not in the playbook
- Resilient (“ as good as it gets ”): flexible, forward-looking, and fun; bounces back when it hits a bump in the road and never, ever rests on its laurels

For anyone who ’ s ever said, “ Wow, that ’ s a great idea, but it ’ ll never happen here ” or “ Whew, we pulled it off again, but I ’ m tired of all this sprinting, ” Results provides robust, practical ideas for becoming and remaining a resilient business. Also available as an eBook From the Hardcover edition.

May 1991. The location: a quiet, picturesque seaside town. The scene: two bodies in a car filled with carbon monoxide. Police officer Trevor Buchanan and nurse Lesley Howell have apparently taken their own lives, unable to live with the pain of their spouses' affair with each other. The adulterous pair – Sunday school teacher Hazel Buchanan and dentist Colin Howell – had met in the local Baptist Church. Following the apparent double–suicide, they continue their affair secretly before both later remarrying. A series of disasters in Howell's life – the death of his eldest son, massive losses in an investment scam and the revelation that he has been sexually assaulting female patients – lead to him declaring that he is a fraud and a godless man. He tells the elders of his Church that he and Hazel Stewart conspired together to murder their spouses nearly two decades earlier. What follows the dramatic confession are two of the most sensational murder investigations ever seen in Ireland, leading to both Howell's conviction for murder in December 2010,

and Stewart's in March 2011 – despite her protestations of innocence.

The Periodic Table of Elements - Halogens, Noble Gases and Lanthanides and Actinides | Children's Chemistry Book Gill & Macmillan Ltd

In this new book, Bauman examines how we have moved away from a 'heavy' and 'solid', hardware-focused modernity to a 'light' and 'liquid', software-based modernity. This passage, he argues, has brought profound change to all aspects of the human condition. The new remoteness and un-reachability of global systemic structure coupled with the unstructured and under-defined, fluid state of the immediate setting of life-politics and human togetherness, call for the rethinking of the concepts and cognitive frames used to narrate human individual experience and their joint history. This book is dedicated to this task. Bauman selects five of the basic concepts which have served to make sense of shared human life - emancipation, individuality, time/space, work and community - and traces their successive incarnations and changes of meaning. Liquid Modernity concludes the analysis undertaken in Bauman's two previous books Globalization: The Human Consequences and In Search of Politics. Together these volumes form a brilliant analysis of the changing conditions of social and political life by one of the most original thinkers writing today.

Let This Be Our Secret Haynes Manuals

Risk management and contingency planning has really come to the fore since the first edition of this book was originally published. Computer failure, fire, fraud, robbery, accident, environmental damage, new regulations - business is constantly under threat. But how do you determine which are the most important dangers for your business? What can you do to lessen the chances of their happening - and minimize the impact if they do happen? In this comprehensive volume Kit Sadgrove shows how you can identify - and control - the relevant threats and ensure that your company will survive. He begins by asking 'What is risk?', 'How do we assess it?' and 'How can it be managed?' He goes on to examine in detail the key danger areas including finance, product quality, health and safety, security and the environment. With case studies, self-assessment exercises and checklists, each chapter looks systematically at what is involved and enables you to draw up action plans that could, for example, provide a defence in law or reduce your insurance premium. The new edition reflects the changes in the global environment, the new risks that have emerged and the effect of macroeconomic factors on business profitability and success. The author has also included a set of case studies to illustrate his ideas in practice.

This book is the product of over three decades of teaching English at various levels. Whether you are a student or a language instructor, the lessons in this manual are simplified so that beginners and veterans of the English language may comfortably do the speech drills without riding over bumps. Teaching anything or training, in particular, is holistic; it is not done in compartments. To speak English fluently, you cannot focus only on pronunciation and diction and ignore the voice quality. While improving your vocabulary, pronunciation, and diction, you've got to improve your voice, as well as all the components that support the speech mechanism. This book gives you everything you need to improve your spoken English.

Trade Paperbacks

“A good read for anyone who wants to understand what actually determines whether a developing economy will succeed” (Bill Gates, “Top 5 Books of the Year”). An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who The Financial Times said “should be named chief myth-buster for Asian business.” In How Asia Works, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell’s in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need “export discipline,” a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron’s stifling of reform to the explosive growth at a Korean steel mill. “Provocative . . . How Asia Works is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic.” —The Economist
