A Guide for Students in Teacher Education Programs SAGE

This book is a natural step beyond our earlier text *A Teacher's Guide to Assessment*, which was published almost six years ago. The purpose of this book is to offer a straightforward guide to educational assessment for teachers at all levels of education, including trainers and instructors. The scope of this book is wider, however, and the targeted audience is broader than the first edition. It is designed to address the needs not only of those taking a first course in educational assessment and measurement but it can also usefully serve students at the post-graduate level, as well as experienced teachers, trainers and instructors who would like to update their knowledge and acquire practical skills using relevant quantitative methods. The book is appropriate for an international audience. In this revised edition we have added new and important material which covers the assessment arrangements necessary for people with special needs and the use of technology for assessment purposes. We have elaborated on the dangers of differential item functioning; we have extended the Rasch measurement material; and enriched the book with practical examples using Microsoft Excel. The main message of the book is that assessment is not based on commonsense but on a huge body of international research and application over many years. Testing is a powerful, vital and large part of a teacher's assessment arsenal because it can be practical, structured and very informative. The correct use of testing, either in its traditional paper-and-pencil form or in its modern technology-based style can be a formidable ally for every teacher who aspires to practise evidence-based teaching and learning.

Educational Law provides a comprehensive survey of the legal problems and issues that confront school administrators and policymakers. If there is a greater likelihood of litigation or error in a particular area of professional practice, the discussion is more extensive. The book is organized in accordance with the author's belief that students need to read cases to understand the subtlety and richness of the law, but for legal neophytes, cases without discussion and interpretation are often difficult to comprehend. Thus the text both explains the important concepts and principles of education law and presents court decisions to illuminate them. By employing this structure, the book combines the strengths of the traditional casebook and those of the legal treatise. It also discusses the implications of the law for educational policy and practice. Key features include the following: *Presentation--To aid comprehension, technical legal terms are carefully explained when first introduced and discussions of complex topics move logically from overview to elaboration of important details to summary of key topics and principles. *Cases--By integrating carefully edited cases into the analysis of legal issues, the book exposes students with little or no background in law to the subtlety and richness of legal thinking. *New Material--The third edition incorporates extensive treatment of new cases and legislation of the last five years. Topics that have been added or significantly expanded include: the No Child Left Behind Act, students rights--especially in the areas of free speech and search and seizure, vouchers and government assistance to private and religious schools, employment discrimination, racial and sexual harassment of students and school employees, affirmative action and voluntary school integration, equity and adequacy in school finance, issues relating to use of the Internet, and the law relating to special student populations. The table of cases contains about 250 more entries than in the second edition.

Tony Little is The Head Master of Eton. One of the most progressive and imaginative people in British education today he has hitherto kept a low profile. This book, published to coincide with his retirement, sets out his educational fundamentals. There is a crisis in the British education system. Year on year GCSE and A Level pupils post better exam results, with more students achieving top grades. Yet business leaders and employers complain bitterly that our schools are not producing people fit for purpose. Far from being locked in an ivory tower, a bastion of privilege, Mr Little has used his time as a teacher and headmaster to get to grips with fundamental questions concerning education. He wants to produce people fit to work in the modern world. How do children absorb information? What kind of people does society need? What is education for? Not only is the author one of the great reforming headmasters of our time but he has planted Academies in the East end of London, founded a state boarding school near Windsor and yet is a passionate advocate of single sex schools. This book is not a text book for colleges of education - it is a book to enlighten the teaching profession and just as much for anxious parents. The book is simply arranged under topics such as authority, expectations, progress, self-confidence, sex, crises and creativity. Tony Little thinks it is time to ask some fundamental questions, and to make brave decisions about how we make our schools and our schoolchildren fit for purpose.

All across the country, in traditional public, public charter, and private schools, entrepreneurial educators are experimenting with the school day and school week. Hybrid Homeschools have students attend traditional classes in a brick-and-mortar school for some part of the week and homeschool for the rest of the week. Some do two days at home and three days at school, others the inverse, and still others split between four days at home or school and one day at the other. This book dives deep into hybrid homeschooling. It describes the history of hybrid homeschooling, the different types of hybrid homeschools operating around the country, and the policies that can both promote and thwart it. At the heart of the book are the stories of hybrid homeschoolers themselves. Based on numerous in-depth interviews, the book tells the story of hybrid homeschooling from both the family and educator perspective.
